beacon hill health center: *Community Health Centers* Bonnie Lefkowitz, 2007-01-09 The aftermath of Hurricane Katrina has placed a national spotlight on the shameful state of healthcare for America's poor. In the face of this highly publicized disaster, public health experts are more concerned than ever about persistent disparities that result from income and race. This book tells the story of one groundbreaking approach to medicine that attacks the problem by focusing on the wellness of whole neighborhoods. Since their creation during the 1960s, community health centers have served the needs of the poor in the tenements of New York, the colonias of Texas, the working class neighborhoods of Boston, and the dirt farms of the South. As products of the civil rights movement, the early centers provided not only primary and preventive care, but also social and environmental services, economic development, and empowerment. Bonnie Lefkowitz-herself a veteran of community health administration-explores the program's unlikely transformation from a small and beleaguered demonstration effort to a network of close to a thousand modern health care organizations serving nearly 15 million people. In a series of personal accounts and interviews with national leaders and dozens of health care workers, patients, and activists in five communities across the United States, she shows how health centers have endured despite cynicism and inertia, the vagaries of politics, and ongoing discrimination.

beacon hill health center: *Boston Women's Heritage Trail* Polly Welts Kaufman, Jean Gilbran, Sylvia McDowell, 2006 Women have played active, prominent roles in Boston history since the days of Anne Hutchinson - the colonial freethinker who bravely challenged the authority of ruling Puritan ministers in 1638. Hutchinson's action is only one of more than 200 stories of Boston women told in the newly expanded guidebook from the Boston Women's Heritage Trail. Several maps indicate the sites where these historic women walked, worked, and lived, while photographs and other illustrations help bring these women to life once again. The updated guidebook will take you on seven walks through seven distinctly different Boston neighborhoods. Hutchinson's story is told by her statue on the grounds of the Massachusetts State House, while Rose Fitzgerald Kennedy's is found at the site of her birthplace in the North End. An underground railway stop on Beacon Hill reveals the dramatic escape of enslaved Ellen and William Craft to Boston. Other trails lead walkers to new statues of Underground Railroad conductor Harriet Tubman in the South End and of Abigail Adams, Lucy Stone and Phillis Wheatley - three women who used the pen for change - portrayed in bronze in the recently dedicated Boston Women's Memorial on Commonwealth Avenue. The Boston Women's Heritage Trail guidebook is a must for visitors, students, and residents of Boston alike. Its lively descriptions show the significant role Boston women played in shaping the history and the future of both Boston and the nation.

beacon hill health center: *Cultural Psychotherapy* Martin La Roche, 2013 Written by a leading expert in the field of culturally competent psychotherapeutic practice, this book presents an integrated psychotherapeutic framework designed to help students and practitioners understand,

investigate and treat clients from diverse cultural backgrounds. La Roche introduces a logical theoretical model that takes into account the influence of sociopolitical, economic and cultural processes within the psychotherapeutic process. Using a three-phased psychotherapeutic model with specific clinical recommendations and suggestions for each phase, the book explores complex clinical cases that illustrate in detail each phase. Unique in its approach to and definition of the concept of cultural diversity, Cultural Psychotherapy expands the traditional ethnicity/race model to a model that examines individuals and groups according to a broader set of variables. In other words, the key to enhancing our understanding of our clients is to take into account the rich and dynamic context in which their lives develop and evolve.
