

indian institute of technology architecture

indian institute of technology architecture represents a pinnacle of architectural education and innovation within India's premier technological institutions. The Indian Institutes of Technology (IITs) have long been recognized for their excellence in engineering and technology, and their architecture departments have developed into centers of creative and technical expertise. This article explores the various facets of the indian institute of technology architecture, including academic programs, research initiatives, faculty expertise, and campus infrastructure. It highlights how these factors contribute to nurturing future architects who are well-versed in sustainable design, digital technologies, and urban planning. Additionally, the article examines the significance of IITs in shaping India's architectural landscape and the global impact of their alumni. The following sections provide a detailed overview of these key aspects to offer a comprehensive understanding of indian institute of technology architecture.

- Overview of Indian Institute of Technology Architecture Departments
- Academic Programs and Curriculum
- Research and Innovation in IIT Architecture
- Campus Facilities and Infrastructure
- Notable Alumni and Their Contributions
- Future Prospects and Industry Connections

Overview of Indian Institute of Technology Architecture Departments

The indian institute of technology architecture departments are integral parts of several IIT campuses, each offering specialized education and training in architectural sciences. Notable IITs with architecture programs include IIT Kharagpur, IIT Roorkee, IIT Bombay, and IIT Guwahati. These departments are known for their interdisciplinary approach, integrating technology, design, and environmental studies to provide a holistic education. The curriculum and research activities emphasize both theoretical knowledge and practical skills, preparing students to tackle contemporary challenges in architecture.

Historical Development

The architecture departments within the IIT system have evolved over the decades, with IIT Kharagpur being the first to establish a dedicated school of architecture in the 1950s. This set the foundation for other IITs to develop their architecture programs, reflecting the growing demand for professional architectural education in India. Over time, these departments have expanded their scope to include advanced research and collaborations with international institutions.

Focus Areas

The Indian Institute of Technology architecture programs focus on various domains such as sustainable design, urban planning, heritage conservation, digital fabrication, and computational design. This diverse focus equips students with the necessary expertise to contribute effectively to the architectural profession and related industries.

Academic Programs and Curriculum

The academic programs offered by the Indian Institute of Technology architecture departments are designed to foster creativity, technical proficiency, and critical thinking. These programs range from undergraduate degrees to doctoral research, ensuring a comprehensive educational trajectory for aspiring architects.

Undergraduate Programs

The Bachelor of Architecture (B.Arch) is the flagship undergraduate program offered at several IITs. This five-year course combines design studios, theoretical courses, and practical training to develop a strong foundation in architectural principles. Students engage in hands-on projects, workshops, and internships to enhance their skills.

Postgraduate and Doctoral Programs

Master's programs (M.Arch) at IITs often specialize in areas such as urban design, environmental architecture, and building technology. Doctoral programs promote deep research into emerging trends and challenges within the architectural domain, encouraging innovation and scholarly contributions.

Curriculum Highlights

- Design studios emphasizing conceptual and technical skills

- Courses in history and theory of architecture
- Structural and construction technology
- Sustainable and green building design
- Computer-aided design and digital fabrication
- Urban planning and landscape architecture

Research and Innovation in IIT Architecture

Research is a cornerstone of the Indian Institute of Technology architecture departments, driving advancements in building technologies, environmental sustainability, and smart urban solutions. IITs actively engage in interdisciplinary projects that integrate architecture with engineering, computer science, and environmental studies.

Key Research Areas

Some prominent research themes include energy-efficient building design, use of new construction materials, disaster-resistant structures, and heritage restoration techniques. The focus on sustainability aligns with global efforts to reduce environmental impact and promote resilient urban development.

Collaborative Projects and Centers

Several IITs house dedicated research centers and labs that facilitate cutting-edge work in architecture and allied fields. Collaborations with government agencies, industry partners, and international universities enhance the scope and impact of these research initiatives.

Campus Facilities and Infrastructure

The campuses of IITs with architecture departments boast state-of-the-art facilities that support both academic and creative pursuits. These infrastructures are designed to foster an environment conducive to learning, experimentation, and innovation.

