i hate therapy reddit: *Combating Hate* Billie Murray, 2022-05-03 The United States has a hate

problem. In recent years, hate speech has led not only to deep division in our politics but also to violence, murder, and even insurrection. And yet established constitutional jurisprudence holds that all speech is protected as “content neutral” and that the proper democratic response to hateful expression is not regulation but “more speech.” So how can ordinary citizens stand up to hate groups when the state will not? In *Combating Hate*, Billie Murray proposes an answer to this question. As a participant in anti-racist and anti-fascist protests, including demonstrations against the Ku Klux Klan, neo-Nazis, and the Westboro Baptist Church, Murray witnessed firsthand the limitations of the “more speech” approach as well as the combative tactics of anti-fascist activists. She argues that this latter group, commonly known as antifa, embodies a radically different strategy for combating hate, one that explodes the myth of content neutrality and reveals hate speech to be a tactic of fascist organizing with very real, highly anti-democratic consequences. Drawing on communication theory and this on-the-ground experience, Murray presents a new strategy, which she calls “allied tactics,” rooted in the commitment to affirm, support, and even protect those who are the victims of hate speech. Engaging and sophisticated, *Combating Hate* contends that there are concrete ways to fight hate speech from the front lines. Murray’s urgent argument that we reconsider how to confront and fight this blight on American life is essential reading for the current era.

i hate therapy reddit: Social Work in the Age of Disconnection Michael Jarrette-Kenny, Miriam Jaffe, 2022-05-05 This edited text brings together the stories of nine clinical social workers working during COVID-19, exploring the disconnections caused by a forced use of technology as well as the disconnections apparent in a time of social injustice. Employing narrative strategies to capture this transformative moment of our history, these chapters explore the effects of technology and social media on psychotherapy, the delivery of services for the chronically mentally ill and elderly, as well as the consequences of recent cultural shifts on our conceptions of gender, sexuality, race, the immigrant experience, and political activism. While traditional research methodologies tend to address social problems as if they were divorced from the lives and experiences of human beings, these chapters employ phenomenological description of how the existing system functions, to identify theory-to-practice gaps and to recover the experiences of the person within the various institutional structures. Divided into three parts, each chapter begins with pre-reading and close reading questions and ends with writing prompts, allowing for practitioners and students to examine their own thoughts, and put what they have learnt into practice. Suitable for students of clinical social work and practicing mental health professionals, this book is essential for those wanting to make sense of social work practice in our constantly evolving times.

i hate therapy reddit: Jumped Up Feminazis Conrad Riker, 101-01-01 Your Life Was Hijacked — And You Were Blamed for It Have you ever been told you're "toxic" for wanting respect? Have you stayed silent while women destroyed men's lives — then cried victim? Have you watched your country collapse under female-led ideologies — and been called a hater for speaking up? This book exposes what no one dares say: that modern leftism is not an ideology — it's a biological impulse weaponized through feminism, Marxism, and institutionalized misandry. It reveals how female nature — emotionally driven, collectivist, status-obsessed, and biologically primed for infant protection — has hijacked politics, law, education, and culture to serve its own unmet maternal cravings. You'll discover: - How feminism is not about equality — it's female supremacy disguised as justice - Why Marxism appeals to women — it's infantilism dressed as revolution - The truth behind "equity": a demand for tyrannical fairness that punishes men - How women weaponize emotion, tears, and victimhood to control and destroy - Why women dominate mental health crises — and drag society down with them - The hidden link between female gossip networks and woke cancel culture - How female suffrage and consumer power have turned democracy into a gynocracy - Why men are being erased — and told they deserve it If you want to understand how the world was stolen from men — and how to get it back — buy this book today.

i hate therapy reddit: BoyMom Ruth Whippman, 2024-06-04 Combining painfully honest memoir, cultural analysis, and reporting, BoyMom is a humorous and heartbreaking deep dive into the complexities of raising boys in our fraught political moment. "Rapist, school-shooter, incel, man-child, interrupter, mansplainer, boob-starer, birthday forgetter, frat boy, dude-bro, homophobe, self-important stoner, emotional-labor abstainer, non-wiper of kitchen counters. Trying to raise good

sons suddenly felt like a hopeless task.” As the culture wars rage, and masculinity has been politicized from all sides, feminist writer and mother of three boys Ruth Whippman finds herself conflicted and scared. While the right pushes a dangerous vision of fantasy manhood, her feminist peers often dismiss boys as little more than entitled predators-in-waiting. Meanwhile her home life feels like a daily confrontation with the triumph of nature over nurture. With young men in the grip of a loneliness epidemic and dying by suicide at a rate of nearly four times their female peers, Whippman asks: How do we raise our sons to have a healthy sense of self without turning them into privileged assholes? How can we find a feminism that holds boys to a higher standard but still treats them with empathy? And what do we do when our boys won’t cooperate with our plans? Whippman digs into the impossibly contradictory pressures boys now face; and the harmful blind spots of male socialization that are leaving boys isolated, emotionally repressed, and adrift. Feminist gonzo-style, she spends months interviewing incels, reports on a conference for boys accused of sexual assault; crashes at a residential therapy center for young men in Utah, talks to a wide range of psychologists and other experts, and gets boys of all backgrounds to open up about sex, consent, porn, body image, mental health, cancel culture, screens, friendship and loneliness. Along the way, she finds her simple certainties about male privilege seriously challenged. With wit, honesty, and a refusal to settle for easy answers, BoyMom charts a new path to give boys a healthier, more expansive, and fulfilling story about their own lives.

