The country is bordered by Rwanda, Tanzania, and the Democratic Republic of the Congo. Burundi, which gained independence from Belgium in 1962, is known for its political instability, poverty, and ethnic conflict. The country has experienced several coups and attempted coups since gaining independence, with the most recent one occurring in 2015. 2 09 quiz the constitution: Europe's Functional Constitution Turkuler Isiksel, 2016 Constitutionalism has become a byword for legitimate government, but is it fated to lose its relevance as constitutional states relinquish power to international institutions? This book evaluates

the extent to which constitutionalism, as an empirical idea and normative ideal, can be adapted to institutions beyond the state by surveying the sophisticated legal and political system of the European Union. Having originated in a series of agreements between states, the EU has acquired important constitutional features like judicial review, protections for individual rights, and a hierarchy of norms. Nonetheless, it confounds traditional models of constitutional rule to the extent that its claim to authority rests on the promise of economic prosperity and technocratic competence rather than on the democratic will of citizens. Critically appraising the European Union and its legal system, this book proposes the idea of functional constitutionalism to describe this distinctive configuration of public power. Although the EU is the most advanced instance of functional constitutionalism to date, understanding this pragmatic mode of constitutional authority is essential for assessing contemporary international economic governance.

The country was involved in several major conflicts throughout its history, including the American Revolution, World War I, World War II, and the Cold War. 2 09 quiz the constitution: *Where the Hell is Middle America?* Terrence Stone, 2024-08-31 Are you tired of the political discord between the two major political parties and feel a deep rift among the electorate? Well, the author does and dives into our current divisive political climate and

its impact on our social climate. And he places much of the blame on our politicians for this disharmony. While self-identifying as fiscally conservative but more socially liberal, the author previously felt he was a lifelong moderate Republican. However, he has become disenchanted with the GOP of late. He examines many of the typically divisive topics that often distinguish Republicans and Democrats. Exploring other political parties was also enlightening and now realizes he is more moderate/centrist than previously thought. Today's politicians often pander to their extremist ends, rarely considering the middle third of the electorate that identify as moderate. If a formidable moderate/centrist candidate could wrest away the dominance of the two major parties by providing some competition, it could force the Republican and Democratic politicians to act better. After all, competition in the marketplace can help bring down prices for our betterment: wouldn't more competition in the political arena also be for our betterment? The author shows that some middle ground may be met by offering some simple solutions to often complex political topics. If more of the electorate could lean towards the middle, further away from the far right and left extremist ends, then we could gain additional support for more moderate major party candidates or even prevalent third-party candidates.

2 09 quiz the constitution: *The Human Rights of Migrants and Refugees in European Law* Cathryn Costello, 2015-12-24 Focussing on access to territory and authorization of presence and residence for third-country nationals, this book examines the EU law on immigration and asylum, addressing related questions of security of residence. Concentrating on the key measures concerning both the rights of third-country nationals to enter and stay in the EU, and the EU's construction of illegal immigration, it provides a detailed and critical discussion of EU and ECHR migration and refugee law. Rights of admission include three categories of entrants: labour migrants, family migrants, and asylum seekers and refugees. Legal entry raises further questions, and recent key measures, including the EU Blue Card Directive, the Family Reunification Directive, and the Dublin Regulation and related instruments are examined. As most of these EU measures deal with those border crossings where human rights norms have already established some constraints on state discretion, the interaction between the EU norms and the case law of the European Court of Human Rights (ECtHR) is a key concern. The uniting theme is the interaction between established human rights norms, in particular the ECHR, and EU law. Does the EU fulfil its post-national promise to create forms of membership beyond the state, or in its treatment of non-Europeans, does it undermine human rights and existing legal protections?

2 09 quiz the constitution: *Constitutionalization of European Private Law* Hans Micklitz, 2014-04-17 In recent years the impact of human rights and fundamental rights on private law has risen in prominence and led to a whole series of detailed investigations. 'Constitutionalization of private law' is the flag under which most of the research on the increasing impact of national constitutional rights on national private legal orders is sailing. In the absence of a European Constitution, the constitutionalization of European private law suggests a process: constitutionalization instead of constituent power, demos, and the magic constitutional moment. The Charter of Fundamental Rights and the European Convention of Human Rights constitute the two pillars on which the transformation of European private law rests. This volume clearly demonstrates the change that has taken place, at the national and at the European level. Private law is no longer immune to the intrusion of fundamental and human rights. Whilst member states and the EU are

driving the process by adopting ever more concrete and more comprehensive lists of human and fundamental rights, at the national, the European, and international level with overlapping contents, the true and key players in this development are the national and European courts. Contributions to this volume give this process a face and a direction, which is highlighted in the introduction by Hans-W. Micklitz.

2 09 quiz the constitution: Studied Ignorance Herbert N. Foerstel, 2013-05-23 Despite concerted efforts from our educators, administrators, and government, American education continues to struggle. The author of this work argues that the decline can be traced to censored curricula, inaccurate textbooks, test-driven evaluations, and increasing poverty among the student population. Under the definition of failure specified in the No Child Left Behind Act, more than 80 percent of American schools could currently be labeled as failing, while the quality of American education overall and our students' performance continue to rank unfavorably against international competition. This book examines the crisis in American education and identifies how weaknesses in textbooks, teaching, and testing have created the crisis facing American education—a topic that dramatically affects students, teachers, and parents. Author Herbert N. Foerstel exposes the textbook wars that began a century ago and rage on with even more venom today. His book traces the legal basis for curricular censorship that dates back 75 years; identifies the bizarre process by which shoddy textbooks have been written, published, and come to be widely accepted; and documents the disastrous effect that reliance on these materials has had on the curriculum. Foerstel also supplies a careful assessment of the current political debate over education reform and of the proposed solutions to these problems.

2 09 quiz the constitution: Legal Constraints on EU Member States in Drafting

Accession Agreements Narin Idriz, 2022-06-22 Do Member States of the EU have a free hand in drafting Accession Treaties, or are there legal constraints on their primary law-making powers in this regard? That is the main question this book addresses. It argues that such constraints do exist, and seeks to identify them, thereby providing a number of insights into the nature of the EU's legal order. The point of departure as well as the main focus of the study is the proposed permanent safeguard clause (PSC) on the free movement of persons in the Negotiating Framework for Turkey. Legal provisions, rules, principles and norms that might constrain Member States in this regard are identified with reference to the PSC. The book examines constraints on Member States stemming from three sources of EU law: Association Law, based on the existing legal framework built on the EEC-Turkey Association Agreement (Part I); EU Enlargement Law, comprised of past practice and existing EU rules on enlargement (Part II); and the foundations of EU Constitutional Law (Part III), which constrain Member States whenever they act within the scope of Union law both as primary and secondary lawmakers. Part III reveals what the Court of Justice of the EU considers to be the essence or the 'very foundations' of the Union's legal order, which it protects against encroachment. This is similar to what some constitutional courts do to protect the 'inner unity' or 'basic structure' of their constitutions. The findings of this book can be applied to the accession of any candidate state. It also sheds light on important implications for future treaty amendments, and for identifying possible limits to differentiated integration.