Design Studios and Workshops

Spacious, well-equipped design studios provide students with the space and resources to develop their projects. Workshops featuring advanced tools for model making, digital fabrication, and prototyping enable hands-on learning experiences.

Libraries and Digital Resources

Comprehensive libraries with extensive collections of books, journals, and digital archives support scholarly research. Access to modern software and computing facilities ensures students and faculty can work with the latest architectural technologies.

Exhibition Spaces and Galleries

Dedicated areas for exhibitions and displays allow students to showcase their work and engage with the broader academic community. These spaces also host seminars, guest lectures, and cultural events related to architecture.

Notable Alumni and Their Contributions

The Indian Institute of Technology Architecture departments have produced a distinguished cadre of architects who have made significant contributions to the profession both in India and internationally. Their work spans various sectors including urban development, sustainable architecture, and academic leadership.

Prominent Figures

- Renowned architects who have pioneered sustainable design practices
- Academicians contributing to architectural education and research
- Professionals leading innovative urban planning and infrastructure projects
- Entrepreneurs founding successful architectural and design firms

Impact on the Architectural Landscape

Alumni from IIT architecture programs have played vital roles in shaping modern Indian cities and influencing global architectural trends. Their commitment to integrating technology with design has advanced the practice of architecture in diverse contexts.

Future Prospects and Industry Connections

The Indian Institute of Technology architecture departments maintain strong ties with the architecture and construction industries, facilitating internships, placements, and collaborative projects. These connections enhance students' career prospects and promote knowledge exchange between academia and practice.

Industry Partnerships

Partnerships with leading architectural firms, construction companies, and government agencies provide practical exposure and employment opportunities for students. These collaborations also inform curriculum updates to align with evolving industry needs.

Emerging Trends and Opportunities

The integration of artificial intelligence, virtual reality, and sustainable technologies into architectural education at IITs prepares graduates for emerging roles in smart city development, green building design, and digital architecture. Continuous innovation ensures that the Indian Institute of Technology architecture departments remain at the forefront of architectural education.

Frequently Asked Questions

What is the Indian Institute of Technology Architecture program?

The Indian Institute of Technology (IIT) Architecture program offers undergraduate and postgraduate degrees in architecture, focusing on design, technology, sustainability, and innovation in the built environment.

Which IITs offer Architecture courses?

Currently, IIT Kharagpur and IIT Roorkee are prominent IITs that offer dedicated Architecture programs including B.Arch and M.Arch degrees.

What are the eligibility criteria for admission to IIT Architecture courses?

For B.Arch programs, candidates must clear the JEE Advanced exam and meet specific criteria related to mathematics and physics. For M.Arch, admission is through GATE or CEED scores, depending on the institute.

What is the scope of careers after graduating from IIT Architecture?

Graduates can pursue careers in architectural design, urban planning, sustainable development, research, academia, and construction management, both in India and internationally.

How does IIT Architecture integrate technology into its curriculum?

The IIT Architecture curriculum emphasizes cutting-edge technology such as Building Information Modeling (BIM), 3D modeling, sustainable materials, and smart city design to prepare students for modern architectural challenges.

Are there research opportunities in Architecture at IITs?

Yes, IITs provide extensive research opportunities in areas like sustainable architecture, urban design, heritage conservation, and smart infrastructure through centers and projects funded by government and industry.

How can international students apply for Architecture programs at IITs?

International students can apply through the DASA (Direct Admission of Students Abroad) scheme or institute-specific international admission processes, meeting academic and language proficiency requirements.

Additional Resources

1. Designing Innovation: Architecture at Indian Institutes of Technology

This book explores the unique architectural styles and innovations employed across various IIT campuses. It delves into how design principles are integrated with sustainability and technology to create functional educational spaces. Through detailed case studies, readers gain insight into the creative process behind these iconic institutions.

2. Campus Chronicles: The Architecture of IITs

Campus Chronicles offers a comprehensive overview of the architectural evolution of Indian Institutes of Technology. Featuring photographs, blueprints, and interviews with architects, it highlights the balance between tradition and modernity in campus design. The book also discusses how architecture supports academic excellence and community building.

