Fuel Economy Ratings of the 2007 Honda Ridgeline

The official fuel economy ratings for the 2007 Honda Ridgeline provide a baseline for understanding its efficiency on both city and highway driving. These ratings are determined by the Environmental Protection Agency (EPA) and serve as standardized metrics for consumers. The 2007 Ridgeline was equipped with a 3.5-liter V6 engine paired with either a five-speed automatic transmission and came in two drivetrain configurations: front-wheel drive (FWD) and all-wheel drive (AWD).

EPA Fuel Economy Estimates

The EPA estimates for the 2007 Honda Ridgeline's fuel economy are as follows:

- **Front-Wheel Drive (FWD):** Approximately 16 miles per gallon (mpg) in the city and 21 mpg on the highway.
- **All-Wheel Drive (AWD):** Slightly lower, with about 15 mpg city and 20 mpg highway.

These figures reflect the Ridgeline's balance between power and fuel efficiency, which was competitive for its class at the time of release.

Combined Fuel Economy

The combined EPA rating, which factors in both city and highway driving, is 18 mpg for the FWD version and 17 mpg for the AWD model. This combined metric provides a general expectation of fuel consumption for mixed driving conditions.

Engine and Drivetrain Impact on Fuel Efficiency

The 2007 Honda Ridgeline's fuel economy is influenced significantly by its engine design and drivetrain setup. Understanding these elements explains the variations in fuel efficiency between different models and configurations.

Engine Specifications

The Ridgeline is powered by a 3.5-liter V6 engine producing approximately 247 horsepower and 245 lb-ft of torque. While this engine provides ample power for towing and hauling, its fuel consumption is affected by factors such as vehicle weight and aerodynamics.

Drivetrain Options and Their Effects

The availability of both front-wheel drive and all-wheel drive options impacts fuel economy due to the added mechanical complexity and weight of the AWD system. The AWD system provides better traction and off-road capability but typically results in slightly reduced fuel efficiency compared to FWD models.

Comparing Fuel Economy with Competitors

When evaluating the 2007 Honda Ridgeline fuel economy, it is important to compare it against other midsize pickups of the same era. This comparison highlights where the Ridgeline stands in terms of efficiency and practicality.

Key Competitors in 2007

Competitors in the midsize pickup segment during 2007 included:

- Toyota Tacoma
- Ford Ranger
- Chevrolet Colorado
- Nissan Frontier

Fuel Economy Comparison

In general, the 2007 Honda Ridgeline offered competitive fuel economy figures within its class. For instance, the Toyota Tacoma's V6 models averaged around 15 mpg city and 19 mpg highway, slightly less efficient than the Ridgeline's FWD ratings. The Ford Ranger and Chevrolet Colorado had similar or slightly lower fuel economy, depending on engine and drivetrain options.

Factors Affecting Real-World Fuel Economy

While EPA ratings provide a useful guideline, actual fuel economy experienced by drivers often differs due to various real-world factors. These influences can either improve or degrade the 2007 Honda Ridgeline's fuel efficiency.

Driving Conditions and Habits

Stop-and-go city traffic, aggressive acceleration, and excessive idling can lower fuel economy substantially. Conversely, steady highway speeds and smooth acceleration tend to maximize efficiency. Terrain and elevation changes also play roles in fuel consumption.

Vehicle Load and Usage

Carrying heavy payloads or towing trailers increases engine load, leading to higher fuel consumption. The Ridgeline's capability as a pickup truck means that owners who frequently use it for hauling may see lower mpg figures than EPA estimates.

Maintenance and Tire Condition

Proper vehicle maintenance, including regular oil changes, air filter replacements, and tire inflation, directly affects fuel economy. Worn spark plugs or under-inflated tires can decrease efficiency by increasing engine workload and rolling resistance.

Tips to Improve 2007 Honda Ridgeline Fuel Economy

Maximizing fuel efficiency in a 2007 Honda Ridgeline involves a combination of good driving practices and regular vehicle upkeep. Implementing the following tips can help owners achieve better mileage and reduce fuel costs.

- **Maintain steady speeds:** Avoid rapid acceleration and heavy braking to conserve fuel.
- **Keep tires properly inflated:** Check tire pressure regularly to reduce rolling resistance.
- **Limit idling time:** Turn off the engine during extended stops to save

fuel.

- **Reduce excess weight:** Remove unnecessary cargo to lessen the load on the engine.
- **Schedule regular maintenance:** Ensure timely oil changes, air filter replacements, and spark plug inspections.
- **Use recommended engine oil:** Follow manufacturer guidelines for oil viscosity to optimize engine efficiency.
- **Plan routes efficiently:** Minimize stop-and-go traffic and avoid congested areas when possible.
