

crash course psychology 35

crash course psychology 35 offers a concise yet comprehensive overview of critical psychological concepts, theories, and applications. This installment in the crash course psychology series delves into advanced topics that are essential for a deeper understanding of human behavior and mental processes. Covering areas such as cognitive psychology, developmental psychology, and mental health, this course segment is designed to provide learners with a robust foundation in psychological science. Whether you are a student preparing for exams or an enthusiast aiming to expand your knowledge, crash course psychology 35 delivers clear explanations and practical insights. The content emphasizes evidence-based information, ensuring relevance for academic and professional contexts. This article will guide you through the main themes of the course, highlighting key ideas and frameworks that shape contemporary psychology.

- Overview of Cognitive Psychology
- Developmental Psychology and Lifespan Changes
- Mental Health and Psychological Disorders
- Research Methods in Psychology
- Applications of Psychological Principles

Overview of Cognitive Psychology

Cognitive psychology, a central focus of crash course psychology 35, investigates internal mental processes such as perception, memory, language, problem-solving, and decision-making. This branch of psychology seeks to understand how people acquire, process, and store information. It integrates experimental methods to explore how the mind works, contributing to areas like artificial intelligence and education.

Perception and Attention

Perception refers to the process by which sensory information is interpreted to form a meaningful experience of the world. Attention is the cognitive mechanism that selects specific stimuli for focused processing while filtering out others. The study of perception and attention explains how individuals navigate complex environments efficiently.

Memory Systems

Memory is a multifaceted system critical to learning and behavior. Crash course psychology 35 emphasizes distinctions between short-term memory, long-term memory, and working memory. Understanding encoding, storage, and retrieval processes helps clarify how memories are formed and why forgetting occurs.

Language and Thought

Language is a unique cognitive ability that enables communication and abstract thinking. This section explores the relationship between language acquisition and cognitive development. Theories of linguistic relativity and the role of syntax and semantics are analyzed to explain how language shapes thought processes.

Developmental Psychology and Lifespan Changes

Developmental psychology examines the physical, cognitive, and social changes that occur throughout the human lifespan. Crash course psychology 35 covers key stages from infancy to adulthood, focusing on how experiences and biology interact to influence growth and behavior.

Stages of Development

This subtopic outlines the major developmental phases including infancy, childhood, adolescence, and adulthood. Each stage is characterized by specific milestones in motor skills, language acquisition, and emotional regulation.

Theories of Development

Prominent developmental theories are discussed, such as Piaget's cognitive development stages, Erikson's psychosocial stages, and Vygotsky's sociocultural theory. These frameworks provide insight into how individuals adapt and learn within their environments.

Attachment and Social Development

Attachment theory explains the emotional bonds formed between infants and caregivers, which significantly impact social and emotional development. Crash course psychology 35 explores different attachment styles and their implications for relationships later in life.

Mental Health and Psychological Disorders

This section addresses the prevalence, classification, and treatment of psychological disorders. Emphasizing a scientific approach, crash course psychology 35 reviews diagnostic criteria and therapeutic interventions used within clinical psychology.

Classification of Disorders

The Diagnostic and Statistical Manual of Mental Disorders (DSM) serves as the primary tool for categorizing mental health conditions. Disorders covered include anxiety disorders, mood disorders, schizophrenia, and personality disorders.

Causes and Risk Factors

Mental health issues arise from a complex interplay of genetic, environmental, and psychological factors. Understanding these causes aids in developing prevention strategies and personalized treatments.

Therapeutic Approaches

Various treatment modalities are explored, including cognitive-behavioral therapy (CBT), psychodynamic therapy, and pharmacological interventions. The importance of evidence-based practice in improving patient outcomes is emphasized.

Research Methods in Psychology

Scientific methodology underpins all psychological inquiry. Crash course psychology 35 highlights essential research designs and statistical techniques used to test hypotheses and validate theories.

Experimental Design

Controlled experiments, including independent and dependent variables, random assignment, and control groups, are fundamental to establishing cause-and-effect relationships in psychology.

Correlational and Observational Studies

These methods examine relationships between variables without manipulation, providing insights into naturalistic behaviors and associations relevant for

further experimental research.

Ethical Considerations

Ethics in psychological research ensure the protection of participants' rights and welfare. Key principles include informed consent, confidentiality, and minimizing harm.