3. Sustainable Architecture in Indian Institutes of Technology

Focusing on eco-friendly building practices, this book examines how IIT campuses incorporate green architecture principles. It covers innovations in energy efficiency, water conservation, and sustainable materials used in IIT buildings. The text serves as a guide for architects and planners aiming to create environmentally responsible educational environments.

4. Modernism Meets Tradition: Architectural Narratives of IIT Campuses

This title investigates the blend of modernist architectural trends with traditional Indian design elements found in IIT campuses. It explains how this fusion creates spaces that are both aesthetically pleasing and culturally resonant. The book features detailed analyses of landmark buildings and their architectural significance.

5. Architectural Identity and Educational Spaces: A Study of IIT Campuses

This book explores how architecture shapes the identity and culture of IIT institutions. It discusses the role of spatial design in fostering collaboration, creativity, and learning among students and faculty. Through architectural theory and practical examples, the book highlights how educational spaces influence academic success.

6. Engineering Excellence: The Role of Architecture in IIT Infrastructure

Engineering Excellence examines the intersection of architecture and engineering in the development of IIT infrastructure. It showcases how structural innovation supports the rigorous demands of technological education and research. The book provides insights into the collaborative process between architects and engineers in creating state-of-the-art facilities.

7. Campus Planning and Development at Indian Institutes of Technology

This book offers an in-depth look at the strategic planning and development processes behind IIT campuses. It covers aspects such as site selection, master planning, zoning, and phased construction. The narrative highlights challenges and solutions in creating cohesive, functional, and expandable academic environments.

8. Spatial Dynamics of Learning: Architectural Perspectives from IIT Campuses

Spatial Dynamics of Learning investigates how physical spaces within IIT campuses influence teaching and learning methodologies. It examines classroom layouts, common areas, and research facilities to understand their impact on student engagement. The book draws on interviews and observational studies to present an interdisciplinary view of educational architecture.

9. Iconic Structures of Indian Institutes of Technology

This visually rich book catalogs the most iconic and architecturally significant buildings across IIT campuses. It provides historical context, design philosophy, and construction details for each structure. The book serves as a tribute to the architectural heritage and innovation inspiring future generations at IIT.

Seethalakshmi Srilal,

indian institute of technology architecture: A Concise History of Modern Architecture in India Jon T. Lang, 2002 In Lucid Language That Speaks To Laymen And Architects Alike, This Book Provides A History Of Twentieth Century Architecture In India. It Examines In Detail The Early Influences On Indian Architecture Both Of Movements Like The Bauhaus As Well As Prominent Individuals Like Habib Rehman, Jawaharlal Nehru, Frank Lloyd Wright And Le Corbusier.

indian institute of technology architecture: *Structures in Architecture Education* Prabhjot Singh Sugga, 2024-01-02 There has been a historical discord over curriculum and teaching practices for structures courses in architectural education, as students are disinterested and not able to integrate learnings from such courses into their design solutions. The research in the book *Structures in Architecture Education: Teaching and Integrating in Design* involves the development of an assessment tool by a comparative analysis of past frameworks to understand integration that assesses three dimensions of integration of structures (performance, physical and visual) against three building systems (exterior, interior and services). Around 27-30 samples are selected for each year from first to fourth from three institutions. Data for pedagogy and curriculum are also collected that is used to analyse the results from assessment of samples. In the second part of this book, structural equation modelling is used to analyse if the studio is the preferred mode of learning structures.

indian institute of technology architecture: Women Architects in India Mary N. Woods, 2016-10-04 As the first inclusive study of how women have shaped the modern Indian built environment from the independence struggle until today, this book reveals a history that is largely unknown, not only in the West, but also in India. Educated in the 1930s and 1940s, the very first women architects designed everything from factories to museums in the post-independence period. The generations that followed are now responsible for metro systems, shopping malls, corporate headquarters, and IT campuses for a global India. But they also design schools, cultural centers, religious pilgrimage hotels, and wildlife sanctuaries. Pioneers in conserving historic buildings, these women also sustain and resurrect traditional crafts and materials, empower rural and marginalized communities, and create ecologically sustainable architectures for India. Today, although women make up a majority in India's ever-increasing schools of architecture, it is still not easy for them, like their Western sisters, to find their place in the profession. Recounting the work and lives of Indian women as not only architects, but also builders and clients, opens a new window onto the complexities of feminism, modernism, and design practice in India and beyond. Set in the design centers of Mumbai and Delhi, this book is also one of the first histories of architectural education and practice in two very different cities that are now global centers. The diversity of practices represented here helps us to imagine other ways to create and build apart from starchitecture. And how these women negotiate tradition and modernity at work and at home is crucial for understanding gender and modern architecture in a more global and less Eurocentric context. In a country where female emancipation was important for narratives of the independence movement and the new nation-state, feminism was, nonetheless, eschewed as divisive and damaging to the

