big ideas for business: The Big Idea Robert Jones, 2011-05-26 Today's marketplace is a war of ideas. Unless you stand for something you won't stand out. Nowadays anyone can copy your product, or even your business model. What they can't copy is your worldview, your attitude, your special way of doing things. So the war in the marketplace will be a war of ideas. The Big Idea maps this new territory and shows how big ideas make great companies. Unlike business models or the catchphrases of management gurus, a big idea is emotional. And unlike corporate ideologies, vision or brand, it is shared between customers and employees alike. Companies who have distinguished themselves with a big idea include: Virgin (not British Airways) John Lewis (not Debenhams) Apple (not IBM) Ikea (not MFI) Orange (not Cellnet) Customers don't just buy from these companies, they buy into them - they choose them not through economic logic, but emotional logic. As products and services become more and more similar, emotional logic will become the single most important

business driver. The benefits of appealing to it can already be seen: Orange has a much lower turnover of customers than Cellnet and Ikea operates in over 23 countries while MFI only does business in Britain. A big idea isn't just a cute thing to have: it's the spark that makes places thrive while others just exist.

big ideas for business: *Big Ideas in Education* Dr Russell Grigg, 2016-06-02 *Big Ideas in Education: What Every Teacher Should Know* by Dr Russell Grigg provides an accessible and easily understood introductory guide to the big ideas that really matter in education. The teaching profession is saturated with ideas. Unfortunately, some of these are half-baked or fundamentally flawed. Dr Russell Grigg moves beyond the unhelpful supposed dichotomies that pervade current educational thinking child-centred versus teacher-centred, traditional versus progressive. Throughout the book, readers are invited to question assumptions and popular rhetoric and reflect on their own experiences. *Big Ideas in Education* aims to equip teachers with a good understanding of current thinking in a diverse, fluid and dynamic field. Each of the big ideas is discussed within the framework of four questions: what is the big idea, who is behind it, why is it important and what can you do? Big ideas are important, distinctive, empowering, adaptable and simple to understand. Dr Russell Grigg provides readers with a concise and reliable introduction to twelve such ideas, which are at the core of educational practice. The ideas chosen are general rather than subject-specific in nature. In turn, they invite the reader to look at teaching in wider society, address elements of learning which teachers actively promote, raise questions about why, how and what to teach and, finally, look at ways of improving the quality of education. The twelve big ideas under discussion are: (1.) Education education goes beyond the school gates and is a lifelong experience. (2.) Childhood children need time and space to explore, enjoy learning and develop as children rather than miniature adults. (3.) Knowledge knowledge is the foundation for learning. (4.) Skills learners need to develop a broad range of skills in real-life, relevant contexts. (5.) Dispositions effective learning depends upon cultivating positive dispositions. (6.) Ethics teachers' conduct should be guided by a moral purpose. (7.) Instruction direct instruction is a tried-and-tested means of effective teaching. (8.) Curriculum the curriculum is all the learning and assessment activities in school, both planned and unintentional, that contribute to agreed educational goals. (9.) Feedback providing personalised, accurate, specific and timely feedback is one of the keys to improving learning. (10.) Reflective practice good teachers critically analyse their practice with a view to improving what they do. (11.) Research research has a central role to play in the professional development of teachers. (12.) Professional leadership effective school leadership operates at all levels and is about shared vision, support and securing improvement. An ideal book for busy teachers who need to be kept up to speed with the latest thinking in education, this comprehensive guide provides the essential knowledge to keep you fully informed, whether leading staff discussions, submitting assignments or preparing for interviews. big ideas for business: *Disruptive Business* Alexander Manu, 2016-05-23 *Disruptive Business* is a provocative and insightful redefinition of innovation as an outcome of human behaviour, a dynamic in constant change requiring the shaping of new responses in business and the economy. Alexander Manu believes that organizations must treat innovation not as a process to be managed but as an outcome that changes people's lives. In *Disruptive Business* he explains how innovation is the moment when human behaviour is changed by a particular invention, discovery or event. This position challenges the current understanding of innovation, as well as the current ecology in which innovation operates in organizations: its management, methods, tools, language, focus and metrics. The challenge extends to some of the labels currently applied to innovation typologies, such as 'disruptive innovation', seen today as addressing purely the technological side of an invention, rather than the more complex motivational and behavioural side. Alexander Manu considers that a disruption is not manifest in the moment a new technology is introduced. The disruption is the human being and manifest only when human motivation embraces the technology and uses it to modify and improve everyday life. Our acceptance and appropriation of new technologies creates the business disruption. Manu makes the case that successful innovation outcomes are answers to conscious or subconscious goals residing in human motivation, and motivation starts in desire. This position is consistent with the history of innovations that have changed, improved and reshaped human life, and also consistent with their roots and ethos. Humans are a 'perpetually wanting animal', bound to desire, to seek media for a better self and to need innovation. In this dynamic, innovation is the constant and business is the variable. The role of business is to create the tools, objects and services through which people can manifest what they want and who they are. The book provides a new perspective of current behavioural disruptions which are relevant to the continuity of business, as well as a set of practical methodologies for business design, aimed at creating

innovation outcomes of value to users.