Applications of Psychological Principles

Crash course psychology 35 illustrates how psychological theories and research apply to real-world settings, enhancing various sectors such as education, workplace, and health care.

Educational Psychology

Applying cognitive and developmental insights improves teaching methods, curriculum design, and student motivation, fostering effective learning environments.

Industrial-Organizational Psychology

This branch focuses on employee behavior, workplace productivity, and organizational development, using psychological principles to optimize human resources and job satisfaction.

Health Psychology

Health psychology examines how psychological factors influence physical health and illness. Interventions promoting healthy behaviors and managing chronic conditions are key areas of focus.

- Understanding mental processes and behavior
- Developmental milestones across the lifespan
- Classification and treatment of psychological disorders
- Scientific research methods and ethics
- Practical applications in education, work, and health

Frequently Asked Questions

What topics are covered in Crash Course Psychology episode 35?

Crash Course Psychology episode 35 covers the topic of psychological disorders, including their classification, symptoms, and approaches to treatment.

Who hosts Crash Course Psychology series, including episode 35?

Crash Course Psychology is hosted by Hank Green, who provides engaging explanations of psychological concepts throughout the series.

How does Crash Course Psychology episode 35 explain the classification of psychological disorders?

Episode 35 explains the classification of psychological disorders by discussing the DSM-5, its criteria for diagnosis, and the importance of categorizing disorders to guide treatment.

What treatment methods are highlighted in Crash Course Psychology episode 35?

The episode highlights treatment methods such as psychotherapy, medication, and alternative approaches like cognitive-behavioral therapy and behavioral interventions.

Why is understanding psychological disorders important according to Crash Course Psychology episode 35?

Understanding psychological disorders is important because it reduces stigma, promotes empathy, and helps individuals seek appropriate treatment to improve mental health.

Additional Resources

1. *"Thinking, Fast and Slow"* by Daniel Kahneman

This book explores the dual systems of thought that drive the way we think: the fast, intuitive, and emotional system, and the slower, more deliberate, and logical system. Kahneman delves into cognitive biases, decision-making processes, and how these systems influence our judgments. It provides valuable insights into human psychology that complement many topics covered

in Crash Course Psychology.

2. *"The Man Who Mistook His Wife for a Hat" by Oliver Sacks*

Oliver Sacks presents a collection of fascinating case studies about patients with neurological disorders. The book offers deep insights into brain function, perception, and identity, highlighting the complexities of the human mind. It is a compelling read for those interested in neuropsychology and abnormal psychology.

3. *"Influence: The Psychology of Persuasion" by Robert B. Cialdini*

Cialdini's book examines the key principles behind why people say "yes" and how to apply these principles ethically. Covering topics such as reciprocity, commitment, social proof, and authority, it explains fundamental concepts in social psychology. This book is particularly useful for understanding persuasion and compliance techniques.

4. *"Quiet: The Power of Introverts in a World That Can't Stop Talking" by Susan Cain*

Susan Cain explores the strengths and challenges of introverts in a predominantly extroverted society. The book discusses personality psychology, social behavior, and how introverts contribute uniquely to workplaces and relationships. It offers a balanced perspective on personality traits and their social implications.

5. *"The Psychopath Test: A Journey Through the Madness Industry" by Jon Ronson*

Jon Ronson investigates the nature of psychopathy and the mental health industry through engaging storytelling and interviews. The book sheds light on personality disorders, diagnosis, and the ethics of labeling individuals. It is an insightful and entertaining exploration of abnormal psychology.

6. *"Drive: The Surprising Truth About What Motivates Us" by Daniel H. Pink*

Pink delves into the science of motivation, challenging traditional views about what drives human behavior. The book emphasizes autonomy, mastery, and purpose as critical factors in motivation rather than external rewards. It aligns well with psychological theories of motivation and behavior covered in Crash Course Psychology.

7. *"Flow: The Psychology of Optimal Experience" by Mihaly Csikszentmihalyi*

This book introduces the concept of "flow," a state of deep immersion and engagement in activities. Csikszentmihalyi explains how achieving flow leads to happiness and improved performance. It offers valuable insights into positive psychology and human well-being.

