cunning intelligence starts with g: *The Children of Athena* Nicole Loraux, 2021-09-14

According to one myth, the first Athenian citizen was born from the earth after the sperm of a rejected lover, the god Hephaistos, dripped off the virgin goddess Athena's leg and onto fertile soil. Henceforth Athenian citizens could claim to be truly indigenous to their city and to have divine origins that bypassed maternity. In these essays, the renowned French Hellenist Nicole Loraux examines the implication of this and other Greek origin myths as she explores how Athenians in the fifth century forged and maintained a collective identity.

cunning intelligence starts with g: *Material World* Guy Hedreen, 2021-05-31 The interplay between nature, science, and art in antiquity and the early modern period differs significantly from late modern expectations. In this book scholars from ancient studies as well as early modern studies, art history, literary criticism, philosophy, and the history of science, explore that interplay in several influential ancient texts and their reception in the Renaissance. The *Natural History* of Pliny, *De Architectura* of Vitruvius, *De Rerum Natura* of Lucretius, *Automata* of Hero, and *Timaios* of Plato among other texts reveal how fields of inquiry now considered distinct were originally understood as closely interrelated. In our choice of texts, we focus on materialistic theories of nature, knowledge, and art that remain underappreciated in ancient and early modern studies even today.

cunning intelligence starts with g: *Philosophy, Poetry, and Power in Aristophanes's Birds* Daniel Holmes, 2018-11-23 Aristophanes was clearly anxious about the role of the sophists and the "new" education in Athens. After the perceived failure of *Clouds* in 423 and its subsequent, unperformed revision, Aristophanes, this book argues, returned in 414 with *Birds*, a continuation and deepening of his critique found in *Clouds*. Peisetaerus or "persuader of his comrades," the protagonist of *Birds*, though an old man, is clearly a student of Socrates' phrontisterion. Unlike Socrates, however, he is political and ambitious and he understands the whole of human nature, both rational and irrational. Peisetaerus employs the various deconstructive techniques of Socrates and his allies (which is summed up on the comic sage in the image of "father-beating") to overturn not just human society, but, with the help of his new allies, the divine and musical birds, the cosmos. After his new gods and bird city, Cloudcuckooland, are actually established, however, the hero re-introduces the "old" ways - justice, moderation, and obedience to law - but now under his personal authority, and thereby becomes "the highest of the gods." Thus, the author postulates, in 414 Aristophanes has come to acknowledge the potency of the apparent civic-minded turn (or element) of the sophists, while aware of the self-aggrandizing nature of their ambition. Peisetaerus, unlike Socrates, is successful: he is establishing a just polis and cosmos and, therefore, must be victorious. But the consequence or cost of this success is illustrated through the Bird Chorus. After the polis is founded, the birds never again sing of their musical reciprocity with the Muses, the source of melodies for men. The birds are now political and the policemen of human beings. The sophist-run cosmos has lost its music. The new Zeus is an ugly bird-mutant. The gods and all nomoi have lost their beauty, honor, and reverential nature. *Birds*, in its finale, hilariously, but boldly illuminates the inherent tension between philosophy (reason) and poetry (divinely-inspired tradition).

cunning intelligence starts with g: *The Seer and the City* Margaret Foster, 2024-05-28

Seers featured prominently in ancient Greek culture, but they rarely appear in archaic and classical colonial discourse. Margaret Foster exposes the ideological motivations behind this discrepancy and reveals how colonial discourse privileged the city's founder and his dependence on Delphi, the colonial oracle par excellence, at the expense of the independent seer. Investigating a sequence of literary texts, Foster explores the tactics the Greeks devised both to leverage and suppress the extraordinary cultural capital of seers. The first cultural history of the seer, *The Seer and the City* illuminates the contests between religious and political powers in archaic and classical Greece.

cunning intelligence starts with g: Theories of the Sign in Classical Antiquity Giovanni Manetti, 1993-03-22 It's the first book which revisits Greek and Latin theories of signs from the point of view of a profound classical scholarship and a paramount knowledge of contemporary semiotics debates. -- Umberto Eco Available in English for the first time is Professor Manetti's brilliant study of the origin of semiotics and sign theory. He seeks to discover the common thread that runs through the classical world from the very beginning of human thought to the fourth century A.D. cunning intelligence starts with g: The Family, Women and Death S.C. Humphreys, 2023-10-01 Originally published in 1983 and as a second edition in 1993, this book deals with 3 universal but culturally variable phenomena: the family, women and death. The book poses questions about our own ways of looking at the family and private life, at sex and gender and at death, by analysing ancient Greek ideas and by showing how researchers' presuppositions have been influenced by their own culture and experience. The views of Fustel de Coulanges on the place of tomb-cult in the evolution of the family in the ancient world are critically examined and related to their 19th Century context; the study of the classical Athenian family is related to current historical and sociological debates on the separation between public and private life.

