free working genius assessment: Evaluation in Text : Authorial Stance and the Construction of Discourse Susan Hunston, Geoffrey Thompson, 2000-02-24 A crucial aspect of any discourse is what the writer or speaker thinks about his/her topic - in other words, how the writer or speaker evaluates the topic. Evaluation in Text brings together work from many different perspectives, providing a unique profile of this important topic which will be essential reading for any student or researcher of Discourse Analysis. - ;This is an accessible and wide-ranging account of current research in one of the most central aspects of discourse analysis: evaluation in and of written and spoken language. Evaluation is the broad cover term for the expression of a speaker's - or writer's - attitudes, feelings, and values. It covers areas sometimes referred to as stance, modality, affect or appraisal. Evaluation (a) expresses the speaker's opinion and thus reflects the value-system of that person and their community; (b) constructs relations between speaker and hearer (or writer and reader); (c) plays a key role in how discourse is organized. Every act of evaluation expresses and

contributes to a communal value-system, which in turn is a component of the ideology that lies behind every written or spoken text. Conceptually, evaluation is comparative, subjective, and value-laden. In linguistic terms it may be analysed lexically, grammatically, and textually. These themes and perspectives are richly exemplified in the chapters of this book, by authors aware and observant of the fact that processes of linguistic analysis are themselves inherently evaluative. The editors open the book by introducing the field and provide separate, contextual introductions to each chapter. They have also collated the references into one list, itself a valuable research guide. The exemplary perspectives and analyses presented by the authors will be of central interest to everyone concerned with the analysis of discourse, whether as students of language, literature, or communication. They also have much to offer students of politics and culture. The editors open the book by introducing the field and provide separate, contextual introductions to each chapter. free working genius assessment: *Assessing Adolescent and Adult Intelligence* Alan S. Kaufman, Elizabeth O. Lichtenberger, 2005-08-05 The classic text--now updated with a new interpretive approach to the WAIS-III *Assessing Adolescent and Adult Intelligence*, the classic text from Alan Kaufman and Elizabeth Lichtenberger, has consistently provided the most comprehensive source of information on cognitive assessment of adults and adolescents. The newly updated Third Edition provides important enhancements and additions that highlight the latest research and interpretive methods for the WAIS-III. Augmenting the traditional sequential and simultaneous WAIS-III interpretive methods, the authors present a new approach derived from Cattell-Horn-Carroll (CHC) theory. This approach combines normative assessment (performance relative to age peers) with ipsative assessment (performance relative to the person's own mean level). Following Flanagan and Kaufman's work to develop a similar CHC approach for the WISC-IV, Kaufman and Lichtenberger have applied this system to the WAIS-III profile of scores along with integrating recent WAIS-III literature. Four appendices present the new method in depth. In addition to a detailed description, the authors provide a blank interpretive worksheet to help examiners make the calculations and decisions needed for applying the additional steps of the new system, and norms tables for the new WAIS-III subtest combinations added in this approach. *Assessing Adolescent and Adult Intelligence* remains the premier resource for the field, covering not only the WAIS-III but also the WJ III, the KAIT, and several brief measures of intelligence, as well as laying out a relevant, up-to-date discussion of the discipline. The new, theory-based interpretive approach for the WAIS-III makes this a vital resource for practicing psychologists, as well as a comprehensive text for graduate students.
