10 famous leaders and their leadership styles: This Generation Leads: The Latest Leadership Ideas from South Africa Mike Teke, Muzi Kuzwayo, 2022-03-01 "This book was born out of an idea that I had during the period in which I spent time with several young people who had approached me to assist them in different ways, including personal development, career advancement and growth, as well as growing their businesses and entrepreneurial acumen and skills. I took the challenge but felt that more could be achieved, hence this book. The chapters in this book are written by each one of these young people. They chose the topics, guided by me, and the

plan was to simply convey a message from each one of them about leadership. They did not do this for fame or to sell this book to make money, but to share their ideas. The topics covered in this book will appeal to different readers, and some readers might find more lessons in one chapter or in more chapters than one. I urge each one of you who read this book to pick one or a few lessons and share it with those you wish to make a difference to. Mentorship of young people is critical, but this does not mean that the mentors will provide handouts in the form of money. People who wish to grow, are not interested in money, they are interested in a piece of your generous heart.” - Mike Teke

10 famous leaders and their leadership styles: *Complexity of Leadership, Organizations and the Real Estate Industry* D. B. A. Joseph Aluya, 2009-03 The existing anchored systems and layers of complexities involved in the interpretation of various leadership styles are discussed in this book. Smart power as a component within the systems in leadership styles is explained (Coutu, 2008; Nye, 2008; Nye & Armitage, 2007). Hard and soft powers are part of the smart power conceptualization. Academicians and learners are challenged to have firm gravitas from triggers and cameos emanating from leadership styles that are Disrupting Existing Systems (DES) elements. Leadership theories are disruptively challenged (Bass, 1985, 1996; Burns, 1978, 2006). Germinal and seminar leadership theories are used to conceptualize, interpret and rationalize why disruption of an existing system creates effective or ineffective leadership styles. Other elements in the systems are the value chains, supply chains, front and back offices, functional operable machines, disruptive technologies, manpower, capital or human capital and intellect that lead to optimal production of goods and services (Porter, 1980b, 1985, 1990; Porter & Stern, 2001). Part two dissects, analyzes, synthesizes and possibly amalgamates various organizational systems that were disrupted. Disruptions of the present systems in organizations such as Virgin Airways, Hewlett-Packard, UPS, Nokia, AOL Time Warner and Yahoo are used as case studies to explicate this phenomenon. Part three explains the housing market in California and in the United States. Current economy recession due to housing foreclosures in the United States is discussed. The United States contractions, recessions and recoveries periods are illuminated. Affordable housing in the sub-Saharan African region is also explained. For housing to be affordable and available for the middle-income populations worldwide, disrupting the anchored and entrenched existing policies remain a viable and pivotal option. In chapter 16, Professor Ossian Carraway uses narrative and statistical analysis to explain the phenomenon and concepts by traversing the landscape of disruptive technologies expansively.

10 famous leaders and their leadership styles: Agile Leadership in the Light of Efficiency of Organizations and the Health of Employees, 2nd edition Paul Jimenez, Borut Milfelner, Anita Bregenzer, 2025-09-30 The digital age is characterized by rapid progress and constantly changing framework conditions, which presents companies with special challenges that can be described with the acronym VUCA (volatility, uncertainty, complexity and ambiguity). A strong booster for drastic changes were lockdowns and pandemic requirements, when many teams had to work from home and their leaders did not see their employees for weeks or longer. Managers were increasingly confronted with sudden and unexpected changes and had to react quickly and flexibly to unforeseen circumstances and their consequences. In order to be able to react to these requirements, companies had to be flexible and constantly orientate themselves to the current framework conditions - they have to be agile. Agility can be focused on the company, the workforce, the team, the leaders or the employees. An agile manager defines and disseminates a guiding vision and is able to lead the team and continuously influence team behavior. Agile leaders should be able to create an innovation-friendly climate in which employees feel safe to experiment, exchange information, help and support one another, and develop creative ideas. The result is high resilience and output, and ideally, a health-promoting work environment. This Research Topic will focus on the way of working in virtual teams, on smart or agile leadership, distance leading and - consequently - the changes which arise out of the form of working "alone" and the economic and personal benefits of this concept. Research questions therefore could focus on problems which can arise but also positive outputs for the organization and the employees, the best conditions for agile leadership, the requirements for the working environment or the requirements for leaders. The subjects of this Research Topic include, but are not limited to, the following areas: • Conceptual views of agile and/or smart leadership • Agile leadership of digital teams in general • New organizational

structures - flat organizational structures • Self-organized teams, division of tasks, distribution of decision-making authority - power sharing, employee participation • Effects of agile leadership on the well-being indicators of the workforce (e.g burnout) • Leadership challenges in times of unexpected changes • Economic benefits of agile leadership • Critical aspects of agile leadership and agile teams in the view of psychosocial risks • Effects of agile leadership on the well-being indicators of the workforce • Health and beneficial outcomes of agile leadership
