free potty training app: Born Reading Jason Boog, 2014-07-15 A program for parents and professionals on how to raise kids who love to read, featuring interviews with childhood development experts, advice from librarians, tips from authors and children's book publishers, and reading recommendations for kids from birth up to age five. Every parent wants to give his or her

child a competitive advantage. In *Born Reading*, publishing insider (and new dad) Jason Boog explains how that can be as simple as opening a book. Studies have shown that interactive reading—a method that creates dialogue as you read together—can raise a child’s IQ by more than six points. In fact, interactive reading can have just as much of a determining factor on a child’s IQ as vitamins and a healthy diet. But there’s no book that takes the cutting-edge research on interactive reading and shows parents, teachers, and librarians how to apply it to their day-to-day lives with kids, until now. *Born Reading* provides step-by-step instructions on interactive reading and advice for developing your child’s interest in books from the time they are born. Boog has done the research, talked with the leading experts in child development, and worked with them to compile the “*Born Reading Essential Books*” lists, offering specific titles tailored to the interests and passions of kids from birth to age five. But reading can take many forms—print books as well as ebooks and apps—and *Born Reading* also includes tips on how to use technology the right way to help (not hinder) your child’s intellectual development. Parents will find advice on which educational apps best supplement their child’s development, when to start introducing digital reading to their child, and how to use tech to help create the readers of tomorrow. *Born Reading* will show anyone who loves kids how to make sure the children they care about are building a powerful foundation in literacy from the beginning of life.

free potty training app: *The Importance of Being Little* Erika Christakis, 2016-02-09 “Christakis . . . expertly weaves academic research, personal experience and anecdotal evidence into her book . . . a bracing and convincing case that early education has reached a point of crisis . . . her book is a rare thing: a serious work of research that also happens to be well-written and personal . . . engaging and important.” --Washington Post What kids need from grown-ups (but aren't getting)...an impassioned plea for educators and parents to put down the worksheets and flash cards, ditch the tired craft projects (yes, you, Thanksgiving Handprint Turkey) and exotic vocabulary lessons, and double-down on one, simple word: play. --NPR The New York Times bestseller that provides a bold challenge to the conventional wisdom about early childhood, with a pragmatic program to encourage parents and teachers to rethink how and where young children learn best by taking the child’s eye view of the learning environment To a four-year-old watching bulldozers at a construction site or chasing butterflies in flight, the world is awash with promise. Little children come into the world hardwired to learn in virtually any setting and about any matter. Yet in today’s preschool and kindergarten classrooms, learning has been reduced to scripted lessons and suspect metrics that too often undervalue a child’s intelligence while overtaxing the child’s growing brain. These mismatched expectations wreak havoc on the family: parents fear that if they choose the “wrong” program, their child won’t get into the “right” college. But Yale early childhood expert Erika Christakis says our fears are wildly misplaced. Our anxiety about preparing and safeguarding our children’s future seems to have reached a fever pitch at a time when, ironically, science gives us more certainty than ever before that young children are exceptionally strong thinkers. In her pathbreaking book, Christakis explains what it’s like to be a young child in America today, in a world designed by and for adults, where we have confused schooling with learning. She offers real-life solutions to real-life issues, with nuance and direction that takes us far beyond the usual prescriptions for fewer tests,

more play. She looks at children's use of language, their artistic expressions, the way their imaginations grow, and how they build deep emotional bonds to stretch the boundaries of their small worlds. Rather than clutter their worlds with more and more stuff, sometimes the wisest course for us is to learn how to get out of their way. Christakis's message is energizing and reassuring: young children are inherently powerful, and they (and their parents) will flourish when we learn new ways of restoring the vital early learning environment to one that is best suited to the littlest learners. This bold and pragmatic challenge to the conventional wisdom peels back the mystery of childhood, revealing a place that's rich with possibility.

From both a multilingual and a multidisciplinary perspective, this collection explores the development of technological applications and professional best practices as well as call centre interaction, e-commerce, and e-word of mouth. More specifically, the papers in this volume report on technology developed to support SEs and how this technology influences service providers and their allowable linguistic contributions. Further, this collection provides valuable insights on the language and strategic behaviour deployed in less researched kinds of SEs, gives special attention to how technology impacts the interface between the transactional and interactional goals of SEs, and thus has real world applications.

free potty training app: Raising Them Up Israel Wayne, 2020-04-16 Most parents want a book that will “fix their child” in three easy steps, in 30 days or less. While understandable, this expectation will never work. The problem lies far more with us, the parents, than it does with our child. If we don’t understand that truth, we will only remain frustrated and disappointed with our child. The far greater need is to fundamentally change our own hearts and minds as parents. As a principle, that simply MUST happen before any change will come for our youth. Christian parents may know a lot of Bible verses, yet don’t have a Biblical theology of parenting. Here’s the big picture: parenting is discipleship. Your child is learning from you. You are the teacher. Far more is caught than taught in parenting. Children listen to what you say, but they watch how you live. When you are slack in dealing with character issues in your own life, it short circuits your ability to effectively reach your child’s heart. In Raising Them Up, you will discover: A heart check for parents The world of “techno-parenting” How to teach purity Helping the difficult child Parenting by grace Home-based apologetics and more! It’s not about gimmicks...it’s about God – His inspired, inerrant, infallible, timeless truths. There are lots of other books out there that will teach you how to count to three, hold your breath, snap your wrist with a rubber band, and hand out stickers as a way to change your rebellious child. With enough tips, tricks, and methods, perhaps you can learn the perfect approach to timeouts or some magic cure that will solve bickering, sibling rivalry, laziness, back-talking, media addiction, lying, stealing, bad attitudes, apathy, angry outbursts, rebellion, inattention, or any other number of “fruits” that annoy, inconvenience, and embarrass us. But if you care enough to risk having to make changes in your own way of thinking and living, then let’s walk together on this path of learning to powerfully and prayerfully parent our children after the ways of God.
