The following sections provide a comprehensive overview of its structure, services, and contributions to the professional community and individuals served.

- Overview of the Behavior Analysis Association of Michigan
- Membership and Professional Development Opportunities
- Educational Programs and Continuing Education
- Advocacy and Ethical Standards
- Community Impact and Collaborations

Overview of the Behavior Analysis Association of Michigan

The behavior analysis association of michigan (BAAM) is a professional organization dedicated to promoting the science and practice of behavior analysis throughout Michigan. Established to support behavior analysts, educators, and related professionals, BAAM is committed to enhancing the quality of behavioral services available within the state. The association emphasizes research, practical application, and collaboration among practitioners to address diverse needs in educational, clinical, and community settings.

BAAM acts as a central body that connects professionals in the field, facilitating the exchange of knowledge and best practices. The organization also monitors legislative and regulatory developments affecting behavior analysis, ensuring members stay informed and compliant with state and national standards. Through its initiatives, BAAM strives to improve outcomes for individuals receiving behavioral services, particularly in areas such as autism spectrum disorder, developmental disabilities, and other behavioral health concerns.

Mission and Vision

The mission of the behavior analysis association of michigan is to advance the field of behavior analysis by supporting professional growth, promoting ethical practices, and fostering collaboration

among members. BAAM envisions a Michigan where evidence-based behavior analytic services are accessible to all who need them, delivered by highly skilled and ethically responsible professionals.

Organizational Structure

BAAM is governed by a board of directors composed of experienced behavior analysts and professionals from various sectors. Committees within the association focus on areas such as education, membership, advocacy, and conference planning. This structure allows BAAM to effectively address the diverse needs of its members and the broader community it serves.

Membership and Professional Development Opportunities

Joining the behavior analysis association of Michigan offers numerous advantages for both seasoned and emerging professionals in the field. Membership is open to certified behavior analysts, practitioners, students, educators, and stakeholders interested in behavior analysis. The association prioritizes fostering a supportive environment for professional growth and networking.

Types of Membership

BAAM provides several membership categories tailored to different professional stages and roles, including:

- Professional Members - Licensed and certified behavior analysts actively practicing in Michigan.
- Student Members - Individuals enrolled in behavior analysis or related graduate programs.
- Associate Members - Professionals interested in behavior analysis who may not hold certification but work in related fields.
- Organizational Members - Agencies and institutions supporting the mission of BAAM.

Benefits of Membership

Members gain access to a variety of resources and opportunities designed to enhance their expertise and professional network. Key benefits include:

- Discounted rates for workshops, conferences, and training events.
- Access to exclusive newsletters and research updates.
- Opportunities for leadership and committee involvement within the association.

- Networking events with peers and experts in behavior analysis.
- Job postings and career development resources.

Educational Programs and Continuing Education

The behavior analysis association of michigan places significant emphasis on continuing education and professional training. Staying current with advancements in behavior analysis is essential for maintaining certification and delivering high-quality services.

Workshops and Conferences

BAAM regularly organizes workshops, seminars, and an annual conference that cover a wide range of topics relevant to behavior analysts. These events provide hands-on training, updates on research, and discussions on best practices. Attendees can earn continuing education units (CEUs) required for maintaining certification through the Behavior Analyst Certification Board (BACB).

Online and In-Person Learning

To accommodate diverse learning preferences and geographic locations, BAAM offers both online and in-person educational opportunities. Online webinars and courses facilitate ongoing learning without the need for travel, making it easier for members across Michigan to participate. In-person events foster direct interaction and collaboration among attendees.

Specialized Training

In addition to general behavior analysis topics, BAAM provides specialized training in areas such as:

- Autism spectrum disorders and early intervention techniques
- Behavioral healthcare in school settings
- Ethical decision-making and professional conduct
- Data collection and analysis methodologies
- Parent and caregiver training strategies

Advocacy and Ethical Standards

The behavior analysis association of michigan actively advocates for policies and legislation that support the practice and accessibility of behavior analytic services. The organization works to influence state regulations and funding initiatives that impact practitioners and clients.

