Fresno State Library Collections and Resources

The Fresno State Library offers a rich variety of collections designed to support diverse research needs. Its holdings include print books, academic journals, government documents, multimedia materials, and special collections. The library continuously updates its acquisitions to reflect current trends and scholarship, ensuring relevant and authoritative materials are available for research.

Print and Digital Collections

The library's print collection consists of over one million volumes covering numerous academic disciplines. In addition to physical books, Fresno State Library provides access to an extensive range of digital resources, including e-books and electronic journals, which allow remote access to vital research materials anytime and anywhere. This dual availability supports both traditional and modern research methodologies.

Special Collections and Archives

Fresno State Library houses special collections and archives that preserve rare and unique materials related to regional history, culture, and other specialized topics. These collections are invaluable for researchers seeking primary sources and original documents. The archives include manuscripts,

photographs, and historical records, supporting in-depth scholarly research.

Government Documents and Reports

The library maintains a comprehensive collection of local, state, and federal government documents. These resources provide authoritative data and information essential for research in public policy, social sciences, and environmental studies. The availability of government publications enhances the depth and credibility of research projects conducted through the Fresno State Library.

Research Tools and Databases

Fresno State Library research is facilitated by a wide array of research tools and databases designed to streamline information discovery and retrieval. These digital platforms offer access to scholarly articles, statistical data, and specialized content across multiple disciplines, enabling efficient and effective research.

Academic Databases

The library subscribes to numerous academic databases, including JSTOR, ProQuest, EBSCOhost, and others. These databases provide peer-reviewed journal articles, conference papers, and other scholarly publications essential for rigorous academic research. Users can perform advanced searches tailored to their research questions, ensuring relevant results.

Library Catalog and Discovery Tools

The Fresno State Library catalog is a comprehensive search tool that allows users to locate books, journals, and other materials within the library's collection. Additionally, the library utilizes discovery services that integrate multiple resources, enabling simultaneous searching of print and electronic holdings for faster access to information.

Interlibrary Loan Services

When materials are not available within Fresno State Library's holdings, researchers can utilize interlibrary loan services to borrow items from partner institutions. This service expands the range of accessible resources, ensuring comprehensive coverage for research topics that require specialized or rare materials.

Research Assistance and Support Services

To enhance the quality and efficiency of research conducted at Fresno State, the library provides a variety of assistance and support services. These services are designed to guide users through the research process, from topic development to citation management.

Librarian Consultations

Expert librarians are available to assist with research inquiries, helping students and faculty identify appropriate resources and develop effective search strategies. Personalized consultations can be scheduled for in-depth guidance on complex research projects or specialized subjects.

Workshops and Instruction

The library regularly offers workshops and instructional sessions focused on research skills, information literacy, and the use of library resources. These educational opportunities help users build competence in navigating databases, evaluating sources, and managing citations.

Writing and Citation Support

Fresno State Library collaborates with writing centers to provide support for academic writing and proper citation practices. Resources include guides for various citation styles such as APA, MLA, and Chicago, which are critical for maintaining academic integrity in research papers and theses.

Technology and Study Spaces

The Fresno State Library is equipped with modern technology and comfortable study spaces to foster a productive research environment. Facilities are designed to accommodate individual study as well as collaborative work, supporting diverse learning preferences.

Computing and Printing Facilities

The library provides access to computers with specialized software for data analysis, design, and research purposes. Printing, scanning, and copying services are also available to support the preparation of academic documents and presentations.

Group Study Rooms and Quiet Areas

Multiple group study rooms are available for collaborative projects, equipped with whiteboards and multimedia capabilities. Quiet zones and individual study carrels cater to users who require a focused atmosphere for intensive research and reading.

Technology Lending Programs

Fresno State Library offers technology lending programs that allow students and faculty to borrow laptops, tablets, and other devices. This initiative ensures equitable access to technology necessary for completing research assignments and accessing digital resources.

Access and Borrowing Policies

Understanding access and borrowing policies is essential for effectively utilizing Fresno State Library research resources. These policies govern who can use the library's collections and the terms under which materials may be borrowed or accessed.

Library Membership and Eligibility

Access to the Fresno State Library is available to current students, faculty, staff, and alumni. Community members may also obtain limited access through special memberships or visitor passes, subject to library regulations. Academic Libraries surveys and evaluates the current practice of learning commons and research services within the academic library community in order to determine if these learning spaces are functioning as intended. To evaluate their findings, the authors examine the measurement tools that libraries have used to evaluate usage and satisfaction, including contemporary anthropological studies that provide a more detailed view of the student's approach to research. The book takes a candid look at these redesigns and asks if improvements have lived up to expectations of increased service and user satisfaction. Are librarians using these findings to inform the evolution and implementation of new service models, or have they simply put a new shade of lipstick on the pig? - Takes an honest look at learning commons in academic libraries and discusses what is working and what is not - Explores behind the statistics as to why users come to the library; does the librarians' concept of 'the library as place' match user perception? - Looks at the anthropology of the user to gauge satisfaction with the services and space provided by the library via recent survey findings

