cup in french language: Linguistic Change in French Rebecca Posner, 1997 What is French and how has it changed over time? Can we distinguish language history from historical linguistics, and language change from linguistic change? These questions are explored using copious material from the history of the French language, concentrating on changes in the relatively modern period in particular. Posner explains how change comes about and how changes at different levels of language interact, and the role of sociological and ideological factors is set against the internal mechanisms that trigger change. This work makes a substantial contribution to the theory of linguistic change, as well as to discussion of the relationship between language and history in French-speaking areas, including Canada and French Creole-speaking countries.

cup in french language: *Modes of Play in Eighteenth-Century France* Fayçal Falaky, Reginald McGinnis, 2021-11-12 Collecting diverse critical perspectives on the topic of play—from dolls, bilboquets, and lotteries, to writing itself—this volume offers new insights into how play was used to represent and reimagine the world in eighteenth-century France. In documenting various modes of play, contributors theorize its relation to law, religion, politics, and economics. Equally important was the role of “play” in plays, and the function of theatrical performance in mirroring, and often contesting, our place in the universe. These essays remind us that the spirit of play was very much alive during the “Age of Reason,” providing ways for its practitioners to consider more “serious” themes such as free will and determinism, illusions and equivocations, or chance and inequality. Standing at the intersection of multiple intellectual avenues, this is the first comprehensive study in English devoted to the different guises of play in Enlightenment France, certain to interest curious readers across disciplinary backgrounds.

cup in french language: *Proust's Cup of Tea* Emily Eells, 2017-03-02 Proust's Cup of Tea analyzes Proust's reading of various Victorian authors and shows how they contributed to *A la recherche du temps perdu*. This book proves that British literature and art played a fundamental role in Proust's writing process by citing from the manuscript versions of his novel, as well as from his correspondence, essays and the lengthy critical apparatus accompanying his translations of Ruskin. Eells reflects here on why Proust was attracted to Victorian culture, and how he incorporated it into his novel. The works of the British novelists he was most interested in—Thomas Hardy and George Eliot—address questions of gender which Proust develops in his own work. He builds Sodome et Gomorrhe I, the section of his novel focusing on homosexuality, on a series of explicit citations and guarded allusions to Shakespeare, Darwin Walter Scott, Oscar Wilde and Robert Louis Stevenson.

Eells explores how Proust followed in the pioneering footsteps of those British writers who had ventured beyond the boundaries of conventional sexuality, though he took pains to erase their traces in the definitive version of his work. This study also highlights how Proust made his fictitious painter Elstir into a master of ambiguity, by modeling his art on Turner, the Pre-Raphaelites and Whistler. Eells shows that Proust drew on Victorian culture in his depiction of sexual ambiguity, arguing that he confounded eroticism and aestheticism in the way he inextricably linked the man-woman figure with British art and literature. As Proust aestheticized male and female homosexuality using references to British art and letters, Eells coins the term 'Anglosexuality' to refer to his characters of the third sex. She defines Anglosexuality as an intersexuality represented through intertextuality, as an artistic sensitivity, an aesthetic stance, and a new way of seeing. Proust's Cup of Tea thus demonstrates that Victorian culture and homoeroticism form one of the cornerstones of Proust's monumental work.

cup in french language: Pragmatic Markers, Discourse Markers and Modal Particles Chiara Fedriani, Andrea Sansó, 2017-11-15 This book offers new perspectives into the description of the form, meaning and function of Pragmatic Markers, Discourse Markers and Modal Particles in a number of different languages, along with new methods for identifying their 'prototypical' instances in situated language contexts, often based on cross-linguistic comparisons. The papers collected in this volume also discuss different factors at play in processes of grammaticalization and pragmaticalization, which include contact-induced change and pragmatic borrowing, socio-interactional functional pressures and sociopragmatic indexicalities, constraints of cognitive processing, together with regularities in semantic change. Putting the traditional issues concerning the status, delimitation and categorization of Pragmatic Markers, Discourse Markers and Modal Particles somewhat off the stage, the eighteen articles collected in this volume deal instead with general questions concerning the development and use of such procedural elements, explored from different approaches, both formal and functional, and from a variety of perspectives - including corpus-based, sociolinguistic, and contrastive perspectives - and offering language-specific synchronic and diachronic studies.

The methodological reflections put forward in Part III signal theoretically-grounded and pedagogically-relevant paths along which future empirical work can grow. The empirical studies reported in Part II illuminate the myriad of individual, educational, and task-related variables that (may) mediate short-term and long-term language learning outcomes. These studies examine diverse forms of writing, performed in varied environments (including pen-and-paper and digital writing), conditions (writing individually and/or collaboratively), and instructional settings (academic settings - including secondary school and college level institutions - as well as out-of-school contexts).

cup in french language: Grammaticalization Katerina Stathi, Elke Gehweiler, Ekkehard König, 2010 This volume contains a selection of papers on grammaticalization from a broad perspective. Some of the papers focus on basic concepts in grammaticalization research such as the concept of 'grammar' as the endpoint of grammaticalization processes, erosion, (uni)directionality, the relation between grammaticalization and constructions, subjectification, and the relation between grammaticalization and analogy. Other papers shed a critical light on grammaticalization as an explanatory parameter in language change. New case studies of micro-processes of grammaticalization complete the selection. The empirical evidence for (and against) grammaticalization comes from diverse domains: subject control, clitics, reciprocal markers, pronouns and agreement markers, gender markers, auxiliaries, aspectual categories, intensifying adjectives and determiners, and pragmatic markers. The languages covered include English and its varieties, German, Dutch, Italian, Spanish, French, Slavonic languages, and Turkish. The book will be valuable to scholars working on grammaticalization and language change as well as to those interested in individual languages.