Legislative Advocacy

BAAM engages with lawmakers and regulatory agencies to promote laws that recognize behavior analysis as an essential healthcare and educational service. This includes efforts to secure insurance coverage for behavioral interventions and to ensure licensure standards reflect current professional guidelines.

Ethical Guidelines

Maintaining ethical standards is a cornerstone of the association's mission. BAAM endorses the Behavior Analyst Certification Board's Professional and Ethical Compliance Code and provides members with resources and training to uphold these standards. Ethical practice ensures the safety, dignity, and effectiveness of behavioral services delivered to clients.

Support for Members

BAAM offers guidance and consultation related to ethical dilemmas and professional challenges. Members can access confidential support to navigate complex situations and maintain compliance with ethical requirements.

Community Impact and Collaborations

The behavior analysis association of michigan extends its influence beyond professional development by engaging in community outreach and collaborative initiatives. These efforts enhance the visibility and effectiveness of behavior analysis within various populations.

Partnerships with Educational and Healthcare Institutions

BAAM collaborates with schools, healthcare providers, and advocacy groups to expand access to behavior analytic services. These partnerships facilitate integrated approaches to care and education, benefiting individuals with developmental disabilities and behavioral challenges.

Public Awareness and Education

The association promotes public understanding of behavior analysis through informational campaigns, community workshops, and participation in statewide events. Raising awareness helps reduce stigma and encourages early intervention and support for those in need.

Volunteer and Outreach Programs

Members of BAAM often participate in volunteer projects aimed at supporting underserved populations. These initiatives may include pro bono consultations, training for caregivers, and collaboration with non-profit organizations dedicated to behavioral health.

Key Contributions to Michigan's Behavioral Health Landscape

- Improved standards for behavior analytic service delivery
- Enhanced professional competency through rigorous training
- Greater advocacy for insurance and regulatory recognition
- Increased community engagement and public education
- Support networks for behavior analysts and related professionals

behavior analysis association of michigan: Writing Skills for Behavior Analysts Dana Reinecke, Charissa Knihtila, Jacob Papazian, Celia Heyman, Danielle Bratton, 2024-07-11 Writing Skills for Behavior Analysts provides a practical guidebook for students and clinicians. The book focuses on the importance of balancing technical information with compassionate delivery, providing guidance on writing that is meaningful across the scientific and human sides of the field. Written by a group of clinicians, supervisors, and teaching faculty, the book targets eight key writing skills:

writing as a human, writing as a student, writing as a clinician, writing as a leader, writing as a supervisor, writing as faculty, writing as a researcher and, finally, writing with artificial intelligence. By addressing each of these writing skills individually, the book is able to provide clear dos, don'ts, and examples in an easy-to-digest format. This book will be an essential guide for any student of behavior analysis, as well as clinicians looking to hone their professional writing skills.

behavior analysis association of michigan: Handbook of Exposure Therapies David C.S. Richard, Dean Lauterbach, 2011-10-11 Exposure Therapy refers to any clinical intervention in which a client directly confronts a source of fear. Since high levels of anxiety can not be maintained indefinitely, repeated exposure leads to decreased anxiety. This type of treatment is effective with phobias, post traumatic stress disorder, obsessive compulsive disorders, panic, generalized anxiety, and several other disorders. It's also been found to be effective in helping to treat substance abuse. Although exposure-based treatments have been extensively researched and reported in the literature, there is no single comprehensive treatment of exposure therapies. Writings tend to be limited to larger pieces on treating specific disorders or types of patients. A comprehensive book on the use of these treatments across patient disorders will be of great use to practitioners. The book is divided into three sections: Foundation, Applications, and Issues. Foundation chapters considers theoretical and assessment issues. Applications chapters will discuss research literature on each disorder having been proven to be successfully treated with exposure therapy. Issue chapters will discuss liability issues, false memory syndrome, and the use of computers and virtual reality in exposure therapy.*Covers the broad range of exposure therapies in one comprehensive source*Provides an integrated look at exposure therapy across a variety of disorders*Each such chapter will include a case study*Blends literature review and practice guidelines