8. *"Man's Search for Meaning" by Viktor E. Frankl*

Written by a Holocaust survivor and psychiatrist, this book explores the pursuit of meaning as a fundamental human drive. Frankl's logotherapy approach highlights resilience, purpose, and psychological healing. It provides profound lessons on coping with suffering and finding meaning in life.

9. "Social: Why Our Brains Are Wired to Connect" by Matthew D. Lieberman
Lieberman presents research on social neuroscience, explaining how our brains are fundamentally designed to interact with others. The book covers topics such as social pain, empathy, and the importance of relationships for mental health. It complements the social psychology concepts discussed in Crash Course Psychology.

crash course psychology 35: *Applied Cognitive Behavioral Therapy in Schools* Diana Joyce-Beaulieu, Brian A. Zaboski, 2021 *Applied Cognitive Behavioral Therapy in Schools* is a primarily a textbook for students and beginning practitioners looking to implement CBT to address common problems experienced by school-aged youth, such as anxiety, depression, or emotion dysregulation. Presenting an accessible overview of CBT from beginning to end, the volume features printable handouts, and includes realistic case studies that review and illustrate the use of skills presented in each chapter.

crash course psychology 35: *Everyday Resilience* Michelle Mitchell, 2019-04-05 *Everyday Resilience* is about developing our children's resilience muscle in the everyday moments of life, so when the big challenges arrive they are ready. The way our children handle 'small knocks' is crucial, as it will be the foundation for much bigger things. Parents have an opportunity to see each small knock as a teachable moment to build resilience and help kids deal with the increasing challenges of friendship issues, academic pressure and the self-doubt they experience on a daily basis. Our children can 'have it all' and still be ill-prepared to handle life's challenges. Despite the posters on our school's walls and the endless research on resilience, there has been a significant rise in mental illness over the past five years. For many of our young ones, resilience is much easier to talk about than put into practise. In this book Michelle shows every family how they can cultivate resilience in their children or adolescents by focussing on 7 key traits – courage, gratitude, empathy, self-awareness, responsibility, self-care and contribution. She answers questions like: How can I help my child be more confident? What do I say when my child is rejected by friends? How do I help a child who is struggling academically? What do I say when my child says, "I can't"? How do I help an anxious or shy child find their voice? What can I do to help them discover their potential? As a teacher, and founder of Youth Excel, Michelle has witnessed first-hand what works. Using every day scenarios and how-to actions, Michelle explains resilience in a way that will relate to every family. Her practical tone, humour and hands on experience provide every parent with tools to nurture strength in young lives.

crash course psychology 35: *Crash Course in Collection Development* Wayne Disher, 2023-06-15 The third edition of *Crash Course in Collection Development* is a must-have for librarians just entering the field and professionals in need of a refresher in effective library operations. It now covers all aspects of collection development and management - including inventory assessment, market analysis, budgeting, marketing, and customer service - in all library environments including public, academic, and school libraries. Focusing on collection development basics, it begins with information on gathering statistics and analyzing community needs to design a collection that meets

user needs. It goes on to guide users in writing a collection development policy, budgeting, selecting materials, managing vendor relations, understanding the publishing industry, merchandising and promoting the collection, and handling complaints. Newly included in the third edition is a discussion of new purchasing and lending models; information for academic and school librarians; and such new trends as libraries as spaces for users, collection diversity issues, makerspaces, nontraditional collections, pop-up libraries, the digital divide, and noncirculating collections. Author Wayne Disher has once again written a practical and simple introduction to an important, complex, and evolving area of library service.

crash course psychology 35: Posttraumatic Stress Guida D. Kume, 2006 Post-traumatic Stress Disorder, or PTSD, is a psychiatric disorder that can occur following the experience or witnessing of life-threatening events such as military combat, natural disasters, terrorist incidents, serious accidents, or violent personal assaults like rape. People who suffer from PTSD often relive the experience through nightmares and flashbacks, have difficulty sleeping, and feel detached or estranged, and these symptoms can be severe enough and last long enough to significantly impair the person's daily life. PTSD is marked by clear biological changes as well as psychological symptoms. PTSD is complicated by the fact that it frequently occurs in conjunction with related disorders such as depression, substance abuse, problems of memory and cognition, and other problems of physical and mental health. The disorder is also associated with impairment of the person's ability to function in social or family life, including occupational instability, marital problems and divorces. PTSD is associated with a number of distinctive neurobiological and physiological changes. PTSD can be treated by a variety of forms of psychotherapy and drug therapy.

