**free stars training online:** *Library Information and Resource Sharing* Beth Posner, 2016-11-21  
Through the perspectives of interlibrary loan (ILL) specialists, this book examines what ILL departments are doing, the value of ILL librarians in the evolving library environment, and how library collections and services are being affected by new ILL policies. In today's libraries, ILL specialists are facilitating service that goes far beyond traditional borrowing and lending. Recent innovations in interlibrary loan and library resource-sharing practices have advanced the information-sharing mission of libraries—a sea change that affects and benefits all library operations and staff. This book explores the far-reaching significance of these innovations in ILL for other areas of library activity, from acquisitions and collection development to reference and instruction to circulation and e-resource management and beyond. Readers will understand that as valuable as traditional ILL remains, ILL librarians are also well-placed to do much more. For example, ILL staff can inform acquisitions and collection development decisions with request data; demonstrate the need to maintain and preserve the long tail of print; advocate for the fair use of copyrighted print material and license terms that safeguard library information sharing in the digital environment; nurture consortial relationships and international cooperation between libraries; and promote the discovery of information, all of which can help librarians meet the information needs of their communities.

**free stars training online:** *Home Free* Marni Jackson, 2010-08-28 From the author of the best-selling *The Mother Zone*, comes a comic narrative about an over-anxious mother and her twenty-something over-adventurous son. *Home Free* is about the last secret lap of parenting: getting through your kids' twenties and learning how to let them go at the same time. The twentysomethings who invented the generation gap in the nineteen sixties have grown up to become hyperinvolved parents who can't stop worrying about their adult kids. Many of the kids are still living in the basement, bussing tables instead of going to business school, and depending on their parents for emotional support. Just when they thought family life was on the wane, parents are back on deck with their children; at the same time many are often coping with their own frail or dying parents. Is this the new, improved face of family, where kids still depend on their parents for stability,

friendship and guidance in an increasingly unforgiving world? Or has this era of over-invested parents, living vicariously through the achievements of their children, bred dependency in the new generation? Home Free is an intimate, candid, reflective and comic memoir that focuses on this new and undefined stage of family life: the challenges of helping our kids navigate their twenties - while learning how to let go of them at the same time.

**free stars training online:** **Inclusive Physical Activities** Alexandre J. S. Morin, Christophe Maïano, Danielle Tracey, Rhonda G. Craven, 2017-03-01 Increasing numbers of children and adolescents internationally are being diagnosed with secondary health problems (e.g., overweight-obesity, diabetes, asthma, anxiety, etc.) due in part, or at least related to, a lack of physical activity. Children and adolescents with various forms of special needs (for example, children and adolescents with physical or intellectual disabilities, children and adolescents from disadvantaged social backgrounds and children and adolescents with chronic illnesses) seem to be particularly at risk for secondary health problems, which in the end limit their social participation and inclusion, as well as their ability to achieve their full potential and to lead happy and fulfilling lives. For these children and adolescents, involvement in regular physical activities (including fitness activities and sports) may have far reaching benefits. For instance, organized physical activities are known to represent an effective vehicle for interventions for children and adolescents with special needs who do not seem to benefit as much as others from more traditional, verbal-oriented approaches. Organized physical activities (in or out of school) further provide these children and

adolescents with opportunities to interact in a positive manner with prosocial peers and adults who may serve as positive role models for them. There is currently a paucity of research about physical activities that effectively include children and adolescents with a range of special needs or research that identifies evidence-based strategies that seed success in maximizing the involvement in, and the positive biopsychosocial outcomes associated with, the practice of physical activity. This dearth of research is impeding progress in addressing the biopsychosocial disadvantage that these children and adolescents encounter, the development of new solutions for enabling full potential, and ensuring that children and adolescents with special needs not only succeed, but also flourish in life. This volume includes examples of theory, research, policy, and practice that will advance our understanding of how best to encourage these children and adolescents to participate regularly in physical activity, how to maximize the biopsychosocial benefits of involvement in physical activities, and how to ensure that these physical activities are inclusive for children and adolescents with special needs. The focus will be placed on research-derived physical activity practices that seed success for children and adolescents with special needs, and new directions in theory, research, and practice that have implications for enhancing physical activity practices with at-risk children and adolescents. The themes covered in this volume include: - Strategies to maximise participation of children and adolescents with special needs in physical activity as a global priority; - Strategies to maximise the social inclusion of children and adolescents with special needs in general physical activities; - Effective physical education strategies to enhance biopsychosocial outcomes for children and adolescents with special needs; - Advancing the practice of educators and coaches to cultivate the social inclusion and participation in physical activity of children and adolescents with special needs; and - Challenging the meaning and implementation of inclusive practices in physical education globally.