nationalist cause. Class, caste, tradition, and family restricted—but also created—opportunities for the very first women architects in India, just as they do now for the growing number of young women professionals today.

indian institute of technology architecture: THE RUDIMENTS OF ARCHITECTURAL RENDERING: PEN & INK, COLOURS Ar. Adedayo Jeremiah Adeyekun, 2019-04-10 The Rudiment of Architectural Rendering (Pen and Ink, Colours), is a practical Architectural rendering book edited by Prof. Prabhubhai K. Patel (Emeritus Professor of Architecture from Indian Institute of Technology, Roorkee - Oldest Technical Institution of Asia). It contains about 45 illustration pictures of buildings rendered with colours, pen and ink. It is a book for Architects, Illustrators, Artists and Interior Designers. This book intended to develop a student studying architecture to demonstrate artistic skills in the core course needed to become an architect (Architectural Graphics), most especially in the application of colours. As an experience teacher of all levels of education from primary to university, believed that the daily practice of a good architect relies more on hand created drawings before it is done with the use of software. Hand created drawings gives a person training to be an architect to make use of the simplest intuitive connection between the mind and the hand. It also allows a consolidation of ideas developing the process of creative thinking. AutoCAD was created to aid architectural design for professional practice not to be a tool to develop an architect. The power of creativity relies on what you can create with your hand. An architect hand created drawing should be his pride and a manifesto to fire the imagination of his client. Even in the age of computer application, the use of hand in architectural graphics has become more precious. Using digital tools certainly has improved the way in which building design is organized and documented, but the computer cannot become a complete replacement for the way in which architects conceptualize and communicate their designs. Hand drawing is a gift that can't be ignored. We need to keep doing it. We are not machines but humans and to be an architect, one must be an artist, and to be an artist, you must be creative and to be creative you must be at one with the house. Hand drafting is an art according to Walter Gropius, says in one of his quotes, 'Children should be introduced right from the start to the potentialities of their environment, to the physical and psychological laws that govern the visual world and to the supreme enjoyment that comes from participating in the creative process of giving form to one's living space.

indian institute of technology architecture: Infrastructure and Built Environment for Sustainable and Resilient Societies Arkopal Kishore Goswami, Bharath Haridas Aithal, Swati Maitra, Ankhi Banerjee, 2024-05-11 This book presents the select proceedings of the Annual Conference on Infrastructure and Built Environment: Towards Sustainable and Resilient Societies (IBSR 2023). It covers the latest research and technologies in the area of smart and sustainable built environment for inclusive societies. Various topics covered in this volume are multimodal urban transport, spatial informatics in urban planning, urban morphology, sustainable transport infrastructure development and many more. This book will be useful for researchers and professionals working in the fields of urban mobility, affordable housing, road infrastructure, and spatial informatics.

indian institute of technology architecture: Housing, Culture, and Design Setha M. Low, Erve Chambers, 2016-11-11 This book originates in two symposia held during 1985 at the annual meetings of the Society for Applied Anthropology and the Environmental Design Research Association.

indian institute of technology architecture: The Ultimate Guide to 21st Century Careers Richa Dwivedi, 2017-09-15 Looking for the career of your choice and don't want to take the beaten path? Then pick up this book and get ready for your dream career! The Ultimate Guide to 21st Century Careers is designed to provide you with all the information you need about new careers in a range of fields. Specially designed for the modern Indian student, it is the first book in years to give detailed overviews of job profiles under each field it covers, as well as offer a roadmap to students on how to get these jobs. In its pages you will find: • Detailed information about the roles you can pursue in every field. • Exercises that will help you assess your skill sets and interests, and correlate

them to specific career paths. • A comprehensive list of colleges, both in India and abroad, that offer courses in each field. • Estimates of the salaries you could expect to earn in every profession and role. • Testimonies from experts in different areas, providing a peek into their daily work lives. Whether you are interested in problem-solving or ideating, creating something new or working with people, this book is your one-stop compendium to finding your niche and excelling in it.

