french language camps in france: The Algerian War in French-Language Comics Jennifer Howell, 2015-10-08 The decolonization of Algeria represents a turning point in world history, marking the end of France's colonial empire, the birth of the Algerian republic, and the appearance of the Third World and pan-Arabism. Algeria emerged from colonial domination to negotiate the release of American hostages in Iran during the Carter administration. Radical Islam would later rise from the ashes of Algeria's failed democracy, leading to a civil war and the training of Algerian terrorists in Afghanistan. Moreover, the decolonization of Algeria offered an imperfect model of decolonization to other nations like South Africa that succeeded in abolishing apartheid while retaining its white settler population. Algeria and its war of national liberation therefore constitute an inescapable reference for those looking to understand today's "war on terror" and ever-expanding islamophobia in Western media circuits. Consequently, it is imperative that students and educators understand the global implications of the Algerian War and how to best approach this conflict in school and at home so as to learn from the consequences of misrepresentation at all levels of the memory transmission chain. These objectives are all the more important today given the West's misunderstanding and mischaracterization of Islam, the Arab Spring, the Muslim-majority world, and, most importantly, the continuing influence of French colonialism—especially in the postcolonial era. Conceived as a case study, *The Algerian War in French-Language Comics: Postcolonial Memory, History, and Subjectivity* argues that comics provide an alternative to textbook representations of the Algerian War in France because they draw from many of the same source

materials yet produce narratives that are significantly different. This book demonstrates that although comics rely on conventional vectors of memory transmission like national education, the family, and mainstream media, they can also create new and productive dialogues using these same vectors in ways unavailable to traditional textbooks. From this perspective, these comics are an effective and alternative way to develop a more inclusive social consciousness.

french language camps in france: The Age of Catastrophe Heinrich August Winkler, 2015-09-28 Characterized by global war, political revolution and national crises, the period between 1914 and 1945 was one of the most horrifying eras in the history of the West. A noted scholar of modern German history, Heinrich August Winkler examines how and why Germany so radically broke with the normative project of the West and unleashed devastation across the world. In this total history of the thirty years between the start of World War One and the dropping of atomic bombs on Hiroshima and Nagasaki, Winkler blends historical narrative with political analysis and encompasses military strategy, national identity, class conflict, economic development and cultural change. The book includes astutely observed chapters on the United States, Japan, Russia, Britain, and the other European powers, and Winkler's distinctly European perspective offers insights beyond the accounts written by his British and American counterparts. As Germany takes its place at the helm of a unified Europe, Winkler's fascinating account will be widely read and debated for years to come.

french language camps in france: Alsace to the Alsatians? Christopher J. Fischer, 2014-04-01 The region of Alsace, located between the hereditary enemies of France and Germany, served as a trophy of war four times between 1870-1945. With each shift, French and German officials sought to win the allegiance of the local populace. In response to these pressures, Alsatians invoked regionalism—articulated as a political language, a cultural vision, and a community of identity—not only to define and defend their own interests against the nationalist claims of France and Germany, but also to push for social change, defend religious rights, and promote the status of the region within the larger national community. Alsatian regionalism however, was neither unitary nor unifying, as Alsatians themselves were divided politically, socially, and culturally. The author shows that the Janus-faced character of Alsatian regionalism points to the ambiguous role of regional identity in both fostering and inhibiting loyalty to the nation. Finally, the author uses the case of Alsace to explore the traditional designations of French civic nationalism versus German ethnic nationalism and argues for the strong similarities between the two countries' conceptions of nationhood.

french language camps in france: White War, Black Soldiers Bakary Diallo, Lamine Senghor, 2021-02-24 Strength and Goodness (Force-Bonté) by Bakary Diallo is one of the only memoirs of World War I ever written or published by an African. It remains a pioneering work of African literature as well as a unique and invaluable historical document about colonialism and Africa's role in the Great War. Lamine Senghor's The Rape of a Country (La Violation d'un pays) is another pioneering French work by a Senegalese veteran of World War I, but one that offers a stark contrast to Strength and Goodness. Both are made available for the first time in English in this edition, complete with a glossary of terms and a general historical introduction. The centennial of

World War I is an ideal moment to present Strength and Goodness and The Rape of a Country to a wider, English-reading public. Until recently, Africa's role in the war has been neglected by historians and largely forgotten by the general public. Euro-centric versions of the war still predominate in popular culture, Many historians, however, now insist that African participation in the 1914-18 War is a large part of what made that conflict a world war.

french language camps in france: Dreaming in French Alice Kaplan, 2022-12-22 Alice Kaplan's triple portrait of three iconic mid-century American women dazzles beyond our evergreen fascination with [their] wildly disparate lives. —Patricia Hampl, New York Times Notable author A year in Paris . . . since World War II, countless American students have been lured by that vision—and been transformed by their sojourn in the City of Light. Dreaming in French tells three stories of that experience, and how it changed the lives of three extraordinary American women. All three women would go on to become icons, key figures in American cultural, intellectual, and political life, but when they embarked for France, they were young, little-known, uncertain about their future, and drawn to the culture, sophistication, and drama that only Paris could offer. Yet their backgrounds and their dreams couldn't have been more different. Jacqueline Bouvier was a twenty-year-old debutante, a Catholic girl from a wealthy East Coast family. Susan Sontag was twenty-four, a precocious Jewish intellectual from a North Hollywood family of modest means, and Paris was a refuge from motherhood, a failing marriage, and graduate work in philosophy at Oxford. Angela Davis, a French major at Brandeis from a prominent African American family in Birmingham, Alabama, found herself the only black student in her year abroad program—in a summer when all the news from Birmingham was of unprecedented racial violence. Kaplan takes readers into the lives, hopes, and ambitions of these young women, tracing their paths to Paris and tracking the discoveries, intellectual adventures, friendships, and loves that they found there—experiences that would continue to influence them for the rest of their lives. An elegant and entertaining work. —Minneapolis Star-Tribune
