Fuse Box Locations in the 2006 Hyundai Sonata

The 2006 Hyundai Sonata features multiple fuse boxes, each responsible for different electrical circuits within the vehicle. Knowing the exact locations of these fuse boxes is the first step toward accessing the fuse box diagram and performing any electrical maintenance tasks.

Engine Compartment Fuse Box

The primary fuse box in the 2006 Hyundai Sonata is located in the engine compartment. It is typically positioned near the battery or along the fender wall on the driver's side. This fuse box contains high-current fuses and relays that control essential engine and powertrain components such as the fuel pump, cooling fan, and ignition system.

Interior Fuse Box

In addition to the engine compartment fuse box, there is an interior fuse box located inside the vehicle. This fuse panel is usually found beneath the dashboard on the driver's side or behind a panel near the glove compartment. It houses fuses for interior electronics including the radio, power windows, dashboard lights, and climate control system.

Additional Relay Boxes

Some models of the 2006 Hyundai Sonata may also include additional relay boxes positioned under the hood or inside the cabin. These relay boxes complement the main fuse boxes by protecting circuits related to lighting, horn, and other auxiliary systems.
