from tip to toe teacher thanks: International Perspectives on Teacher Professional Development Susan Rodrigues, 2005 Teacher professional development is subject to reform as a consequence of three, often interwoven influences: innovation, politics and pedagogy. For example, recent decades have seen learning and teaching take centre stage. As technologies have become more accessible and relevant, so professional development has had to keep pace, in order to provide teachers with an opportunity to develop skills and experiences to deal with this innovation. In terms of politics, as the prescription of input and the measurement of output are regulated and deregulated by the State, so teacher professional development shifts to meet accountability and credibility demands. Likewise, as our understanding of learning and teaching evolves, in terms of knowledge, processes, dispositions and evaluation, subsequent teacher professional development programmes responded to these current or in-vogue research findings. This new and much-needed book describes how teacher professional development in science education, from initial teacher education to continuing professional development, continues to face and address the various challenges that arise as a consequence of innovation, politics or pedagogy.

from tip to toe teacher thanks: *Sword in the Darkness* Paolo Bicchieri, 2019-11-27 *Sword in the Darkness* is a West Coast misadventure. Three teens find themselves thrust into a mythological power struggle spanning countries and cultures. Through no mere coincidence, all three are drawn to Brewer's Yawn, a recently and bizarrely formed cave in the Deschutes Forest of Central Oregon. There they meet Archibald and Shanna, owners and operators of The Ore-gone-ian cafe, who guide them along the way. They discover a sword hidden in the cave that is powerful enough to shape reality. But other forces want the magical artifact, too. The travelers will have to realize their power to stop the malevolent King Karrabad and escape his lair, with the help of some Klamath Native legends. Along the way, they see that they may have had the power to shape their worlds before they ever stumbled into Brewer's Yawn. from tip to toe teacher thanks: Measure of the Rule Robert Barr, 1973-12-15 Robert Barr has been almost completely overlooked by critics and anthologists of Canadian literature, in part because, although he was educated in Canada, he spent most of his life in the United States and England. However, since most of his serious novels are either set in Canada or have some Canadian connection, Barr deserves attention. *The Measure of the Rule*, originally published in 1907, is the nearest he came to writing an autobiographical novel. It concerns the Toronto Normal School and the experiences there in the 1870s of a young man who undoubtedly is Barr himself. In this novel, Barr is exorcising unhappy memories and is ironic, even bitter, about the school's quality of education, the rigid discipline observed by its staff and their indifference to their students, and the

sexual segregation practiced. A number of men under whom Barr actually studied are vividly caricatured. As a realistic study of Ontario's only central teacher-training institution in the late nineteenth century, *The Measure of the Rule* will appeal both to those interested in Canadian fiction of that period and to those more concerned with the evolution of the system of education established by Egerton Ryerson. Also included with this reprint of the novel is an essay originally published in 1899 and entitled 'Literature in Canada.' In this essay, Barr elaborated upon his opinions of the school system and its quality of education.

from tip to toe teacher thanks: *Transgressing Teacher Education* Alice E. Ginsberg, 2022-02-15 This book is a series of original strategies that teacher educators, teacher candidates and practicing teachers can use to think critically about issues of equity, diversity, opportunity, and social justice in urban education. As the demographic of students in America is quickly becoming a "majority minority" we need teachers more than ever who can teach to diverse student populations, can utilize culturally relevant pedagogy, and have critically reflected on their own biases and stereotypes. We also need to empower teachers who are committed to social justice to navigate through school systems that are rife with structural inequities. This book will help ensure that teacher candidates are getting this preparation and able to continue to reflect on these issues in their practice. The book is designed as a "textbook" or more accurately "workbook" with original strategies and critical reflection and discussion questions included in each chapter. The strategies can be done sequentially or in any order. In addition, they will be able to read counternarratives from their peers, which should encourage them to persist in the profession even when things get rough
