free online training for foster parents: Brothers and Sisters in Adoption Arleta James, 2012-02-15 What about the kids already there? How do they do when a child with a challenging past

joins a family by adoption? When experienced parents decide to adopt an older child or a sibling group, they jump through all kinds of bureaucratic hoops — background checks, interviews, group meetings, reading assignments, classes, etc. But most often the typically developing children these adults are already parenting (whether through birth or adoption) are left out of the process, informed that a new kid is coming, and simply expected to —adjust— to the addition of another sibling. The addition of a child with a history of neglect or trauma cannot be a seamless transition. The expectations of everyone involved — parents, new siblings, and, yes, professionals facilitating the adoption — must be realistic, taking into account that the new child will need special attention that may take away time and attention from the already resident kids, that family life is likely to be turned topsy turvy until appropriate counseling and support are in place, that relationships will change. Therapist Arleta James is certainly not the first person to recognize this, but she is the first to do something about it. *Brothers and Sisters in Adoption* offers insights and examples and sturdy, practical, proven tools for helping newly configured families prepare, accept, react, and mobilize to become a new and different family meeting the practical, physical and emotional needs of all its members. These well prepared and supported families are the ones who thrive!

free online training for foster parents: No Way to Treat a Child Naomi Schaefer Riley, 2021-10-05 Kids in danger are treated instrumentally to promote the rehabilitation of their parents, the welfare of their communities, and the social justice of their race and tribe—all with the inevitable result that their most precious developmental years are lost in bureaucratic and judicial red tape. It is time to stop letting efforts to fix the child welfare system get derailed by activists who are concerned with race-matching, blood ties, and the abstract demands of social justice, and start asking the most important question: Where are the emotionally and financially stable, loving, and permanent homes where these kids can thrive? "Naomi Riley's book reveals the extent to which abused and abandoned children are often injured by their government rescuers. It is a must-read for those seeking solutions to this national crisis." —Robert L. Woodson, Sr., civil rights leader and president of the Woodson Center "Everyone interested in child welfare should grapple with Naomi Riley's powerful evidence that the current system ill-serves the safety and well-being of vulnerable kids." —Walter Olson, senior fellow, Cato Institute, Robert A. free online training for foster parents: Dissemination and Implementation of Evidence-Based Practices in Child and Adolescent Mental Health Rinad S. Beidas, Philip C. Kendall, 2014-05-20 Mental health disorders are common in youth, impacting up to 1 in 5 children and adolescents. Typically, mental health difficulties result in impaired functioning and lower quality of life for both youth and their families. Fortunately, there are psychosocial treatments for the mental health needs of youth that have earned the evidence-based label. However, these treatments are not widely available, and it is estimated that it can take up to 17 years for them to be transported into community settings. As a result, a new field of dissemination and implementation (DI) science has emerged to address this problem. Dissemination refers to the transfer of information about evidence-based practices to community settings, and implementation refers to active strategies to assist adoption of evidence-based practices in community settings. Dissemination and Implementation of Evidence-Based Practices in Child and Adolescent Mental Health is the first book to bring together the world's foremost experts in implementation science and evidence-based practices for youth to provide the latest findings around DI for children and adolescents. Chapters provide comprehensive coverage of the science of dissemination and implementation across contexts, disorders, and international perspectives. This volume will be an essential resource to implementation scientists and scholars, instructors in doctoral-level training programs, and graduate students, as well as policymakers, community mental health clinicians and administrators, school administrators, researchers, and other mental health professionals.

free online training for foster parents: Preparing and accessing decent work amongst rural youth in Cambodia Food and Agriculture Organization of the United Nations, 2019-08-12 The case study explores which skills and training opportunities young people need in order to gain access to decent employment in rural areas. The research was undertaken in order to develop recommendations to support the Ministry of Agriculture, Forestry and Fisheries (MAFF) and FAO Cambodia in developing appropriate recommendations to support rural young people, especially those of the 15 to 17 age cohort. The study highlights the limited decent employment opportunities that currently exist along various agricultural value chains in rural Cambodia. Poverty and the structural problems of the agricultural sector are the main barriers for youth in accessing decent rural employment. A substantial enhancement of the education system, as well as the provision of appropriate training services to ensure successful school-to-work transition is seen as necessary to tackle these challenges. A well-balanced policy mix reflecting national and local circumstances can encourage employment opportunities and create an environment that enables rural youth. Building on previous research on agriculture in Cambodia, agricultural transformation requires promotion of agribusiness enterprises, support to community-managed organizations of farmers, promotion of agropreneurs, and investments in agricultural and rural development, particularly in infrastructure, energy, water, education and health. Moreover, most youth entering agriculture are self-employed and work as smallscale farmers. Therefore, the provision of skills and training in rural areas should focus on the skills required to be self-employed.

free online training for foster parents: Organizational Behavior in Sport Management

Eric MacIntosh, Laura Burton, 2024-09-23 The desire of any organization is to have the entire staff working from the same playbook toward a common goal (i.e., "the championship"). Given individuals' varying attitudes, beliefs, skills, and motivations, it's a goal not easily achieved. Organizational Behavior in Sport Management, Second Edition, examines the individual, intrapersonal, interpersonal, and organizational processes fundamental to working within sport organizations, placing equal emphasis on what managers need to understand about human behavior and what each employee brings to the workplace. This updated second edition blends classical research in the field of organizational behavior with the latest knowledge and best practices in the field of sport management. Organized into four major parts—Organizational Behavior in Sport Organizations, Managing the Individual, Managing the Group, and Managing the Organization—the text provides a foundational and contemporary examination of the inner workings of sport organizations. It offers a deep study of how all who work in sport organizations—whether they are administrators, executives, employees, players, coaches, or volunteers—operate independently, and it explores how these individuals interact with each other in the work setting. Highlighted throughout the text are recent examples of how COVID-19; social movements; remote work; and diversity, equity, and inclusion initiatives have changed the nature of work and moved organizations to place greater emphasis on employees' individual needs, desires, interests, empowerment, and satisfaction in their roles. In addition, numerous real-life examples from sport organizations in the United States and throughout the world provide practical application and underscore key concepts. Each chapter features In the Boardroom sidebars, discussion questions, and a case study designed to help illustrate particular topics and facilitate focused discussion in class. The case studies are also included in the instructor guide for ease of assigning to students. New to this edition, a test package, chapter quizzes, and presentation package will aid in classroom preparation. Organizational Behavior in Sport Management answers the key questions of why people do what they do at work, why others behave as they do, and how a person's interpretation of events and behaviors is subject to their own biases. Students will gain an understanding of the most important organizational behavior concepts and a glimpse of how they might see themselves functioning in a sport organization today.
