biggest upset in euros history: All Data Are Local Yanni Alexander Loukissas, 2019-04-30
How to analyze data settings rather than data sets, acknowledging the meaning-making power of the local. In our data-driven society, it is too easy to assume the transparency of data. Instead, Yanni Loukissas argues in *All Data Are Local*, we should approach data sets with an awareness that data are created by humans and their dutiful machines, at a time, in a place, with the instruments at hand, for audiences that are conditioned to receive them. The term data set implies something discrete, complete, and portable, but it is none of those things. Examining a series of data sources important for understanding the state of public life in the United States—Harvard's Arnold Arboretum, the Digital Public Library of America, UCLA's Television News Archive, and the real estate marketplace Zillow—Loukissas shows us how to analyze data settings rather than data sets. Loukissas sets out six principles: all data are local; data have complex attachments to place; data are collected from heterogeneous sources; data and algorithms are inextricably entangled; interfaces recontextualize data; and data are indexes to local knowledge. He then provides a set of practical guidelines to follow. To make his argument, Loukissas employs a combination of qualitative research on data cultures and exploratory data visualizations. Rebutting the “myth of digital universalism,” Loukissas reminds us of the meaning-making power of the local.

biggest upset in euros history: Implications of the Euro Mark Baimbridge, Brian Burkitt, Philip Whyman, 2006-05-02 To date, critical analysis of the EMU project has largely been advanced from the centre-right spectrum of British politics. Comparable questions from the centre-left have failed to find a coherent voice. Although, the European fault-line cannot be characterized as a neat Left-Right issue there are noticeable divisions in opinion across British business, the trade union movement and within the Labour Party. Offering a unique insight into this key debate from the 'centre-left', eurosceptic view point, this book provides a rigorous analysis of all the salient economic and political issues of concern, such as: * the economics of a single currency * employment and social implications * sovereignty * political determination. The arguments presented in this volume highlight the emergence of a coherent alternative to deepening economic integration as a platform to build a just and equitable society. Contributions are drawn from leading academics, trade union leaders and prominent politicians, both from the Labour Party and the wider progressive Left in British politics. This informative and thought provoking book will be indispensable reading for students and practitioners in economics, politics and international relations, as well as those interested in this highly contentious topic.

biggest upset in euros history: American Journalism and International Relations

Giovanna Dell'Orto, 2013-03-29 American Journalism and International Relations argues that the American press' disengagement from world affairs has critical repercussions for American foreign policy. Giovanna Dell'Orto shows that discourses created, circulated, and maintained through the media mold opinions about the world and shape foreign policy parameters. This book is a history of U.S. foreign correspondence from the 1840s to the present, relying on more than 2,000 news articles and twenty major world events, from the 1848 European revolutions to the Mumbai terror attacks in 2008. Americans' perceptions of other nations, combined with pervasive and enduring understandings of the United States' role in global politics, act as constraints on policies. Dell'Orto finds that reductive media discourse (as seen during the 1967 War in the Middle East or Afghanistan in the 1980s) has a negative effect on policy, whereas correspondence grounded in events (such as during the Japanese attack on Shanghai in the 1930s or the dissolution of the Soviet Union in 1991) fosters effective leadership and realistic assessments.

biggest upset in euros history: Positive Pupil Management and Motivation Eddie

McNamara, 2014-03-05 First Published in 2000. In 1988 a major inquiry into the difficulties in managing adolescent behaviour was instigated by the Government under the chairmanship of Lord Elton. The report, known as the Elton Report on Discipline in Schools was published in 1989. At dissemination conferences the view was put forward that to aim to totally eliminate problematic pupils was unrealistic - a more realistic aim was to 'marginalise' the problem(s) i.e. to have effective school systems in place to respond to pupil misbehaviour so that problems of pupil discipline could be handled comfortably and not dominate the school's agenda. Starting with the findings of the Elton Report this book explores the identified causes of problem behaviour: emotional disturbance, home background, classroom factors and school system factors and then offers practical advice on how to manage them.

biggest upset in euros history: Language, Religion and National Identity in Europe and the Middle East John Myhill, 2006-01-01 This book discusses the historical record of the idea that language is associated with national identity, demonstrating that different applications of this idea have consistently produced certain types of results. Nationalist movements aimed at 'unification', based upon languages which vary greatly at the spoken level, e.g. German, Italian, Pan-Turkish and Arabic, have been associated with aggression, fascism and genocide, while those based upon relatively homogeneous spoken languages, e.g. Czech, Norwegian and Ukrainian, have resulted in

national liberation and international stability. It is also shown that religion can be more important to national identity than language, but only for religious groups which were understood in premodern times to be national rather than universal or doctrinal, e.g. Jews, Armenians, Maronites, Serbs, Dutch and English; this is demonstrated with discussions of the Holocaust, the Armenian Genocide, the civil war in Lebanon and the breakup of Yugoslavia, the United Netherlands and the United Kingdom.

biggest upset in euros history: **An Ethic of Hospitality** Emily Jeptepkeny Choge, 2020-07-30
In our increasingly xenophobic world, countries are turning away refugees and immigrants. Based on the situation in Kenya, this book offers a countercultural ethic of hospitality and welcome to the stranger, an ethic fraught with dangers and yet filled with great opportunities for transforming our world. Drawing on the scriptural pilgrim motif and specifically on the book of Hebrews, this study paints a picture of refugees not only as needy strangers to be herded into camps, but as brothers and sisters who bring with them treasures and talents that can enrich our understanding of our Christian identity and mission as pilgrims in the world. The hospitality practice seen in Hebrews offers hope and promise not only for refugees themselves but also for the pilgrim church. Like the ancient heroes of faith portrayed in Hebrews, we too live as pilgrims and aliens who await with hope the city whose architect and founder is God. Refugees in fact teach us how to live our pilgrim identity: they become teachers not only for the church in Kenya but also for the body of Christ worldwide.
