craigslist long island business for sale: *An Internet for the People* Jessa Lingel, 2022-06-14

How craigslist champions openness, democracy, and other vanishing principles of the early web Begun by Craig Newmark as an e-mail to some friends about cool events happening around San Francisco, craigslist is now the leading classifieds service on the planet. It is also a throwback to the early internet. The website has barely seen an upgrade since it launched in 1996. There are no banner ads. The company doesn't profit off your data. An Internet for the People explores how people use craigslist to buy and sell, find work, and find love—and reveals why craigslist is becoming a lonely outpost in an increasingly corporatized web. Drawing on interviews with craigslist insiders and ordinary users, Jessa Lingel looks at the site's history and values, showing how it has mostly stayed the same while the web around it has become more commercial and far less open. She examines craigslist's legal history, describing the company's courtroom battles over issues of freedom of expression and data privacy, and explains the importance of locality in the social relationships fostered by the site. More than an online garage sale, job board, or dating site, craigslist holds vital lessons for the rest of the web. It is a website that values user privacy over profits, ease of use over slick design, and an ethos of the early web that might just hold the key to a more open, transparent, and democratic internet.

craigslist long island business for sale: *You Are What You Risk* Michele Wucker, 2021-04-06 The #1 international bestselling author of *The Gray Rhino* offers a bold new framework for understanding and re-shaping our relationship with risk and uncertainty to live more productive and successful lives. What drives a sixty-four-year-old woman to hurl herself over Niagara Falls in a barrel? Why do we often create bigger risks than the risks we try to avoid? Why are corporate boards newly worried about risky personal behavior by CEOs? Why are some nations quicker than others to recognize and manage risks like pandemics, technological change, and climate crisis? The answers define each person, organization, and society as distinctively as a fingerprint.

Understanding the often-surprising origins of these risk fingerprints can open your eyes, inspire new habits, catalyze innovation and creativity, improve teamwork, and provide a beacon in a world that seems suddenly more uncertain than ever. How you see risk and what you do about it depend on your personality and experiences. How you make these cost-benefit calculations depend on your culture, your values, the people in the room, and even unexpected things like what you've eaten recently, the temperature, the music playing, or the fragrance in the air. Being alert to these often-unconscious influences will help you to seize opportunity and avoid danger. *You Are What You Risk* is a clarion call for an entirely new conversation about our relationship with risk and uncertainty. In this ground-breaking, accessible and eminently timely book, Michele Wucker examines why it's so important to understand your risk fingerprint and how to make your risk relationship work better in business, life, and the world. Drawing on compelling risk stories around the world and weaving in economics, anthropology, sociology, and psychology research, Wucker bridges the divide between professional and lay risk conversations. She challenges stereotypes about risk attitudes, re-frames how gender and risk are related, and shines new light on generational differences. She shows how the new science of "risk personality" is re-shaping business and finance, how healthy risk ecosystems support economies and societies, and why embracing risk empathy can resolve conflicts. Wucker shares insights, practical tools, and proven strategies that will help you to understand what makes you who you are –and, in turn, to make better choices, both big and small.

Zona Norte: The Post-Structural Body of Erotic Dancers and Sex Workers in Tijuana, San Diego and Los Angeles: An Auto/ethnography of Desire and Addiction started out as an ethnographic study of prostitution on both sides of the U.S./Mexican border and, as cultural anthropologist Michael Hemmingson explains, turned inward as a study of the self, or what is referred to as "auto/ethnography" in today's lexicon of qualitative research. The author studies himself within the culture of the Other -- he examines his feelings, memories, and reactions as he conducts his participant observations and interviews in the field, questioning why he chose to research erotic and exotic dancers, strippers, hookers, and various sex workers on both sides of an international border, revealing how the subjects are alike, and how they are different, and how they survive in their worlds. Auto/ethnography is one of the fastest growing and popular sub-fields in sociology, anthropology, and communications today. Books and anthologies are widely published, special journal issues appear each year on the subject, and there are an increasing number of dissertations in all fields of qualitative research cropping up from universities in the United States, Great Britain, Germany, Australia, and New Zealand. Zona Norte is the latest contribution to this vibrant new approach to living the ethnographic life, as both a scholar and autobiographer.