crash course psychology 35: Teacher Transition into Innovative Learning Environments Wesley Imms, Thomas Kvan, 2020-11-30 This open access book focuses on how the design and use of innovative learning environments can evolve as teaching practices and education policies change. It addresses how these new environments are used, how teachers are adapting their practices, the challenges that these changes pose, and the effective evaluation of these changes. The book reports on emerging research in learning environments, with a particular emphasis on how teachers are transitioning from traditional classrooms to innovative learning environments. It offers a significant evidence-based global assessment of current research in this field by designers, architects, educators and policy makers. It presents twenty-five cutting-edge projects from researchers in fifteen countries. Thanks to the book's comprehensive international perspective, which combines theory and practice in a single publication, readers will gain a wealth of new insights.

crash course psychology 35: Teaching AI Michelle Zimmerman, 2018-10-13 Get the tools, resources and insights you need to explore artificial intelligence in the classroom and explore what students need to know about living in a world with AI. For many, artificial intelligence, or AI, may seem like science fiction, or inherently overwhelming. The reality is that AI is already being applied in industry and, for many of us, in our daily lives as well. A better understanding of AI can help you make informed decisions in the classroom that will impact the future of your students. Drawing from a broad variety of expert voices from countries including Australia, Japan, and South Africa, as well as educators from around the world and underrepresented student voices, this book explores some of the ways AI can improve education. These include educating learners about AI, teaching them about living in a world where they will be surrounded by AI and helping educators understand how they can use AI to augment human ability. Each chapter offers activities and questions to help you deepen your understanding, try out new concepts and reflect on the information presented. Links to media artifacts from trusted sources will help make your learning experience more dynamic while also providing additional resources to use in your classroom. This book: Offers a unique approach to the topic, with chapter opening scenes, case studies, and featured student voices. Discusses a variety of ways to teach students about AI, through design thinking, project-based learning and STEM connections. Includes lesson ideas, activities and tools for exploring AI with your students. Includes references to films and other media you can use in class to start discussions on AI or

inspire design thinking and STEM projects. In Teaching AI, you'll learn what AI is, how it works and how to use it to better prepare students in a world with increased human-computer interaction.

Audience: K-12 educators, tech coordinators, teacher educators

crash course psychology 35: The GCSE Mindset Steve Oakes, Martin Griffin, 2018-02-15 The GCSE Mindset: 40 activities for transforming student commitment, motivation and productivity, written by Steve Oakes and Martin Griffin, offers a wealth of concrete, practical and applicable tools designed to supercharge GCSE students' resilience, positivity, organisation and determination. At a time when GCSE teaching can feel like a conveyor belt of micromanaged lessons and last-ditch interventions, Steve and Martin acclaimed authors of The A Level Mindset suggest a different approach, underpinned by their VESPA model of essential life skills: vision, effort, systems, practice and attitude. These five non-cognitive characteristics beat cognition hands down as predictors of academic success, and in The GCSE Mindset Steve and Martin take this simple model as their starting point and present a user-friendly month-by-month programme of activities, resources and strategies that will help students break through barriers, build resilience, better manage their workload and ultimately release their potential both in the classroom and beyond. The book's forty activities, while categorised thematically under the VESPA umbrella, have been sequenced chronologically by month in order to better chart the student's journey through the academic year and to help them navigate the psychological terrain ahead. Each activity can be delivered one-to-one, to a tutor group or to a whole cohort, has been designed to take fifteen to twenty minutes to complete, and has been written with a pupil audience in mind. However, to complement the tasks' practical utility, the authors also explore the underpinning research and theory including the pioneering work of Angela Duckworth, Dr Steve Bull and Carol Dweck in more detail in the introduction to each section. Informed by the authors' collective thirty-plus years of teaching and coaching, this essential handbook for GCSE success also suggests key coaching questions and interventions for use with pupils and includes expert guidance on how schools can implement and audit the core components and outcomes of the VESPA approach in their own settings. Additionally and indeed pertinently in the present educational environment where empirical data is valued so highly the book features a chapter dedicated to the measurement of mindset, written by guest contributors Dr Neil Dagnall and Dr Andrew Denovan from Manchester Metropolitan University. They present the twenty-eight-item VESPA questionnaire, which they helped Steve and Martin to design, and take the reader through the research process behind its origins before going on to describe how it can be used to identify areas for development and to measure the impact of interventions. Suitable for teachers, tutors and parents who want to boost 14 to 16-year-olds' academic outcomes and equip them with powerful tools and techniques in preparation for further education and employment