cunning intelligence starts with g: Aristomenes of Messene Daniel Ogden, 2004-12-31 With Aristomenes of Messene, Daniel Ogden identifies yet another fertile and undervalued topic in Ancient History. He has previously studied illegitimacy in the ancient Greek world (Greek Bastardy, OUP, 1996), Greek ideas about the relationship between deformity and power (Crooked Kings of Ancient Greece, Duckworth, 1997), the nature and causes of dynastic murder in the Hellenistic world (Polygamy, Prostitutes and Death, Classical Press of Wales, 1999) and the techniques of calling up the dead in the ancient world (Greek and Roman Necromancy, Princeton UP, 2001). Among his other books is a volume edited for the Classical Press of Wales, The Hellenistic World: New perspectives (2002). The legends of Aristomenes, hero of the Messenian resistance to Sparta, were designed to excite, gratify and amuse. Yet they remain almost unknown even to specialist ancient historians. This book, the first monograph to be devoted to Aristomenes, redirects attention to his adventures, which at times resemble those of King Arthur, Robin Hood and even Sinbad the Sailor. The book goes beyond the question of the historicity of Aristomenes, and examines the meaning and symbolism of the stories in their own right. The study will be welcomed by those with an interest in the history of Sparta, in Pausanias (our principal source for the tales), and in Greek traditional narrative. Famously, Sparta tried to suppress the identity and self-confidence of its Messenian helots. Yet here are stories which give access to the imagination of this long-muted but ultimately liberated people..

cunning intelligence starts with g: Herodotus, Explorer of the Past James Allan Stewart Evans, 2014-07-14 Why does a power expand and become an empire? Writing in the early years of the Peloponnesian War, Herodotus gave Athens full credit for saving Greece from Persia, but also identified the city's expansion as a new manifestation of imperialist aggression. In this skillful analysis of Herodotus' intellectual world, J.A.S. Evans combines historical, anthropological, and literary techniques to show how the war affected not only the great thinker's view of Persian aggression and of the people involved in it but also the shape of the *Histories* themselves. The first essay discusses Herodotus' investigation of imperialism, and the second finds the beginnings of biography in his descriptions of individuals, particularly in his well-crafted portrait of Cyrus. The third essay describes the Father of History as a collector and evaluator of local oral stories, sources for the written work that was destined by its scope and unifying plan to introduce a new genre. Evans draws analogies between Herodotus' methods and those of oral historians in other cultures, particularly in precolonial Africa. He also explores comparisons between Herodotus in Egypt and sixteenth-and seventeenth-century European ethnologists in the Americas. Originally published in 1990. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

Rabel, 2005-12-31 Ten new essays, from a distinguished cast of (mainly) North American scholars, approach Homer with insights gained from the modern disciplines of psychology and anthropology, narratology, oral theory and cognitive research. But the contributors also attend to ancient modes of approach to the Homeric poems: linguistic and narratological, ethical and psychological. The volume focuses both on literary technique in the poems, and on the portrayal of characters and peoples, central and marginal.

cunning intelligence starts with g: *True Relations* G. Thomas Couser, Joseph Fichtelberg, 1998-01-21 The essays in this collection explore new directions in autobiography studies. Examining a wide range of texts, from narratives of suicide survivors, cross-dressers, and people with HIV/AIDS to self-representations in the visual arts, the collection demonstrates how writers have used the postmodern experience fragmentation to forge new kinds of identities. Postmodern selves, the essayists argue, are relational selves, constructed from the acute need to find identity through collaboration with others. Postmodern autobiography emerges as a search, amid shocks to the stable self, for wider patterns of significance. Of interest to researchers and scholars in autobiography, world literature, and psychology.

cunning intelligence starts with g: *Astrology, Science and Culture* Roy Willis, Patrick Curry, 2020-05-19 Mainstream science has long dismissed astrology as a form of primitive superstition, despite or perhaps even because of its huge popular interest. From daily horoscopes to in-depth and personalized star forecasts, astrology, for many, plays a crucial role in the organization of everyday life. Present-day scholars and scientists remain baffled as to why this pseudo-science exercises such control over supposedly modern, rational and enlightened individuals, yet so far they have failed to produce any meaningful analysis of why it impacts on so many lives and what lies behind its popular appeal. Moving beyond scientific scepticism, *Astrology, Science and Culture* finally fills the gap by probing deeply into the meaning and importance of this extraordinary belief system. From the dawn of pre-history, humankind has had an intimate connection with the stars. With its roots in the Neolithic culture of Europe and the Middle East, astrology was traditionally heralded as a divinatory language. Willis and Curry argue that, contrary to contemporary understanding including that of most astrologers astrology was originally, and remains, a divinatory practice. Tackling its rich and controversial history, its problematic relationship to Jungian theory, and attempts to prove its grounding in objective reality, this book not only persuasively demonstrates that astrology is far more than a superstitious relic of years gone by, but that it enables a fundamental critique of the scientism of its opponents. Groundbreaking in its reconciliation of astrology's ancient traditions and its modern day usage, this book impressively unites philosophy, science, anthropology, and history, to produce a powerful exploration of astrology, past and present.
