This fuse block contains fuses and relays related to major systems such as the engine, cooling fan, fuel pump, and ABS brakes. It is designed to withstand harsh engine compartment conditions and has a cover with a fuse diagram printed on the inside for quick reference.

Interior Fuse Panel

The secondary fuse box is located inside the vehicle, typically on the driver's side under the dashboard or near the kick panel. This fuse panel controls accessories such as interior lighting, power seats, radio, and cigarette lighter. Accessing this fuse box requires removing a panel or cover, which usually snaps off without tools.