crash course psychology 35: Teaching at Its Best Linda B. Nilson, 2010-04-20 Teaching at Its Best This third edition of the best-selling handbook offers faculty at all levels an essential toolbox of hundreds of practical teaching techniques, formats, classroom activities, and exercises, all of which can be implemented immediately. This thoroughly revised edition includes the newest portrait of the Millennial student; current research from cognitive psychology; a focus on outcomes maps; the latest legal options on copyright issues; and how to best use new technology including wikis, blogs, podcasts, vodcasts, and clickers. Entirely new chapters include subjects such as matching teaching methods with learning outcomes, inquiry-guided learning, and using visuals to teach, and new sections address Felder and Silverman's Index of Learning Styles, SCALE-UP classrooms, multiple true-false test items, and much more. Praise for the Third Edition of Teaching at Its Best Everyone veterans as well as novices will profit from reading Teaching at Its Best, for it provides both theory and practical suggestions for handling all of the problems one encounters in teaching classes varying in size, ability, and motivation. Wilbert McKeachie, Department of Psychology, University of Michigan, and coauthor, McKeachie's Teaching Tips This new edition of Dr. Nilson's book, with its completely updated material and several new topics, is an even more powerful collection of ideas and tools than the last. What a great resource, especially for beginning teachers

but also for us veterans! L. Dee Fink, author, *Creating Significant Learning Experiences* This third edition of *Teaching at Its Best* is successful at weaving the latest research on teaching and learning into what was already a thorough exploration of each topic. New information on how we learn, how students develop, and innovations in instructional strategies complement the solid foundation established in the first two editions. Marilla D. Svinicki, Department of Psychology, The University of Texas, Austin, and coauthor, *McKeachie's Teaching Tips*

crash course psychology 35: *The Cambridge Handbook of Technology and Employee Behavior* Richard N. Landers, 2019-02-14 Experts from across all industrial-organizational (IO) psychology describe how increasingly rapid technological change has affected the field. In each chapter, authors describe how this has altered the meaning of IO research within a particular subdomain and what steps must be taken to avoid IO research from becoming obsolete. This Handbook presents a forward-looking review of IO psychology's understanding of both workplace technology and how technology is used in IO research methods. Using interdisciplinary perspectives to further this understanding and serving as a focal text from which this research will grow, it tackles three main questions facing the field. First, how has technology affected IO psychological theory and practice to date? Second, given the current trends in both research and practice, could IO psychological theories be rendered obsolete? Third, what are the highest priorities for both research and practice to ensure IO psychology remains appropriately engaged with technology moving forward?

crash course psychology 35: *Reflections from Pioneering Women in Psychology* Jamila Bookwala, Nicky J. Newton, 2022-04-14 Records the academic paths of ground-breaking women psychologists in their own words: their triumphs, decisions, obstacles, and legacies.

crash course psychology 35: *The Handbook for Nursing Associates and Assistant Practitioners* Gillian Rowe, Scott Ellis, Deborah Gee, Kevin Graham, Michelle Henderson, Janette Barnes, Chris Counihan, Ami Jackson, Jade Carter-Bennett, 2022-11-17 The essential handbook for trainee nursing associates and anyone undertaking a foundation degree or higher-level apprenticeship in healthcare practice. This bestselling book will see you through all aspects of your programme, from the skills and knowledge you need to get started through to more advanced topics such as leadership and pathophysiology. Covering all of the topics you will study in clear, straightforward language, it builds your confidence and competence as an effective healthcare professional. Key features: - Mapped to the 2018 NMC Standards and other relevant healthcare codes and standards - New chapter on medicines management - Filled with case studies, scenarios and activities illustrating theory in real life practice