indian institute of technology architecture: Architecture NATA (Part B) Exam | National Aptitude Test in Architecture | 10 Mock Tests [Solved Objective Questions] EduGorilla Prep Experts, 2022-08-03 • Best Selling Book for Architecture NATA (Part B) Exam with objective-type questions as per the latest syllabus given by the Council of Architecture. • Compare your performance with other students using Smart Answer Sheets in EduGorilla's Architecture NATA (Part B) Exam Practice Kit. • Architecture NATA (Part B) Exam Preparation Kit comes with 10 Mock Tests with the best quality content. • Increase your chances of selection by 14X. • Architecture NATA (Part B) Exam Prep Kit comes with well-structured and 100% detailed solutions for all the questions. • Clear exam with good grades using thoroughly Researched Content by experts.

indian institute of technology architecture: Heritage Conservation in Postcolonial India Manish Chalana, Ashima Krishna, 2020-12-29 Heritage Conservation in Postcolonial India seeks to position the conservation profession within historical, theoretical, and methodological frames to demonstrate how the field has evolved in the postcolonial decades and follow its various trajectories in research, education, advocacy, and practice. Split into four sections, this book covers important themes of institutional and programmatic developments in the field of conservation; critical and contemporary challenges facing the profession; emerging trends in practice that seek to address contemporary challenges; and sustainable solutions to conservation issues. The cases featured within the book elucidate the evolution of the heritage conservation profession, clarifying the role of key players at the central, state, and local level, and considering intangible, minority, colonial, modern, and vernacular heritages among others. This book also showcases unique strands of conservation practice in the postcolonial decades to demonstrate the range, scope, and multiple avenues of development in the last seven decades. An ideal read for those interested in architecture, planning, historic preservation, urban studies, and South Asian studies.

indian institute of technology architecture: Sustainable Water Resources Management Rajib Kumar Bhattacharjya, Bipul Talukdar, Konstantinos L. Katsifarakis, 2022-06-17 This book brings high-quality selected research articles from the international conference on Sustainable Water Resources Management (SWARM 2020), held at Assam Engineering College, Guwahati, Assam, India, during 19–21 June 2020. The book focuses on water management and planning, urban water management, climate change and global warming, management of groundwater and aquifer remediation, water conservation, water quality, pollution control, management of trans-boundary rivers, advanced hydrological modelling and hydro-disaster risk management of sustainable water management.

indian institute of technology architecture: Constructing Identity in Contemporary Architecture Peter Herrle, Stephanus Schmitz, 2009 The global spread of uniform modes of production and cultural values has been accompanied by a dissemination of stereotypes of modern architecture styles almost everywhere around the globe. Paradoxically, the reverse process has also emerged: In some countries, the elites feel the necessity to counterbalance the loss of identity and defend their own cultures against the intruding forces of globalization. What started as a defensive notion has developed into a more progressive attempt to re-create what has allegedly been lost. This trend is being strongly expressed in discourses about architecture in countries of the South. Who are the actors feeling compelled to construct new identities? How are these new identities in architecture created in various parts of the world? And, which are the ingredients borrowed from various historical and ethnic traditions and other sources? These and other questions are discussed in five case studies from different parts of the world, written by renowned scholars from Brazil, Mexico, Egypt, India and Singapore.

indian institute of technology architecture: EFFECTIVE ADVOCACY FOR RURAL HOUSING