behavior analysis association of michigan: Waiting for Your Cat to Bark? Bryan Eisenberg, Jeffrey Eisenberg, 2007-09-09 Evolving from the premise that customers have always behaved more like cats than Pavlov's dogs, Waiting for Your Cat to Bark? examines how emerging media have undermined the effectiveness of prevailing mass marketing models. At the same time, emerging media have created an unprecedented opportunity for businesses to redefine how they communicate with customers by leveraging the power of increasingly interconnected media channels. Bryan and Jeffrey Eisenberg don't simply explain this shift in paradigm; Waiting for Your Cat to Bark? introduces Persuasion Architecture™ as the synthetic model that provides business with a proven context for rethinking customers and retooling marketers in a rewired market. Readers will learn: Why many marketers are unprepared for today's increasingly fragmented, in-control, always-on audience that makes pin-point relevance mandatory How interactivity has changed the nature of marketing by extending its reach into the world of sales, design, merchandizing, and customer relations How Persuasion Architecture™ allows businesses to create powerful, multi-channel persuasive systems that anticipate customer needs How Persuasion Architecture™ allows businesses to measure and optimize the return on investment for every discreet piece of that persuasive system There's some big thinking going on here-thinking you will need if you want to take your work to the next level. 'Typical, not average' is just one of the ideas inside that will change the way you think about marketing. ?Seth Godin, Author, All Marketers Are Liars Are your clients coming to you armed with more product information than you or your sales team know? You need to read Waiting for Your Cat to Bark? to learn how people are buying in the post-Internet age so you can learn how to sell to them. ?Tom Hopkins, Master Sales Trainer and Author, How to Master the Art of Selling These guys really 'get it.' In a world of know-it-all marketing hypesters, these guys realize that it takes work to persuade people who aren't listening. They've connected a lot of the pieces that we all already know-plus a lot that we don't. It's a rare approach that recognizes that the customer is in charge and must be encouraged and engaged on his/her own terms, not the sellers. Waiting for Your Cat to Bark? takes apart the persuasion process, breaks down the steps and gives practical ways to tailor your approaches to your varying real customers in the real world. This book is at a high level that marketers better hope their competitors will be too lazy to implement. ?George Silverman, Author, The Secrets of Word of Mouth Marketing: How to Trigger Exponential Sales Through Runaway Word

of Mouth We often hear that the current marketing model is broken-meaning the changes in customers, media, distribution, and even the flatness of the world make current practices no longer relevant. Yet few have offered a solution. This book recognizes the new reality in which we operate and provides a path for moving forward. The authors do an outstanding job of using metaphors to help make Persuasion Architecture clear and real-life examples to make it come alive. Finally, someone has offered direction for how to market in this new era where the customer is in control. ?David J. Reibstein, William Stewart Woodside Professor, Wharton Business School of the University of Pennsylvania and former Executive Director, Marketing Science Institute If you want to learn persistence, get a cat. If you want to learn marketing, get this book. It's purrfect. ?Jeffrey Gitomer, Author, The Little Red Book of Selling

behavior analysis association of michigan: *The Behavior Analyst* , 2008

behavior analysis association of michigan: *Behavior Analysis and Treatment* Ron Van Houten, Saul Axelrod, 2013-11-22 In May 1986, the Association for Behavior Analysis (ABA) established a task force on the right to effective behavioral treatment. The mandate of this task force was to identify and delineate specific rights as they apply to behavioral treatment. Impetus for this project came in part from the controversy over the use of aversive procedures, which some held had

