crayola construction paper shapes: **HORSENECK** B. K. Smith, 2016-11-03 I finally detached with the understanding that people cannot give to you what they don't have. I am not feeling the love because... And because of what was probably this unsatisfied need for affection, I have a history of trusting complete strangers, some of whom have, to their credit, risen to the occasion by displaying the kindness thus expected of others at the eleventh hour. I made friends easily. One day, impelled by mutual attraction, or curiosity, you strike up a conversation and discover shared interests and a new friendship is born. You try to live the same hopes and dreams, feeling at ease, even happy, and this friendship becomes part of your life, a little bit like family. Then treachery strikes and a great desolate wind sweeps away those dreams. Wounded and angry, you wish you were dead for ever thinking or believing and falling for it again. Then other similar mirages appear on the horizon, as you walk in your own landscape, and you rise to the occasion once again, and you are disappointed once again, and one fine day all that is left of your spirit is a tiny scar on your heart no bigger than a fingernail scratch. You no longer feel anything either. You no longer care. Only many years later, only when I had given myself passively to this lovelessness in the conviction that I had metamorphosed from a loveless childhood to the adulthood of more of the same, disappointment, betrayal and loss. Only with this wisdom had I come to believe in nothing, and only then was I surprised by love. What is the meaning of ordeal? You'll know it when you know it. This book contains Papier Mache Bowls - Vessels of Grieving. 42 full-color photographs, The creative meaning of ordeal.

crayola construction paper shapes: Trauma Informed Teaching through Play Art Narrative (PAN) Karen O. Wallace, Patrick J. Lewis, 2020-06-02 Trauma affects the lives of many children who we teach in school. It effects the students, teachers who teach them, the administration, and the school community as it is part of the school environment and culture. Teachers and administrators have great potential to set up an environment and adopt an attitude that can help heal the trauma in the lives of their students. Schools need to become trauma-informed to be able to provide for the growing number of refugee children who have experienced terrorism, crime, war, and abuse, to better help some Indigenous children who due to systemic racism and discriminatory policies have been traumatised and live daily with trauma, and the growing number of all children who have experienced various kinds of trauma during their life span. Trauma informed schools means that all students can feel safe enough to learn, succeed academically and thrive after having undergone a traumatic event. Trauma Informed Teaching demonstrates how Play Art Narrative (PAN) can be instrumental in creating trauma informed schools. The authors provide play, art, and narrative techniques and activities that educators can use to safely work therapeutically with traumatised children and youth.