IN INDIA: A VILLAGE SURVEY IN DADRI TOY, HARYANA Ar. Adedayo Jeremiah Adeyekun , 2019-08-25 This book was written by Adedayo Jeremiah Adeyekun and edited by Prof. Prabhuhai K. Patel (Emeritus Professor of Architecture from Indian Institute of Technology, Roorkee (Oldest Technical Institution of Asia) and Dr. Olugbenga S. Fashuyi, Department of Architecture, Federal University of Technology, Akure. It was written to suggest ways that will improve the welfare and livelihood of the people in the rural areas in India. This book is written to assist students in Planning and Architecture on how to carry out a village survey, explaining methods and examples of survey. It examines the current environmental issues like flooding and re - cycle of waste materials, the availability of open spaces and pollution related cases. The survey in this book will form a framework for planning and the rehabilitation of villages within the Indian circle for the Government of India to approach the problems of the rural dwellers. This book is an attempt to identify the challenges encountered in the provision of rural housing and appraise the efforts of the Government of India to address them. This book has laid emphasis on the importance of beneficial exploration of resources of human benefits, enhancement of resources management for long term productivity and thereby enhancing the quality of life of both residents and visitors. The book has revealed the current situation of formal and informal activities including landuse and conflicts, general land tenure of the village, source of housing finance, quality of housing, major transportation modes used and their problems as perceived by the rural dwellers.

indian institute of technology architecture: Urban Commons, Future Smart Cities and Sustainability Uday Chatterjee, Nairwita Bandyopadhyay, Martiwi Diah Setiawati, Soma Sarkar, 2023-05-23 This book provides a critical theoretical framework for understanding the implementation and development of smart cities as innovation drivers, with long-term effects on productivity, livability, and the sustainability of specific initiatives. This framework is based on an empirical analysis of 21 case studies, which include pioneer projects from various regions. It investigates how successful smart city initiatives foster technological innovation by combining regulatory governance and private agency. The typologies of smart city-making approaches are thoroughly examined. This book presents the holistic approach of smart cities, which start from current issue and challenges, advanced technological development, disaster mitigation, ecological perspective, social issue, and urban governance. The book is organized into five major parts, which reflect interconnection between theories and practice. Part one explains the introduction which reflects the diversity and challenges of the urban commons and its regeneration. Part two covers the current and future situation of urban growth, agglomeration agglomeration, and urban infrastructure. This section includes rethinking urban sprawl: moving towards sustainable cities, drivers of urban growth and infrastructure, urban land use dynamics and urban sprawl and urban infrastructure sustainability and resilience. Part three describes climate crisis, urban health, and waste management. This section includes climate change and health impacts in urban areas, green spaces: an invaluable resource for delivering sustainable urban health, health and wellbeing and quality of life in the changing urban environment, urban climate and pollution—case study, sustainable urban waste management and urban sustainability and global warming and urban heat Island. Part four covers the ecological perspectives, advanced technology, and social impact for i.e., smart building, ecosystem services, society and future smart cities (SSC). This section includes urban ecosystem services, environmental planning, and city management, artificial intelligence and urban hazards and societal impact, and using geospatial application and urban/smart city energy conservation—case study. Part five covers urban governance, smart solutions, and sustainable cities. It includes good governance, especially e-governance and citizen participation, urban governance, space and policy planning to achieve sustainability, smart city planning and management and Internet of things (IoT), advances in smart roads for future smart cities, sustainable city planning, innovation, and management, future strategy for sustainable smart cities and lessons from the pandemic: the future of smart cities.

indian institute of technology architecture: Urban Planning and Design for Megacities in the Global South Mohammed Firoz C, Bharat Dahiya, Lakshmi Priya Rajendran, Lalit Kumar Dashora,

Uday Chatterjee, 2025-01-31 This anthology, *Urban Planning and Design for Megacities in the Global South: Smart and Sustainable Development*, sheds light on the intricate dynamics of megacity growth in the Global South. It has compiled a rich and diverse array of evidence-based case studies, fostering discussions on emerging issues, strategies, and solutions for the enhanced planning and development of megacities in the Global South. By delving into the underlying factors propelling this rapid urban expansion, such as economic opportunities, rural-to-urban migration, and natural population growth, this volume analyzes the complex interplay of socio-economic, environmental, and political forces shaping city-regional landscapes. Examining the growth of megacities offers invaluable insights into the challenges and opportunities associated with urbanization in the 21st century. Furthermore, some cities that have not yet achieved megacity status have also been included in this book to provide a comprehensive understanding of urban growth dynamics and the related factors influencing this growth. By studying these rapidly expanding cities, their challenges in urban planning and policy implementation can be identified. These challenges often include inadequate infrastructure, insufficient public services, environmental degradation, and socio-economic disparities. In response, using case studies, the book presents conceptual and empirical strategies to tackle the various problems faced by megacities of the Global South.