no place in treatment and, with evolution of the treatment process, were no longer necessary. In contrast, others cited evidence that programs based on positive reinforcement alone were sometimes not effective in treating severe problems. These researchers and practitioners desired to ensure that clients and guardians be permitted to choose treatments that included punishment procedures when assessments warranted their use. The first editor approached Ogden Lindsley, president of ABA, about establishing a task force to examine this issue. The ABA council decided to broaden the mandate to include an examination of clients' right to effective behavioral treatment in general. The first editor was asked to chair the task force and appointed Saul Axelrod, Jon S. Bailey, Judith E. Favell, Richard M. Foxx, and O. Ivar Lovaas as members. Brian A. Iwata was appointed liaison by the ABA council.

behavior analysis association of michigan: Functional Analytic Psychotherapy Mavis Tsai, Robert J. Kohlenberg, Jonathan W. Kanter, Gareth I. Holman, Mary Plummer Loudon, 2012-03-12 How can I supercharge the therapy I currently use? This volume distills the core principles, methods, and vision of the approach. Each Functional Analytic Psychotherapy (FAP) principle is presented in terms of its intended purpose and is clearly linked to the underlying theory, thus providing clinicians with a straightforward guide for when and how to apply each technique. FAP embraces awareness, courage, and love as integral to the treatment process. Part I of this volume reviews the history of FAP and the basic behavioral principles on which it is based. Part II provides an easy to use step-by-step guide to the application of FAP techniques. FAP is an approach undergoing a renaissance, and this volume uniquely summarizes the full history, theory, and techniques of FAP, resulting in a handbook perfect for clinicians and graduate students with or without a behavioural background.

behavior analysis association of michigan: Investigating School Psychology Michael I. Axelrod, Stephen Hupp, 2024-06-03 Investigating School Psychology provides a fascinating exploration of the field of school psychology through the lens of pseudoscience and fringe science. Contributions from leaders in the fields of school psychology, clinical psychology, and education honor the role of science in the field while also exploring and guarding against the harms that pseudoscience can cause. School psychology and, more broadly, the field of education are particularly susceptible to pseudoscience, fads, and maintaining the status quo by resisting the adoption of new ideas. Using an exhaustive review of the current literature, this book discusses various concepts in school psychology that have been largely discredited and many practices that continue to exist with little to no scientific support. Each chapter helps differentiate between dubious and evidence-based approaches while providing a useful resource for practicing school psychologists and educators to distinguish between science and pseudoscience in their everyday work with children. The book's discussion of the harmful nature of pseudoscience in school psychology is inclusive of all students, such as students with disabilities, those diagnosed with neurodevelopmental disorders, those with academic problems, and all other children in schools. Investigating School Psychology is valuable supplemental reading in undergraduate and graduate courses in education and school psychology and is also a beneficial reference for practicing school psychologists to distinguish between science and pseudoscience in their practice.

behavior analysis association of michigan: Adapted Physical Education and Sport Joseph P. Winnick, 2011 This new edition is updated to keep you current with today's trends in adapted physical education and sport and new chapters, major chapters, revisions and an increased emphasis on best practise

behavior analysis association of michigan: Community Mental Health and

Behavioral-Ecology A.M. Jeger, R.S. Slotnick, 2012-12-06 This volume is addressed to professionals and students in community mental health-including researchers, clinicians, administrators, educators, and students in relevant specialities within the fields of psychology, psychiatry, social work, public health, and nursing. The intent of this book is to serve as a practical resource for professionals and also as a didactic text for students. In addition, the volume seeks to make a theoretical contribution to the field by presenting, for the first time in book form, a behavioral-ecological perspective in community mental health. We present behavioral-ecology as an emerging perspective that is concerned with the interdependence of people, behavior, and their sociophysical environments. Behavioral-ecology attributes mental health problems to transactions between persons and their settings, rather than to causes rooted exclusively within individuals or environments. In this volume we advance the notion of behavioral-ecology as an integration of two broad perspectives-behavioral approaches as derived from the individual psychology of learning, and ecological approaches as encompassing the study of communities, environments, and social systems. Through the programs brought together in this book we are arguing for a merging of these two areas for purposes of advancing theory, research, and practice in community mental health.

