Clark, George Ella Lyon, John Ed Pearce, Gerald L. Smith, Michal Smith-Mello, and Michael T. Childress. Photographs by Dan Dry of Louisville, Kentucky. excerpt: Where are you from? Kentucky, I say. I'm from a place where people still stop for funerals, where they know who your grandmother was, where they tell stories at Corn Island at the state park at the dinner table where they pass on their youngest's outgrown clothes and bring a casserole as soon as someone dies. --George Ella Lyon

imax louisville science center: A History Lover's Guide to Louisville Bryan S. Bush, 2021-04-05 Gateway to the South. Home of the Kentucky Derby and Churchill Downs. Louisville has a rich history, beginning with the city's discovery by General George Rogers Clark. The city played an important role in the Civil War, and during the Gilded Age, it became the Bourbon Capital of the World. During World War I, the city hosted 47,500 troops at Camp Zachary Taylor. During World War II, the U.S. Naval Ordnance Plant contributed to the war effort, making rounds for big guns during the late war. Author Bryan S. Bush takes the reader on a journey to discover the history of Louisville through the historic sites and locations from far past to the present day.

imax louisville science center: Resources for Teaching Elementary School Science

National Science Resources Center of the National Academy of Sciences and the Smithsonian Institution, 1996-04-28 What activities might a teacher use to help children explore the life cycle of butterflies? What does a science teacher need to conduct a leaf safari for students? Where can children safely enjoy hands-on experience with life in an estuary? Selecting resources to teach elementary school science can be confusing and difficult, but few decisions have greater impact on the effectiveness of science teaching. Educators will find a wealth of information and expert guidance to meet this need in *Resources for Teaching Elementary School Science*. A completely revised edition of the best-selling resource guide *Science for Children: Resources for Teachers*, this new book is an annotated guide to hands-on, inquiry-centered curriculum materials and sources of help in teaching science from kindergarten through sixth grade. (Companion volumes for middle and high school are planned.) The guide annotates about 350 curriculum packages, describing the activities involved and what students learn. Each annotation lists recommended grade levels, accompanying materials and kits or suggested equipment, and ordering information. These 400 entries were reviewed by both educators and scientists to ensure that they are accurate and current and offer students the opportunity to: Ask questions and find their own answers. Experiment productively. Develop patience, persistence, and confidence in their own ability to solve real problems. The entries in the curriculum section are grouped by scientific area—Life Science, Earth Science, Physical Science, and Multidisciplinary and Applied Science—and by type—core materials, supplementary materials, and science activity books. Additionally, a section of references for teachers provides annotated listings of books about science and teaching, directories and guides to science trade books, and magazines that will help teachers enhance their students' science education. *Resources for Teaching Elementary School Science* also lists by region and state about 600 science centers, museums, and zoos where teachers can take students for interactive science

experiences. Annotations highlight almost 300 facilities that make significant efforts to help teachers. Another section describes more than 100 organizations from which teachers can obtain more resources. And a section on publishers and suppliers give names and addresses of sources for materials. The guide will be invaluable to teachers, principals, administrators, teacher trainers, science curriculum specialists, and advocates of hands-on science teaching, and it will be of interest to parent-teacher organizations and parents.
