big apple management nyc: Origin of New York City's Nickname "The Big Apple" Gerald Leonard Cohen, 1991 The monograph aims for a comprehensive look at the history of «The Big Apple», incorporating material that has come to light since the first edition of this work was published in 1991. The overall picture now is: Apples, always important, became especially so with the appearance of the Big Red Delicious Apple in Iowa, 1870's. «The Big Apple» therefore came to refer to somebody or something very important. In 1920 an African-American stablehand in New Orleans mentioned in conversation: «We's goin' to 'the big apple'» (NYC racetracks as the big time in horseracing). Turf writer John J. Fitz Gerald overheard this statement and adopted «The Big Apple» (1921ff.) in his columns, popularizing it to refer particularly to the NYC tracks. Secondly it could refer to big time horseracing in general. In the 1930's «The Big Apple» was picked up by black jazz musicians to designate NYC in general (and Harlem in particular) as the place where the greatest jazz in the world was being played. And in 1971 Charles Gillett revived «The Big Apple» as part of a public-relations campaign on behalf of NYC. Despite the increasingly clear picture of what happened, various incorrect etymologies have arisen about «The Big Apple». The monograph addresses and rejects them in some detail.

big apple management nyc: *Smarter New York City* André Corrêa d'Almeida, 2018-08-28

Innovation is often presented as being in the exclusive domain of the private sector. Yet despite widespread perceptions of public-sector inefficiency, government agencies have much to teach us about how technological and social advances occur. Improving governance at the municipal level is critical to the future of the twenty-first-century city, from environmental sustainability to education, economic development, public health, and beyond. In this age of acceleration and massive migration of people into cities around the world, this book explains how innovation from within city agencies and administrations makes urban systems smarter and shapes life in New York City. Using a series of case studies, *Smarter New York City* describes the drivers and constraints behind urban innovation, including leadership and organization; networks and interagency collaboration; institutional context; technology and real-time data collection; responsiveness and decision making; and results and impact. Cases include residential organic-waste collection, an NYPD program that identifies the sound of gunshots in real time, and the Vision Zero attempt to end traffic casualties, among others. Challenging the usefulness of a tech-centric view of urban innovation, *Smarter New York City* brings together a multidisciplinary and integrated perspective to imagine new possibilities from within city agencies, with practical lessons for city officials, urban planners, policy makers, civil society, and potential private-sector partners.
