Whilst you value and work with medical understandings, your main aim seems to go beyond these. You seem to enable people to appreciate more consciously how what we do to and with ourselves and others on a daily basis impacts on our individual and collective wellbeing. As occupational therapists you have a significant contribution to make [...] allowing people from all walks of life to contribute meaningfully to the wellbeing of others. - Links philosophy with practical examples of engaging people in ordinary occupations of daily life as a means of enabling them to transform their own lives - Includes contributions from worldwide leaders in occupational therapy research and practice - Describes concrete initiatives in under-served and neglected populations - Looks at social and political mechanisms that influence people's access to useful and meaningful occupation - Chapters increase diversity of contributions - geographically, culturally and politically - Emphasis on practice, education and research maintains academic credibility - A glossary and practical examples in nearly every chapter make text more accessible to students
