frontiers in psychology impact factor 2023: Cognitive Benefits of Technologies Applied to Learning in Education Beatriz Peña-Acuña, Yolanda Navarro Abal, Pedro Román-Graván, Pedro Tadeu, Manuel León-Urrutia, Javier Ávila-López, Rafael Crismán Crismán Pérez, Carmen M. Toscano-Fuentes, Carmen María Martín Del Pino, 2025-03-12 In general, scientific inquiry about the benefits of digital gadgets focused on learning at all stages of Education is providing cognitive, affective, and attitudinal variables. However, cognitive effects stand out among these effects. In this topic of inquiry that we propose, we intend to investigate the phenomenon from a simple discipline to a multidisciplinary point of view, that is, from interventions that work transversally on some transversal theme in different disciplines or with a review approach from various points of view. We also propose it to deepen the phenomenon with interventions that are investigated from an interdisciplinary perspective, taking into account the qualitative and/or quantitative study of a variable from one discipline and another variable from another discipline. Likewise, other studies of the cognitive effects of technologies in learning with paradigms or innovative approaches and evaluation of more complex interventions can be considered. We are in a moment of transition from the use of analogue materials to digital tools (platforms, applications, gadgets, tablets, mobiles, etc.) and advanced technology formats (immersive realities and artificial intelligence). This is a moment of technological transformation in which the benefits of new technologies in learning are beginning to be investigated both in interventions with grouping in individual perspective or in an interactive and collaborative perspective among equals. It also coincides with the development of neuroscience and psychology applied to Education. This research topic aims to contribute to deepen this topic and provide a global vision. It also intends to indicate to what extent the development of the cognitive is relevant, as well as to extend the variables that must be considered.

frontiers in psychology impact factor 2023: The Power of Music Sheku Kanneh-Mason, 2025-05-01 'Sheku believes that the future of classical music is bright, and in the hands of young musicians like him, it certainly is' John Suchet Music is what makes us alive, mindful and connected to each other. Music is what makes us human. This is the power of music. Cellist Sheku Kanneh-Mason knows and feels the transformative power of music as much as any musician alive. From winning the prestigious BBC Young Musician Award to performing at Harry and Meghan's wedding; from Bach's solo suites to Bob Marley's reggae; his ferocious passion shines through in every single performance, whether in a packed-out concert hall or on record. But how was it that someone like him - a person of colour, from a state school in Nottingham - rose to the upper echelons of the classical music world? What were the obstacles that he had to overcome, what did he learn along the way, and how could a young person follow in his footsteps today? In The Power of Music, Sheku explores the experiences and values that led him here, from a childhood of football practice and family music sessions, to his work today in the world's finest concert halls and in the less privileged communities that surround them. As his star continues to rise, he shows us the darker side of an industry ruled by exclusivity and stubborn adherence to tradition. With its power to transform our mental and physical health, to effect social change, and to make a house a home, Sheku shows us that classical music is for everyone, not just an elite few. The Power of Music is a celebration of music of all sorts and those who make it, and a rallying call to change. 'A heartfelt plea for the importance of excellence in music performance and education, from one of the leading role models of our time' Sir Nicholas Kenyon, former director of the BBC Proms and Barbican Centre 'Powerful and inspiring' Sir Stephen Hough
