beautiful in yoruba language: Yorùbá Art and Aesthetics Barry Hallen, 2025-06-12 An introduction to the art and aesthetics of southwest Nigeria using the writings of Yorùbá scholars and artists who have made these subjects their special interest over the last forty years. Barry Hallen brings together the writings of four pioneering Yorùbá thinkers who write about the art and aesthetics of their own culture: J.R.O. Ojo, Babatunde Lawal, Rowland Abiodun and Wole Soyinka. All were based at the Obafemi Awolowo University, named Great Ife because of the faculty and students' conviction that it was committed to achieving all of the great things that a university community can. Each is responsible for developing indigenous concepts in which African art derives its importance and meanings in the world. Never before has their work been set side-by-side. By treating their work as interrelated we see how when combined they offer a better and higher level of understanding of that remarkable and fascinating form of life associated with the name Yorùbá. Each chapter provides a 'taste' of their philosophy as they reveal what they have to say about how they view and value their art internal to their culture. Hallen places attention on the methodologies each of them uses to arrive at and defend their ideas. Together they tell a story about how badly things can go when human cultures believe they are categorically different from one another. They also argue that the more comprehensive one's experience and knowledge of the culture is, the better one is prepared to appreciate the conception and interpretation of its art. This is the first book of its kind to take such a discursive and analytic approach to Yorùbá art and aesthetics. Disentangling African art from Eurocentric stereotypes, it represents exciting new scholarship in the disciplines that have come to be known as African philosophy and African art history.

beautiful in yoruba language: Odún Cristina Boscolo, 2009-01-01 A poetic 'voice' scans the

rhythm of academic research, telling of the encounter with *odún*; then the voice falls silent. What is then raised is the dust of a forgotten academic debate on the nature of theatre and drama, and the following divergent standpoints of critical discourses bent on empowering their own vision, and defining themselves, rather, as counterdiscourses. This, the first part of the book: a metacritical discourse, on the geopolitics (the inherent power imbalances) of academic writing and its effects on *odún*, the performances dedicated to the gods, ancestors, and heroes of Yorùbá history. But *odún*: where is it? and what is it? And the 'voice'? The many critical discourses have not really answered these questions. In effect, *odún* is many things. To enable the reader to see these, the study proceeds with an 'intermezzo': a frame of reference that sets *odún*, the festival, in its own historico-cultural ecoenvironment, identifying the strategies that inform the performance and constitute its aesthetic. It is a 'classical' yet, for *odún*, an innovative procedure. This interdisciplinary background equips the reader with the knowledge necessary to watch the performance, to witness its beauty, and to understand the 'half words' *odún* utters. And now the performance can begin. The 'voice' emerges one last time, to introduce the second section, which presents two case studies. The reader is led, day by day, through the celebrations -*odún edì*, *Morèmi's* story, and its realization in performance; then confrontation by the masks of the ancestors during *odún egúngún* (particularly as held in Ibadan). The meaning of *odún* becomes clearer and clearer. *Odún* is poetry, dances, masks, food, prayer. It is play (*eré*) and belief (*ìgbàgbó*). It is interaction between the players (both performers and spectators). It is also politics and power. It contains secrets and sacrifices. It is a reality with its own dimension and, above all, as the quintessential site of knowledge, it possesses the power to transform. In short, it is a challenge - a challenge that the present book and its voices take up.

beautiful in yoruba language: Spiritual Citizenship N. Fadeke Castor, 2017-11-09 In *Spiritual Citizenship* N. Fadeke Castor employs the titular concept to illuminate how Ifá/Orisha practices informed by Yoruba cosmology shape local, national, and transnational belonging in African diasporic communities in Trinidad and beyond. Drawing on almost two decades of fieldwork in Trinidad, Castor outlines how the political activism and social upheaval of the 1970s set the stage for African diasporic religions to enter mainstream Trinidadian society. She establishes how the postcolonial performance of Ifá/Orisha practices in Trinidad fosters a sense of belonging that invigorates its practitioners to work toward freedom, equality, and social justice. Demonstrating how spirituality is inextricable from the political project of black liberation, Castor illustrates the ways in which Ifá/Orisha beliefs and practices offer Trinidadians the means to strengthen belonging throughout the diaspora, access past generations, heal historical wounds, and envision a decolonial future.

beautiful in yoruba language: The Funk Movement Reiland Rabaka, 2024-10-23 Rabaka explores funk as a distinct multiform of music, aesthetics, politics, social vision, and cultural rebellion that has been remixed and continues to influence contemporary Black popular music and Black popular culture, especially rap music and the Hip Hop Movement. The Funk Movement was a sub-movement within the larger Black Power Movement and its artistic arm, the Black Arts Movement. Moreover, the Funk Movement was also a sub-movement within the Black Women's Liberation Movement between the late 1960s and late 1970s, where women's funk, especially Chaka Khan and Betty Davis's funk, was understood to be a form of "Black musical feminism" that was as integral to the movement as the Black political feminism of Angela Davis or the Combahee River Collective and the Black literary feminism of Toni Morrison or Alice Walker. This book also demonstrates that more than any other post-war Black popular music genre, the funk music of the 1960s and 1970s laid the foundation for the mercurial rise of rap music and the Hip Hop Movement in the 1980s and 1990s. This book is primarily aimed at scholars and students working in popular music studies, popular culture studies, American studies, African American studies, cultural studies, ethnic studies, critical race studies, women's studies, gender studies, and sexuality studies.