crash course psychology 35: *Seduction of the Heart* Tim LaHaye, Ed Hindson, 2010-06-14 Christians are engaged in the ultimate battle-the battle for the heart. The overwhelming influences of the media, materialism, and selfish ambition threaten to decay even the most tender of hearts. While the world screams to the contrary, every Christian must fight to maintain a clear conscience and discover what it really means to have the heart of God. On the heels of his New York Times bestseller *Mind Siege*, Tim LaHaye, with Ed Hindson, equip readers with armor to guard their hearts and draw nearer to God. Some chapter titles include: *The Battle for the Heart* *The Ultimate Deception* *The Erosion of Trust* *A Prescription for the Heart* *Finding God's Heart*

crash course psychology 35: *Distance Counseling and Supervision* Jennifer Nivin Williamson, Daniel G. Williamson, 2020-12-15 This landmark primer in telebehavioral health addresses the functional elements of technology-assisted therapy with individuals, couples, and families. Leaders and innovators in the field contribute unique perspectives to help students and practitioners prepare for and productively engage in virtual counseling and supervision. Using reader-friendly language, the authors discuss ethical, legal, regulatory, and practical considerations for using the right technology in secure and confidential ways to best serve clients and supervisees. Diverse case scenarios, questions for further discussion, and useful appendices enhance this rich and current resource. *Requests for digital versions from ACA can be found on www.wiley.com *To purchase print copies, please visit the ACA website <https://imis.counseling.org/store/> *Reproduction requests for material from books published by ACA should be directed to publications@counseling.org

crash course psychology 35: Beyond the Clinical Hour James N. Sells, Amy Trout, Heather C. Sells, 2024-03-19 There is an institution uniquely positioned to help to global mental health crisis: the church. In this encouraging roadmap, psychologists James Sells and Amy Trout and journalist Heather Sells call clinicians, students, and educators to combine the science of the mental health discipline with the service of Christian ministry.

crash course psychology 35: *Creative Chemists* Simon Rees, Douglas Newton, 2020-06-29 Creative thinking, be it that of the teacher or the student, has tended to be overlooked in science, but exercising it is important. This book shows how it can be done in chemistry, both in the context of creative chemistry teaching and in learning chemistry. Going beyond principles and ideology, readers will find practical strategies, tools, examples, and case studies in a variety of contexts to bring creative thinking theory into practice. Beginning with a discussion on the nature of creativity, the authors' debunk misconceptions and address the relationship between creativity and problem solving. Delving into opportunities for practising creative thinking in science, for instance, hypothesis generation and experiment design, the authors' then move on to discussions around assessing and evaluating creative thinking. Further areas covered include: multisensory chemistry, language and literacy, practical work and story-telling. As a resource, this book points the way to fostering exploration and the development of creative thinking in chemistry for the benefit of the student, and for the benefit of the teacher in offering a source of satisfaction and achievement in the work they do. With a foreword by John Holman.

crash course psychology 35: Young People and Social Media: Contemporary Children's Digital

Culture Steve Gennaro, Blair Miller, 2021-10-05 'Young People and Social Media: Contemporary Children's Digital Culture' explores the practices, relationships, consequences, benefits, and outcomes of children's experiences with, on, and through social media by bringing together a vast array of different ideas about childhood, youth, and young people's lives. These ideas are drawn from scholars working in a variety of disciplines, and rather than just describing the social construction of childhood or an understanding of children's lives, this collection seeks to encapsulate not only how young people exist on social media but also how their physical lives are impacted by their presence on social media. One of the aims of this volume in exploring youth interaction with social media is to unpack the structuring of digital technologies in terms of how young people access the technology to use it as a means of communication, a platform for identification, and a tool for participation in their larger social world. During longstanding and continued experience in the broad field of youth and digital culture, we have come to realize that not only is the subject matter increasing in importance at an immeasurable rate, but the amount of textbooks and/or edited collections has lagged behind considerably. There is a lack of sources that fully encapsulate the canon of texts for the discipline or the rich diversity and complexity of overlapping subject areas that create the fertile ground for studying young people's lives and culture. The editors hope that this text will occupy some of that void and act as a catalyst for future interdisciplinary collections. 'Young People and Social Media: Contemporary Children's Digital Culture' will appeal to undergraduate students studying Child and Youth Studies and—given the interdisciplinary nature of the collection—scholars, researchers and students at all levels working in anthropology, psychology, sociology, communication studies, cultural studies, media studies, education, and human rights, among others. Practitioners in these fields will also find this collection of particular interest.