fresno state library research: Academic Libraries for Commuter Students Mariana Regalado, Maura A. Smale, 2018-11-29 Did you know that more than 85% of U.S. undergraduates commute to college? Yet the literature geared to academic libraries overwhelmingly presumes a classic, residential campus. This book redresses that imbalance by providing a research-based look at the specific academic needs of commuter students. Edited by a team of librarians and anthropologists with City University of New York, the largest urban public university in the U.S, it draws on their ongoing research examining how these students actually interact with and use the library. The insights they've gained about how library resources and services are central to commuter students' academic work offer valuable lessons for other institutions. Presenting several additional case studies from a range of institution types and sizes, in both urban and suburban settings, this book provides rigorous analysis alongside descriptions of subsequent changes in services, resources, and facilities. Topics include why IUPUI interior designers decided to scrap plans to remove public workstations to make way for collaborative space; how ongoing studies by University of North Carolina anthropologist Donna Lanclos shaped the design of the Family Friendly Library Room, where students may bring their children; ways that free scanners and tablet lending at Brooklyn College supports subway studiers; ideas from students on how best to help them through the use of textbook collections; using ACRL's Assessment in Action model to learn about student engagement and outcomes with library instruction at a community college; and guidance on enlisting the help of anthropology students to conduct interviews and observations in an ethnographic study. With its emphasis on qualitative research, this book will help readers learn what commuter students really need from academic libraries.

fresno state library research: Transforming Health Sciences Library Spaces Alanna Campbell, 2019-02-15 Transforming Health Sciences Library Spaces presents first-hand case studies and practical advice on transforming health sciences library spaces in the 21st century. Collected here are the experiences and thoughts of librarians on the transformation of health sciences library spaces. They provide insights into planning, budgeting, collecting, and integrating user feedback, collaborating with leadership and architects and thriving in the good times and the tight times. The book has three main sections: The Realities of Making Virtual Work Library Spaces that Work for Users Library Spaces Working with What They've Got These tackle crucial issues including: Identifying and overhauling dated spaces that lack flexibility Gathering information on usage behavior and user feedback in relation to our spaces. Working with feedback to increase satisfaction, and use of the library space with little funds. Removing a large percentage of the physical collection and deciding what to replace it with. Maximizing relationships with stakeholders such as leadership and external departments to transform the library space. Understanding what going 100% virtual means in practice. Managing usage of materials not traditionally well suited to online access.

fresno state library research: Libraries and Key Performance Indicators Leo Appleton,

2017-07-27 **Libraries and Key Performance Indicators: A Framework for Practitioners** explores ways by which libraries across all sectors can demonstrate their value and impact to stakeholders through quality assurance and performance measurement platforms, including library assessment, evaluation methodologies, surveys, and annual reporting. Whilst several different performance measurement tools are considered, the book's main focus is on one tool in particular: Key Performance Indicators (KPIs). KPIs are increasingly being used to measure the performance of library and information services, however, linking KPIs to quality outcomes, such as impact and value can prove very difficult. This book discusses, in detail, the concept of KPIs in the broader context of library assessment and performance measurement. Through reviewing some of the applied theory around using KPIs, along with harvesting examples of current best practices in KPI usage from a variety of different libraries, the book demystifies library KPIs, providing a toolkit for any library to be used in setting meaningful KPIs against targets, charters, service standards, and quality outcomes. - Provides an overview of performance measurement tools for libraries - Discusses KPIs in a broad context - Offers an understanding of reporting, monitoring, and acting upon KPI data - Provides best practice examples of Key Performance Indicators (KPIs) in libraries - Includes practical and reusable examples of KPIs that can be applied in local contexts (a toolkit approach)

fresno state library research: Company and Industry Research Hiromi Kubo, Thomas J. Ottaviano, 2016-06-27 The goal of this book is to describe information search strategies and techniques critical for business practitioners and to pinpoint credible sources of information on specific topics in company and industry research. In today's information age, businesses have an ever-growing need to obtain quality information in a timely manner and incorporate it effectively into decision making, and when such a need occurs business managers often face a situation of performing information research themselves with a limited budget. Rather than frantically running searches on random websites with much time wasted, it is imperative that they understand the nature of business information research, develop a systematic plan for data collection, and use appropriate information from credible sources. Learning and becoming familiar with the significance of these information resources is a key for successful business research.

fresno state library research: User Experience in Libraries Andy Priestner, Matt Borg, 2016-05-23 Modern library services can be incredibly complex. Much more so than their forebears, modern librarians must grapple daily with questions of how best to implement innovative new services, while also maintaining and updating the old. The efforts undertaken are immense, but how best to evaluate their success? In this groundbreaking new book from Routledge, library practitioners, anthropologists, and design experts combine to advocate a new focus on User Experience (or 'UX') research methods. Through a combination of theoretical discussion and applied case studies, they argue that this ethnographic and human-centred design approach enables library professionals to gather rich evidence-based insights into what is really going on in their libraries, allowing them to look beyond what library users say they do to what they actually do. Edited by the team behind the international UX in Libraries conference, *User Experience in Libraries* will ignite new interest in a rapidly emerging and game-changing area of research. Clearly written and passionately argued, it is essential reading for all library professionals and students of Library and Information Science. It will also be welcomed by anthropologists and design professionals working in related fields.
