bear valley family medicine: Adolescent Psychiatry, V. 28 Lois T. Flaherty, 2013-05-13 The ASAP's longstanding advocacy of troubled adolescents gains expression in Volume 28 of Adolescent Psychiatry, which focuses on the juvenile justice system and other dimensions of adolescents and the law. A special section on the forensic and legal aspects of adolescent psychiatry traverses the competence of adolescents to consent to treatment; the voluntary hospitalization of adolescents; the utility of residential treatment programs in the management of juvenile delinquency; and Richard Ratner's Schonfeld Lecture, Juvenile Justice? The special demands on psychiatric providers are addressed in Richard Rosner's proposal for the legal regulation of the practice of adolescent psychiatry and Alan Tuckman's and Dominic Ferro's consideration of professional liability and malpractice in adolescent psychiatry. The treatment challenges addressed in Part II are complementary to the focus on the legal aspects of clinical work with adolescents. Contributors address the impact of adolescent hostility on the therapeutic process; the evaluation of teenagers who make threats in school settings; the evaluation and treatment of boys who have been sexually abused by clergy; the psychotherapy of learning-disabled adolescents; and the assessment and treatment of juveniles who commit sex crimes. Volume 28 concludes with two chapters that underscore the ASAP's commitment to timely consideration of the relations among culture, development, and psychopathology. Eugenio Rothe offers a comprehensive overview of Hispanic adolescents and their families and then develops practical guidelines on therapeutic approaches to Hispanic adolescents. And Max Sugar, building on previous examinations of the effects of military experience on late-adolescent males, develops a new conceptualization, warrior identity problem, to explain the postmilitary adjustment problems of certain young male soldiers and the psychopathology observed in some veterans.

bear valley family medicine: Family Medicine A.K. David, T.A.Jr. Johnson, D.M. Phillips, J.E. Scherger, Robert B. Taylor, 2013-06-29 Much is new in Family Medicine since the last edition of our textbook. For example, not only is the therapy of human immunodeficiency virus (HIV) disease and the acquired immunodeficiency syndrome (AIDS) much different than a few years ago; the epidemiology of the disease has also changed and more than half of the family physicians in a rural state such as Oregon have already managed patients with HIV disease or AIDS. 1 There are new immunization recommendations for children and new antibiotics for the treatment of bacterial infections. Computers are bringing medical informatics and on-line consultation into office practice. Medicare physician payment reform is underway and the reality of rationing medical care has been recognized. There has been a recent increase in student interest in a family practice career,² coincidental with a Council on Graduate Medical Education (COGME) recommendation that at least 50 percent of all residency graduates ³ should enter practice as generalists. Also there is increasing awareness of the need for a ⁴ Center for Family Practice and Primary Care at the National Institutes of Health. This all-new fourth edition is intended to present the scientific and practical basis of family medicine with special attention to what's new in family medicine. The emphasis is on how the physician provides continuing and comprehensive care for persons of all ages, with clinical content

selected from the perspective of family physicians. The format of the book, like the practice of family medicine, continues to change.

bear valley family medicine: *The Dnr Trilogy* Don W. Hill M.D., 2018-10-17 A deeply flawed individual, J. D. Brewster was afflicted with chronic, intrusive, dark and violent thoughts that alienated the medical student from not only his colleagues, but also from everyone he had ever known. His life was already disintegrating when he somehow miraculously survived a murder attempt that sadly left him with not only serious permanent physical injuries, but also with a seething hatred and an all-consuming compulsion to seek revenge. Engrossed in the brutal and dehumanizing clinical clerkship rotations, Brewster spirals downward into an ever-deepening quagmire of moral despair. Upon the death of his fiancé, worsening spiritual isolation propels Brewster to embrace the secret clinical justice system that was hiding amongst the shadows at the Gulf Coast College of Medicine. After successfully recruiting several other grievously traumatized victims of violent crimes, Brewster successfully orchestrates a shocking act of vigilante retribution within the very halls of an institution that was auspiciously dedicated to the art of medical care. In this final installment of a medical thriller trilogy, a dispirited medical student is willing to sacrifice a promising career to become a vigilante, but in the end, he must eventually face the truth as his life comes full circle.

bear valley family medicine: *The Great Medicine Road, Part 1* Michael L. Tate, 2014-10-22 Between 1841 and 1866, more than 500,000 people followed trails to Oregon, California, and the Salt Lake Valley in one of the greatest mass migrations in American history. This collection of travelers' accounts of their journeys in the 1840s, the first volume in a new series of trail narratives, comprises excerpts from pioneer and missionary letters, diaries, journals, and memoirs—many previously unpublished—accompanied by biographical information and historical background. Beginning with Father Pierre-Jean de Smet's letters relating his encounters with Plains Indians, and ending with an account of a Mormon gold miner's journey from California to Salt Lake City, these narratives tell varied and vivid stories. Some travelers fled hard times: religious persecution, the collapse of the agricultural economy, illness, or unpredictable weather. Others looked ahead, attracted by California gold, the verdant Willamette Valley of Oregon, or the prospect of converting Native people to Christianity. Although many welcomed the adventure and adjusted to the rigors of

trail life, others complained in their accounts of difficulty adapting. Remembrances of the Oregon, California, and Mormon Trails have yielded some of the most iconic images in American history. This and forthcoming volumes in The Great Medicine Road series present the pioneer spirit of the original overlanders supported by the rich scholarship of the past century and a half.

Babysitting for God is a collection of riveting stories that bring you face-to-face with the fascinating journey that foster children go through. It will uplift and encourage you as you witness the unyielding determination of abused children, the unmatched power of prayer, and the awesome way God reveals himself, comforts, and blesses these children as He changes their lives in amazing ways. The joy will definitely inspire you as you read captivating stories loaded with both scripture and quotes containing powerful messages of love, hope and healing. The exploration and personal accounts of this devoted foster family will leave your questions answered, compel you to trust what God can do when you have the courage to pray, and awaken you to the realization that through the spirit of service, we all have the ability to make an unbelievably significant difference. Growing up, all author Heidi McLain wanted to be was a Mom. She attended graduate school and became a chiropractor and clinical nutritionist more than 20 years ago, but much prefers the title of Mom over doctor. Known for her saying, 'Thank God for God, ' Heidi serves Him in what she describes as her most profound and rewarding calling yet: giving and devoting her time and energy to being a foster parent. Having cared for hundreds of children (including over 80 babies!) over the past 10 years, Heidi's family has helped many of them to experience God's love. Being given nicknames like Wonder Woman and the Baby Whisperer, Heidi delights in being part of the foster care community and sharing her experiences, triumphs and defeats with others, hoping to bring them encouragement and inspiration. Heidi has four children: Amanda, Christopher, Bradley and Anna, and lives with her family in San Diego, California.