behavior analysis association of michigan: Correcting the Scholarly Record for Research Integrity M. V. Dougherty, 2018-11-09 This volume is the first book-length study on post-publication responses to academic plagiarism in humanities disciplines. It demonstrates that the correction of the scholarly literature for plagiarism is not a task for editors and publishers alone; each member of the research community has an indispensable role in maintaining the integrity of the published literature in the aftermath of plagiarism. If untreated, academic plagiarism damages the integrity of the scholarly record, corrupts the surrounding academic enterprise, and creates inefficiencies across all levels of knowledge production. By providing case studies from the field of philosophy and related disciplines, the volume exhibits that current post-publication responses to academic plagiarism are insufficient. It catalogues how humanities disciplines fall short in comparison with the natural and biomedical sciences for ensuring the integrity of the body of published research. This volume provides clarity about how to conceptualize the scholarly record, surveys the traditional methods for correcting it, and argues for new interventions to improve the reliability of the body of published research. The book is valuable not only to those in the field of philosophy and other humanities disciplines, but also to those interested in research ethics, meta-science, and the sociology of research.

behavior analysis association of michigan: International Review of Research in Mental Retardation, 1983-02-18 International Review of Research in Mental Retardation

behavior analysis association of michigan: Ethical Applied Behavior Analysis Models for Individuals Impacted by Autism Stephanie Peterson, Rebecca Eldridge, Betty Fry Williams, Randy Lee Williams, 2024-07-31 Ethical Applied Behavior Analysis Models for Individuals Impacted by Autism provides teachers, parents, and behavior analysts with a comprehensive analysis of evidence-based, behavior analytic programs for the therapeutic treatment of persons with autism, from infancy through adulthood. Chapters review the characteristics of autism spectrum disorder (ASD), behavior analytic concepts and interventions, and discuss the eight different effective treatment programs, examining each approach's scientific base and value. Fully updated to reflect current research and understanding of autism, this second edition includes new chapters on evaluating high-quality behavior analytic programs, as well as explorations of programs covering the verbal behavior approach and those specially designed for adults.

behavior analysis association of michigan: Behavior Science H. W. Reese, L. J. Parrott, 2014-02-24 First published in 1986. This volume presents a selection of 'advances' in the field of behaviour science in psychology. It can be used as a pick-up guide, with chapters arranged into three kinds of advances: theoretical or philosophical, empirical, and methodological. The preface includes a summary of each of the chapters which range from the role of theory in the behaviour analysis of private events, to the use of residential laboratories with programmed environments for the study of behaviours.

behavior analysis association of michigan: The Utilization of Classroom Peers as Behavior Change Agents Phillip S. Strain, 2013-11-11 Since the early 1800's, children have been taught and encouraged to function as instructional agents for their classroom peers. However, it was not until the last decade that peer-mediated intervention was studied in a rigorous, systematic fashion. The purpose of this edited volume is to provide an up-to-date and complete account of empirical research that addresses the general efficacy of classroom peers as behavior change agents. As a result of various social and legal developments, such as the passage of Public Law 94-142 and its accompanying demand for individualized instruction, peer-mediated interventions seem likely to proliferate. As I have noted elsewhere (Strain, this volume), close adherence to the principle of individualized programming has rendered obsolete the adults only model of classroom instruction. Whether the utilization of peers in the instructional process comes to be viewed by school personnel as a positive adjunct to daily classroom practices depends in large measure on our ability to carefully design, conduct, and communicate the findings of applied research. I trust that this volume will function both to accurately communicate existing findings and to stimulate further study. My colleagues who have generously contributed their time and skill to this volume have my deepest appreciation. They have performed their various tasks in a timely, professional manner and, in my opinion, have provided considerable insight into the problems and potentials of peers as instructional agents.
