forensic psychology degree texas: *Psychological Experts in Divorce Actions* Marc J. Ackerman, Andrew W. Kane, 2005-01-01 Emotionally charged issues abound in matrimonial practice, especially in custody disputes. Expert testimony can have a dramatic impact on the outcome of a case, and when matters are highly sensitive or sensational the seeming objectivity of an expert can be dispositive. To effectively reinforce or question that testimony, certain specialized knowledge is essential. Scientifically accepted standards and theories are constantly evolving. Keeping up with the data had been a challenge, but one integrated resource has made it simple. Aspen Publishers' *Psychological Experts in Divorce Actions* pulls all the research together into the definitive guide to understanding the role of psychological evaluations in divorce and custody actions. Focused on providing the best approach to protecting your client's interests, this work explains all the leading testing instruments, what conclusions may be drawn and how to challenge or support those conclusions. In addition to offering effective examination and cross-examination strategies, it assists you in handling the gamut of psychological factors that affect clients in divorce and custody cases. Authors Marc J. Ackerman, Ph.D., and Andrew W. Kane, Ph.D., are licensed psychologists who have been involved in hundreds of custody cases. Drawing on their extensive experience—testing parties to a divorce and treating psychological patients in the clinic—and as psychological experts in the courtroom, they identify the most important psychological evaluation research used in divorce and custody decision-making and distill the information into clear terms lawyers can readily apply. They also examine vital issues including: Ethics —confidentiality, privilege, duty to warn or protect (Tarasoff), sharing raw data, test integrity Sexual abuse —bona fide or fabricated allegations, psychological effects of sexual abuse, profiles of abuser and abused Testing —personality tests (including MMPI-2, And The new MMPI-2-RF, Rorschach, Millon, TAT); intelligence tests (Wechsler scales, Kaufman scales, Stanford Binet); custody tests (ASPECT, PCRI, PASS, BPS); and many more How divorce affects families —custody, placement, age and gender differences, grandparents, sexual preference, psychological problems

forensic psychology degree texas: A Mental Health Treatment Program for Inmates in Restrictive Housing Ashley B. Batastini, Robert D. Morgan, Daryl G. Kroner, Jeremy F. Mills, 2019-06-26 This treatment program targets the criminal, behavioral, and mental health problems of inmates in segregated housing that prevents them from living prosocially and productively within the general prison population. The program makes use of a bi-adaptive psychoeducational and cognitive-behavioral treatment model to increase inmates' understanding about the psychological and criminal antecedents that contributed to their current placement, and to teach them the skills necessary for managing these problem areas. This flexible intervention assists inmates with significant problem behaviors by reducing psychological impairment and improving their ability to cope with prison life. This book includes a program introduction and guide for clinicians, the inmate workbook, and accompanying eResources to assist clinicians in both successful program implementation and evaluation of treatment outcomes. Designed to account for the safety and physical limitations that make the delivery of needed mental and behavioral health services difficult, this guide is essential reading for practitioners working with high-needs, high-risk inmate populations.