indian institute of technology architecture: Implementing Enterprise Cyber Security with Open-Source Software and Standard Architecture: Volume II Anand Handa, Rohit Negi, S. Venkatesan, Sandeep K. Shukla, 2023-07-27 Cyber security is one of the most critical problems faced by enterprises, government organizations, education institutes, small and medium scale businesses, and medical institutions today. Creating a cyber security posture through proper cyber security architecture, deployment of cyber defense tools, and building a security operation center are critical for all such organizations given the preponderance of cyber threats. However, cyber defense tools are expensive, and many small and medium-scale business houses cannot procure these tools within their budgets. Even those business houses that manage to procure them cannot use them effectively because of the lack of human resources and the knowledge of the standard enterprise security architecture. In 2020, the C3i Center at the Indian Institute of Technology Kanpur developed a professional certification course where IT professionals from various organizations go through rigorous six-month long training in cyber defense. During their training, groups within the cohort collaborate on team projects to develop cybersecurity solutions for problems such as malware analysis, threat intelligence collection, endpoint detection and protection, network intrusion detection, developing security incidents, event management systems, etc. All these projects leverage open-source tools, and code from various sources, and hence can be also constructed by others if the recipe to construct such tools is known. It is therefore beneficial if we put these recipes out in the form of book chapters such that small and medium scale businesses can create these tools based on open-source components, easily following the content of the chapters. In 2021, we published the first volume of this series based on the projects done by cohort 1 of the course. This volume, second in the series has new recipes and tool development expertise based on the projects done by cohort 3 of this training program. This volume consists of nine chapters that describe experience and know-how of projects in malware analysis, web application security, intrusion detection system, and honeypot in sufficient detail so they can be recreated by anyone looking to develop home grown solutions to defend themselves from cyber-attacks.

indian institute of technology architecture: Archiprix International Henk van der Veen, 2007 Every two years, Archiprix International invites all university-level courses in the field of architecture, urban planning and landscape architecture to select their best graduation projects and to submit these for participation. This book presents a cross-section of the projects, including the nominees and winners chosen by an independent jury, and the favorites chosen by the participants themselves, supplemented by a representative selection that shows the range of designs and the graphical distribution across all continents. In addition, the book contains the jury report as well as biographies of the designers of the nominated projects. A DVD presents the entirety of the projects. Archiprix International was first organized in Rotterdam, the home base of Archiprix International,

in 2001. In 2007, Archiprix International is held in Shanghai, with the College of Architecture and Urban Planning of Tongji University as the main partner. Archiprix International provides a platform for educational courses in architecture, urban planning and landscape architecture, and brings together and supports newly-graduated, talented designers at the start of their career.

indian institute of technology architecture: Women Architects and Modernism in India
Madhavi Desai, 2016-10-14 This book attempts to recover the stories of the women architects whose careers nearly parallel the development of modernism in colonial and postcolonial India. Extensively illustrated, featuring drawings and photographs, this book will be a milestone in the modernist narrative of South Asia.

indian institute of technology architecture: Indian Architectural Theory Vibhuti Chakrabarti, 1998 In this ground-breaking study the traditional Indian science of architecture and house-building, Vastu Vidya, is explored in terms of its secular uses, at the levels of both theory and contemporary practice. Vastu Vidya is treated as constituting a coherent and complete architectural programme, still of great relevance today. Chakrabarti draws on an impressive amount of textual material, much of it only available in Sanskrit, and presents several extremely valuable illustrations in support of the theories expounded. Each chapter deals with one architectural aspect, and chapters are divided into three sections. For each aspect, the first section explains the prescriptions of the traditional texts; the second section deals with the rather arbitrary use of that aspect by contemporary Indian architects trained in the western manner but striving to relate to Indian roots; while the last section in each chapter explores the selected use of that particular aspect by contemporary Vastu pundits, with their disregard for architectural idiom.
