in flanders fields analysis: Hell in Flanders Fields George H. Cassar, 2010-08-30 On 22 April 1915, the men of the 1st Canadian Division faced chlorine gas, a new lethal weapon against which they had no defence. In defiance of a particularly horrible death, or, at the very least, severe lung injury, these untested Canadians fought almost continuously for four days, often hand-to-hand, as they clung stubbornly against overwhelming odds to a vital part of the Allied line after the French units on their left fled in panic. By doing so, they saved 50,000 troops in the Ypres salient from almost certain destruction, and, in addition, prevented the momentum of the war from tipping in favour of the Germans. In this new, deeply researched account, the distinguished military historian George H. Cassar skillfully blends into the history of the battle the graphic and moving words of the men on the front line. Illustrated with outstanding photographs and numerous maps, and drawing from diaries, letters, and documents from every level of planning, *Hell in Flanders Fields* is an authoritative, gripping drama of politics, strategy, and human courage.

in flanders fields analysis: Catching the Torch Neta Gordon, 2014-03-25 *Catching the Torch* examines contemporary novels and plays written about Canada's participation in World War I. Exploring such works as Jane Urquhart's *The Underpainter* and *The Stone Carvers*, Jack Hodgins's *Broken Ground*, Kevin Kerr's *Unity* (1918), Stephen Massicotte's *Mary's Wedding*, and Frances Itani's *Deafening*, the book considers how writers have dealt with the compelling myth that the Canadian nation was born in the trenches of the Great War. In contrast to British and European remembrances of WWI, which tend to regard it as a cataclysmic destroyer of innocence, or

Australian myths that promote an ideal of outsize masculinity, physical bravery, and white superiority, contemporary Canadian texts conjure up notions of distinctively Canadian values: tolerance of ethnic difference, the ability to do one's duty without complaint or arrogance, and the inclination to show moral as well as physical courage. Paradoxically, Canadians are shown to decry the horrors of war while making use of its productive cultural effects. Through a close analysis of the way sacrifice, service, and the commemoration of war are represented in these literary works, *Catching the Torch* argues that iterations of a secure mythic notion of national identity, one that is articulated via the representation of straightforward civic and military participation, work to counter current anxieties about the stability of the nation-state, in particular anxieties about the failure of the ideal of a national character.

in flanders fields analysis: *No Place to Run* Tim Cook, 2011-11-01 Historians of the First World War have often dismissed the important role of poison gas in the battles of the Western Front. In *No Place to Run*, however, Tim Cook shows that the serious threat of gas did not disappear with the introduction of gas masks. By 1918, gas shells were used by all armies to deluge the battlefield, and those not instructed with a sound anti-gas doctrine left themselves exposed to this new chemical plague. Cook uses fascinating primary sources -- diaries, letters, reminiscences, published memoirs, and the official archival record -- to illustrate the horror of gas warfare for the average trench soldier. As the first chlorine clouds rolled across the fields during the 2nd Battle of Ypres, soldiers were forced to stuff urine-soaked handkerchiefs in their mouths in order to survive. As the gas war evolved, mustard gas plagued the soldiers at the front as it lay active in mud and snow for weeks on end. There was no escape from the pervasive nature of poison gas. Entering the dug-outs, it attacked men when they were least ready. In response, the Canadian Corps had to develop an anti-gas doctrine, a process that Cook describes in full. *No Place to Run* provides a challenging

re-examination of the function of gas warfare in the First World War, including its important role in delivering victory in the campaign of 1918 and its curious postwar legacy. It will be of interest both to historians and military buffs.

in flanders fields analysis: *Conflict Landscapes and Archaeology from Above* Birger Stichelbaut, David Cowley, 2016-12-05 The study of conflict archaeology has developed rapidly over the last decade, fuelled in equal measure by technological advances and creative analytical frameworks. Nowhere is this truer than in the inter-disciplinary fields of archaeological practice that combine traditional sources such as historical photographs and maps with 3D digital topographic data from Airborne Laser Scanning (ALS) and large scale geophysical prospection. For twentieth-century conflict landscapes and their surviving archaeological remains, these developments have encouraged a shift from a site oriented approach towards landscape-scaled research. This volume brings together an wide range of perspectives, setting traditional approaches that draw on historical and contemporary aerial photographs alongside cutting-edge prospection techniques, cross-disciplinary analyses and innovative methods of presenting this material to audiences. Essays from a range of disciplines (archaeology, history, geography, heritage and museum studies) studying conflict landscapes across the globe throughout the twentieth century, all draw on aerial and landscape perspectives to past conflicts and their legacy and the complex issues for heritage management. Organized in four parts, the first three sections take a broadly chronological approach, exploring the use of aerial evidence to expand our understanding of the two World Wars and the Cold War. The final section explores ways that the aerial perspective can be utilized to represent historical landscapes to a wide audience. With case studies ranging from the Western Front to the Cold War, Ireland to Russia, this volume demonstrates how an aerial perspective can both support and challenge traditional archaeological and historical analysis, providing an innovative new means of engaging with the material culture of conflict and commemoration.

in flanders fields analysis: Social Imaginaries in a Globalizing World Hans Alma, Guido Vanheeswijck, 2018-08-06 How to study the contemporary dynamics between the religious, the nonreligious and the secular in a globalizing world? Obviously, their relationship is not an empirical datum, liable to the procedures of verification or of logical deduction. We are in need of alternative conceptual and methodological tools. This volume argues that the concept of 'social imaginary' as it is used by Charles Taylor, is of utmost importance as a methodological tool to understand these dynamics. The first section is dedicated to the conceptual clarification of Taylor's notion of social imaginaries both through a historical study of their genealogy and through conceptual analysis. In the second section, we clarify the relation of 'social imaginaries' to the concept of (religious) worldviewing, understood as a process of truth seeking. Furthermore, we discuss the practical usefulness of the concept of social imaginaries for cultural scientists, by focusing on the concept of human rights as a secular social imaginary. In the third and final section, we relate Taylor's view on the role of social imaginaries and the new paths it opens up for religious studies to other analyses of the secular-religious divide, as they nowadays mainly come to the fore in the debates on what is coined as the 'post-secular.'

in flanders fields analysis: Belgian Museums of the Great War Karen Shelby, 2017-09-20 Belgian Museums of the Great War: Politics, Memory, and Commerce examines the handling of the centennial of World War I by several museums along the Western Front in Flanders, Belgium. In the twenty-first century, the museum has become a strategic space for negotiating ownership of and access to knowledge produced in local settings. The specific focus on museums and commemorative events in Flanders allows for an in-depth evaluation of how each museum works with the remembrance and tourist industry in the region while carving a unique niche. Belgian Museums of the Great War writes the history of these institutions, analyzes the changes made in advance of the anniversary years, and considers the site-specificity of each institution and its architectural frame. Since museums not only transmit information but also shape knowledge, as Eileen Hooper-Greenhill has noted, the diverse narratives and community programs sponsored by each museum have served to challenge prior historiographies of the war. Through newly revamped interactive environments, self-guided learning, and an emphasis on the landscape, the museums in Flanders have a significant role to play in the ever-changing dialogue on the meaning of the history and remembrance of the Great War.
