in the know caregiver training: *Rural Caregiving in the United States* Ronda C. Talley, Kathleen Chwalisz, Kathleen C. Buckwalter, 2011-09-15 Caregivers living in rural areas face daunting obstacles. In addition to the isolation and anxiety that many caregivers across the country

experience, rural caregivers must also cope with limited access to uncoordinated resources and severe shortages of trained professionals. Although many research, policy, and practice upgrades have been made in response to caregivers' general concerns, the specific problems facing the rural caregiver have been less frequently addressed. Focusing on what is known as well as what is needed – and zeroing in on major subgroups within this diverse population – *Rural Caregiving in the United States* replaces misconceptions of the nonurban experience with real-life issues, findings, and solutions. For example, this pioneering volume: Covers a broad range of issues unique to rural caregiving, including research, education/training, policy, and practice. Identifies specific needs related to education, training, and support for rural caregivers. Examines both the positive and negative effects of rural living on caregivers as well as patients. Discusses the importance of in-home care in lieu of scarcer forms of for-profit care (e.g., hospitals). Addresses not only discrepancies between rural and urban health care systems but racial and ethnic disparities within rural health care. Explores the advantages of using information technology to address rural health care limitations. *Rural Caregiving in the United States* offers uniquely knowledgeable perspectives to researchers, practitioners, and graduate students in the caregiving fields, including psychology, social work, nursing, gerontology and geriatrics, medicine, public health, public policy, and educational policy.

in the know caregiver training: *Caregiver Follow Me* Patti Putnam, 2012-10 CAREGIVER FOLLOW ME is a unique book for chief caregivers of Alzheimer's patients living at home. Patti has heard the caregivers' pleas for help and has done something about it. Caregivers need help and that help can come in the form of a specially trained dog; an Alzheimer's dog that the caregiver can train themselves. Patti knows her subject from twenty-five years of hands-on-experience and generously gives her knowledge in language a lay person can understand. For clarification she uses photographs, illustrations, stories, and diagrams. The dog's explicit job is wander control and Patti's humane training methods have been proven to work. All of the training techniques that Patti developed for the Alzheimer's dogs are available to you. She knows that caregivers will experience pure joy as they journey with her in creating an Alzheimer's dog that becomes their partner in the confrontation against dementia. Together they can keep their loved one at home where they can provide maximum care with less stress. Using Patti's personal knowledge of her subject matter you will craft a working partnership with your dog that gives you peace of mind and offers a myriad of therapeutic benefits for your patient, yourself, and your entire family. Wouldn't it be nice to get a good night's sleep knowing that your dog is affectionately watching over your loved one listening for, hearing, and recognizing a potential wandering situation? There would be no more, What did I hear? Is she up? Should I get up again and check? Your dog will handle this for you and be absolutely delighted to perform its job. The only wage that your dog asks for is your acknowledgement that it has done its job, has pleased you, and will get oodles of your love. Primary to your success is establishing the idea that each training session, from the dog's viewpoint, is a game it can play with you for its entire life. You will be teaching your dog nine steps that, once put together, will be known as the pattern, which the dog will execute in order to successfully complete its work task. These nine

steps are taught from within five different environments; each one getting progressively more challenging for the dog. This way you can efficiently teach the dog what it must learn to become an Alzheimer's dog. Learn its language and listen to its voice--your dog is already reading you. Take pride in yourself and your dog. Teach your dog to hear for you.