i hate therapy reddit: Irreversible Damage Abigail Shrier, 2020-06-30 NAMED A BOOK OF THE YEAR BY THE ECONOMIST AND ONE OF THE BEST BOOKS OF 2021 BY THE TIMES AND THE SUNDAY TIMES Irreversible Damage . . . has caused a storm. Abigail Shrier, a Wall Street Journal writer, does something simple yet devastating: she rigorously lays out the facts. —Janice Turner, The Times of London Until just a few years ago, gender dysphoria—severe discomfort in one’s biological sex—was vanishingly rare. It was typically found in less than .01 percent of the population, emerged in early childhood, and afflicted males almost exclusively. But today whole groups of female friends in colleges, high schools, and even middle schools across the country are coming out as “transgender.” These are girls who had never experienced any discomfort in their biological sex until they heard a coming-out story from a speaker at a school assembly or discovered the internet community of trans “influencers.” Unsuspecting parents are awakening to find their daughters in thrall to hip trans YouTube stars and “gender-affirming” educators and therapists who push life-changing interventions on young girls—including medically unnecessary double mastectomies and puberty blockers that can cause permanent infertility. Abigail Shrier, a writer for the Wall Street Journal, has dug deep into the trans epidemic, talking to the girls, their agonized parents, and the counselors and doctors who enable gender transitions, as well as to “detransitioners”—young women who bitterly regret what they have done to themselves. Coming out as transgender immediately boosts these girls’ social status, Shrier finds, but once they take the first steps of transition, it is not easy to walk back. She offers urgently needed advice about how parents can protect their daughters. A generation of girls is at risk. Abigail Shrier’s essential book will help you understand what the trans craze is and how you can inoculate your child against it—or how to retrieve her from this dangerous path.

i hate therapy reddit: Determined Robert M. Sapolsky, 2023-10-17 The instant New York Times bestseller “Excellent . . . Outstanding for its breadth of research, the liveliness of the writing, and the depth of humanity it conveys.” -Wall Street Journal One of our great behavioral scientists, the bestselling author of Behave, mounts a devastating scientific and philosophical case against free will—an argument with profound consequences Robert Sapolsky’s Behave, his now classic account of why humans do good and why they do bad, pointed toward an unsettling conclusion: we may not grasp exactly how nature and nurture create the physics and chemistry that cause all human behavior, but that doesn’t mean they don’t exist. In Determined, Sapolsky takes his argument all the way, mounting a brilliant (and in his inimitable way, delightful) full-frontal assault on the pleasant fantasy that there is some separate self who tells our biology what to do. Determined offers a marvelous synthesis of what we know about consciousness—the tight weave between reason and

emotion and between stimulus and response in the moment and over a life. One by one, Sapolsky takes out all the major arguments for free will, cutting a path through the thickets of chaos theory and quantum physics. But as Sapolsky acknowledges, it's sometimes impossible to uncouple from our zeal to judge people, including ourselves. Determined applies this new understanding to some of our most essential questions around punishment, morality, and living well together. Most of all, Sapolsky argues that while accepting the reality about free will is monumentally difficult, it will make for a much more humane world.

i hate therapy reddit: The Feminine Singularity Conrad Riker, 101-01-01 The Left's War on Men Is Just Female Nature in Disguise Have you ever been called a misogynist for simply disagreeing with a woman? Have you watched Western institutions collapse while women lead the charge—and claim it's "justice"? It's the reverse engineering of a psychological epidemic. What looks like political ideology is actually biological script—female nature dressed as moral progress. What passes for social justice is maternal authoritarianism scaled to civilization-killing proportions. The left didn't invent this—it was built by women, for women, using the language of care to mask control. You'll discover: - How "equity" is just maternal favoritism weaponized into public policy - Why women dominate victimhood hierarchies—and why men are always the villains - The real reason feminism and Marxism fused—and who benefits - How female emotional intensity became the engine of cancel culture - Why women abandoned motherhood—and replaced it with political mothering - The psychological profile of the modern woman—and how it maps perfectly onto leftist dogma - How language has been hijacked to punish dissent and reward female whim - Why men are taxed, shamed, and silenced—while women are never held accountable If you want to understand how the world flipped—and how to think clearly again despite the propaganda—buy this book today.

i hate therapy reddit: *Black Friend* Ziwe, 2023-10-17 From the writer crowned one of the smartest, funniest voices in modern America, this hotly anticipated debut collection of essays offers "a precious glimpse into how Ziwe's uniquely fearless mind functions" (New York) Ziwe made a name for herself staring interviewees in the eye and asking, "How many Black friends do you have?" She's an expert at making people squirm, coming right out and asking the tough questions about race and racism that our culture has made white people experts at dancing around. In *Black Friend*, she turns this incisive perspective on the culture at large, with her signature blend of bluntness and warmth that keeps her guests coming back. Throughout the book, Ziwe mixes big-picture concepts like critical race theory and white privilege with pop-culture commentary and her own personal life story. From a cringe-inducing story of mistaken identity via a Jumbotron to an all-too-real fight-or-flight encounter in the woods, Ziwe tackles questions about race head on and in a manner that evokes the way it comes up in the real world—not through deliberate studies of history and theory, which are so important, but in an awkward conversation at a party or a "yikes" comment

from a coworker in the break room. The book lives in the moment of discomfort that can be the most truly educational way of unlearning biases. Plus, like everything Ziwe does, it will startle you with how much it makes you laugh.
