Visit www.luminosoa.org to learn more. This multidisciplinary volume brings together experienced expert witnesses and immigration attorneys to highlight best practices and strategies for giving expert testimony in asylum cases. As the scale and severity of violence in Latin America has grown in the last decade, scholars and attorneys have collaborated to defend the rights of immigrant women, children, and LGBTQ+ persons who are threatened by gender-based, sexual, and gang violence in their home countries. Researchers in anthropology, history, political science, and sociology have regularly supported the work of immigration lawyers and contributed to public debates on immigration reform, but the academy contains untapped scholarly expertise that, guided by the resources provided in this handbook, can aid asylum seekers and refugees and promote the fair adjudication of asylum claims in US courts. As the recent refugee crisis of immigrant mothers and children and unaccompanied minors has made clear, there is an urgent need for academics to work with other professionals to build a legal framework and national network that can respond effectively to this human rights crisis.

immigration court practice manual 2023: Engage and Evade Asad L. Asad, 2023-06-13 Because immigration is such a recurring-and divisive-topic in the United States, it is easy to assume that we understand what it means for an immigrant to live under the specter of surveillance and punishment. It is easy to assume, as many scholars and journalists do, that undocumented immigrants live on the run from the authorities, constantly fleeing to the margins of daily life, staying in the shadows beneath the eyes of the law. And yet, while it is certainly true that immigrants are constantly faced with mechanisms of surveillance that function as tools of societal exclusion, this only tells part of the story. As Asad L. Asad shows, many people with a sanctionable status cannot-and, in some cases, do not want to-evade surveilling institutions or the formal records they generate: evading the institutions that keep formal records is a luxury that most immigrants (especially those with children) cannot afford. In Engage and Evade, Asad uses a wealth of interviews and ethnographic observations collected in Dallas County, Texas, bolstered and contextualized by original analyses of national survey data, to explore whether, how, and why immigrants engage with surveilling institutions. Presenting the stories of immigrants living in mixed-status families in which at least two members of the household have different legal statuses, and focusing especially on the experiences of immigrant parents, Asad argues that engagement with such institutions stems as much from hope for societal inclusion as it does from fear of exclusion. By paying attention to the ways in which immigrants make sense of, pursue, and use the records that result from these engagements, Asad reveals a variety of ways these individuals reinforce or resist their sanctionable status through the state's own surveillance--

immigration court practice manual 2023: Migration Governance in North America Kiran Banerjee, Craig Damian Smith, 2024-05-14 Millions of people arrive in North America each year, including highly skilled immigrants and temporary workers, refugees, and international students. Migration, border control, and asylum are ongoing flashpoints in Canadian, American, and Mexican relations, and deeply affect the domestic politics and economies of each country. While migration has emerged as an only increasingly charged topic in public discourse, research has largely focused on North America's lack of regional integration around mobility, often neglecting aspects of regional cooperation, hierarchy, and global engagement. Migration Governance in North America advances that conversation by examining the complex dynamics of mobilities across the continent through contemporary analysis and historical context. Situating North America within the global migration landscape, contributors from Canada, the United States, Mexico, and Europe unpack such issues as temporary labour mobility, border security, asylum governance, refugee resettlement, and the role of local actors and activists in coping with changing policies and politics. In the wake of a series of significant and likely enduring changes across the continent this flagship volume puts policy developments and migrant organizing in conversation across borders, investigates often contentious domestic, regional, and global migration politics, and reveals how intersecting policy frameworks affect the movement of people.
