"This book is a beacon of resilience. . . . A must-read for anyone committed to growth."—Erica Chidi Cohen, author of *Nurture* We've all been there: We take a pause, look at our lives, and desire more—more from our relationships, more from our wellness journeys, maybe simply more from ourselves. For some, it might be more fun, more peace, more exploration—but what does it take to get to the other side of living in survival mode? In *On Thriving*, Brandi Sellerz-Jackson helps us wade through what she calls the four great labors of our lives—labors that she's had to overcome and that she has led many clients through. Drawing from her experiences as a doula and intimate storytelling from her own life, Sellerz-Jackson guides us through the many phases of these great labors—labors that we can get stuck in, stunting our ability to thrive. Across age, gender, economic status, or background, we all move through the great labor of our relationships, our mental health, grief and loss, and the feeling of being othered. Sellerz-Jackson doesn't shy away from the pitfalls of these labors but rather challenges us to actively remain present within them and ask ourselves: What do I need to thrive in the space I'm currently in? In *On Thriving*, you'll come to recognize the survival tools you've picked up along the way and exchange them for thriving tools and "rich-uals." You'll commit to no longer making a home out of chaos and rediscovering sanctuary within yourself. Comparing our thriving to that of plant life, Sellerz-Jackson simplifies the complicated—and oftentimes overwhelming—journey as we attempt to grow in an inhospitable environment. With insightful and vulnerable storytelling, she invites a deep, soul-stirring investigation of our past and present to gather all that we need to thrive right where we are, right now.

impact strategies angela rye: White Fear Roland Martin, Leah Lakins, 2022-09-13 White Fear has shaped our democracy and society from the beginning—and today, it's more intense and visible than ever. To neutralize it, we must first understand it. For two centuries, the deep-seated fear that many White people feel—of losing power, of losing economic standing, of losing a particular “way of life”—has been the driving force behind American politics and culture. White Fear enabled the rise of Donald Trump. It's behind the recent flood of restrictive voting laws disproportionately impacting people of color. It's why reactions to movements like Black Lives Matter and football players taking a knee have been so negative and so strong. As we approach a future where White people will become a racial the minority in the US, something estimated to occur as early as 2043, that fear is only intensifying, festering, and becoming more visible. Are we destined for a violent clash? What can we do to step into our country's inevitable future, without tearing ourselves apart in the process? Nationally renowned journalist and award-winning author Roland Martin has been sounding this alarm for more than a decade. In White Fear, he provides a primer on how White Fear has shaped, and continues to shape, our democracy and our culture. He connects the separate puzzle pieces, from the Tea Party Movement to the decline of White American optimism to the diminishing blue-collar workforce, to illuminate the larger picture of what will unfold in America over the next decade-plus, and offers a better way forward. If we want to create the kind of country that we're all welcome in and proud to live in, we can no longer ignore White Fear. We must learn to recognize, understand, and dismantle it. And as the last few years have shown, we don't have any time to lose.

impact strategies angela rye: True to the Land Paul van Reyk, 2021-10-11 Spanning 65,000 years, this book provides a history of food in Australia from its beginnings, with the arrival of the first peoples and their stewardship of the land, to a present where the production and consumption of food is fraught with anxieties and competing priorities. It describes how food production in Australia is subject to the constraints of climate, water, and soil, leading to centuries of unsustainable agricultural practices post-colonization. Australian food history is also the story of its xenophobia and the immigration policies pursued, which continue to undermine the image of Australia as a model multicultural society. This history of Australian food ends on a positive note, however, as Indigenous peoples take increasing control of how their food is interpreted and marketed.

impact strategies angela rye: Wild Things Frederick W. F. Foulds, Helen C. Drinkall, Angela R. Perri, David T.G. Clinnick, James W.P. Walker, 2014-11-30 Recently, Palaeolithic and Mesolithic archaeology has been breaking boundaries worldwide. Finds such as the Mesolithic house at Howick, the sequencing of the Neanderthal genome, and the recently discovered footprints at Happisburgh all serve to indicate how archaeologists in these fields are truly at the cutting edge of understanding humanity's past. This volume celebrates this trend by focusing on recent advances in the study of the Palaeolithic and Mesolithic. With contributors from a diverse range of backgrounds, it allows for a greater degree of interdisciplinary discourse than is often the case, as the Palaeolithic and Mesolithic are generally split apart. Wild Things brings together contributions from major researchers and early career specialists, detailing research taking place across the British Isles, France, Portugal, Russia, the Levant and Europe as a whole, providing a cross-section of the exciting range of research being conducted. By combining papers from both these periods, it is hoped that

dialogue between practitioners of Palaeolithic and Mesolithic archaeology can be further encouraged. Topics include: the chronology of the Mid-Upper Palaeolithic of European Russia; territorial use of Alpine high altitude areas by Mesolithic hunter-gatherer; discussing the feasibility of reconstructing Neanderthal demography to examine their extinction; the funerary contexts from the Mesolithic burials at Muge; the discovery of further British Upper Palaeolithic parietal art at Cathole Cave; exploitation of both lithics and fauna in Palaeolithic France; and an analysis of Mesolithic/Neolithic trade in Europe.
