independence day speech text: A Brief History of the Present Hilal Ahmed, 2024-07-22
Present-day political discourse swings between two contrary positions on the issue of Muslims. Hindutva politics categorizes Muslims as a monolithic religious group to substantiate Hindu homogeneity. The liberals, on the other hand, claim to protect Muslims as a religious minority to defend Indian democracy (if not secularism!). In both cases, Muslim identity is envisioned as a one-dimensional phenomenon. A Brief History of the Present attempts to go beyond the obvious to rethink the role of minorities, specifically Muslims, in the 'New India' that has revealed itself since

2014. By diving deep into the complexities of Muslim identity and its role in everyday life while at the same time viewing the Muslim communities through a historical lens, the author attempts to provide a far more accurate picture of Indian Muslims than what is perceived currently. Through the author's interpretation of a wide range of quantitative and qualitative sources and his long experience as an observer of the Indian political scenario for more than three decades, the book presents a deeply considered view of a burning question: the current status of Muslims in India.

independence day speech text: *Citizenship and the Diaspora in the Digital Age* Toyin Falola, 2023-05-22 In *Citizenship and the Diaspora in the Digital Age*: Farooq Kperogi and the Virtual Community, Toyin Falola examines how the members of the Nigerian diaspora create a virtual community and instrumentalize the digital age to speak about the nation and its failures, possibilities, and promises. This book depicts individuals' relationships with society and how the world's progressive shift toward technology and globalization does not disregard the concept of society and its members. As a result of this shift, people have been migrating to new places without giving up their citizenship in their home countries. This book explores how migrants are focused on the idea of a virtual community, examines how citizens' roles have evolved through time, and displays society's essential principles in this light. Furthermore, it evaluates social commentaries enhanced by the dynamics of the digital age, such as societal issues like education in Nigeria, the question of democracy, challenges facing the country, and the development of a national language. Many of these societal challenges are examined in this book from the perspective of Farooq Kperogi, who has conducted extensive studies and published on the above themes. This is balanced against emerging facts, Nigerians' positions, and disregarded realities. Kperogi's relentless writings on Nigeria make him a preeminent figure whose positions are valuable to the understanding of modern Nigeria.

independence day speech text: *Caribbean Critique* Nick Nesbitt, 2013 *Caribbean Critique* seeks to define and analyze the distinctive contribution of francophone Caribbean thinkers to perimetric Critical Theory. The book argues that their singular project has been to forge a brand of critique that, while borrowing from North Atlantic predecessors such as Rousseau, Hegel, Marx, and Sartre, was from the start indelibly marked by the Middle Passage, slavery, and colonialism. Chapters and sections address figures such as Toussaint Louverture, Baron de Vastey, Victor Schoelcher, Aimé Césaire, René Ménil, Frantz Fanon, Maryse Condé, and Edouard Glissant, while an extensive theoretical introduction defines the essential parameters of 'Caribbean Critique.'

independence day speech text: *The 2019 Parliamentary Elections in India* Subrata K. Mitra,

Rekha Saxena, Pampa Mukherjee, 2022-06-16 This book presents a comprehensive overview of India's electoral democracy and political system. It provides an in-depth analysis of the 2019 parliamentary elections to explore three crucial facts of India's political life: the legitimacy of political competition as the only basis of power; elections as the only legitimate basis of political competition; and political parties as the only legitimate agency to conduct political competition. The book argues that the vitality and resilience of India's electoral democracy remain high owing to large mass participation in elections that are competitive and relatively free and fair. The volume includes key theoretical, empirical, and comparative perspectives on parties and elections from experts, and covers all major political parties of India, along with the performance of many representative regional parties. It discusses themes such as elections and party competition in India; ideology, interest, religion, and gender as they affect social mobilisation and political transaction; economic and political change, and multiparty democracy; the dynamics of the Muslim vote; fluctuating electoral fortunes; and electoral campaigns and role of social media. This book will be an essential read for scholars and researchers of political science, political sociology, election studies, Indian politics, South Asian politics, and South Asian studies. It will also interest those in politics, public policy and governance, civil society organisations, media and journalism, and the general reader.

independence day speech text: The Oxford Handbook of Political Psychology Leonie Huddy, David O. Sears, Jack S. Levy, 2013-08-01 Political psychology applies what is known about human psychology to the study of politics. It examines how people reach political decisions on topics such as voting, party identification, and political attitudes as well as how leaders mediate political conflicts and make foreign policy decisions. The Oxford Handbook of Political Psychology gathers together a distinguished group of scholars from around the world to shed light on these vital questions. Focusing first on political psychology at the individual level (attitudes, values, decision-making, ideology, personality) and then moving to the collective (group identity, mass mobilization, political violence), this fully interdisciplinary volume covers models of the mass public and political elites and addresses both domestic issues and foreign policy. Now with new material providing an up-to-date account of cutting-edge research within both psychology and political science, this is an essential reference for scholars and students interested in the intersection of the two fields.

independence day speech text: *Modi's India* Christophe Jaffrelot, 2023-04-11 A riveting account of how a popularly elected leader has steered the world's largest democracy toward authoritarianism and intolerance. Over the past two decades, thanks to Narendra Modi, Hindu nationalism has been coupled with a form of national-populism that has ensured its success at the polls, first in Gujarat and then in India at large. Modi managed to seduce a substantial number of citizens by promising them development and polarizing the electorate along ethno-religious lines. Both facets of this national-populism found expression in a highly personalized political style as Modi related directly to the voters through all kinds of channels of communication in order to saturate the public space. Drawing on original interviews conducted across India, Christophe Jaffrelot shows how Modi's government has moved India toward a new form of democracy, an ethnic democracy that equates the majoritarian community with the nation and relegates Muslims and Christians to second-class citizens who are harassed by vigilante groups. He discusses how the promotion of Hindu nationalism has resulted in attacks against secularists, intellectuals, universities, and NGOs. Jaffrelot explains how the political system of India has acquired authoritarian features for other reasons, too. Eager to govern not only in New Delhi, but also in the states, the government has centralized power at the expense of federalism and undermined institutions that were part of the checks and balances, including India's Supreme Court. *Modi's India* is a sobering account of how a once-vibrant democracy can go wrong when a government backed by popular consent suppresses dissent while growing increasingly intolerant of ethnic and religious minorities.

independence day speech text: The Technopolitics of Communication in Modern India

Pragya Dhital, 2024-12-12 This book offers a groundbreaking account of the role of media technologies in Indian nationalism and democracy. From the Brexit referendum in 2016 to the phenomenon of 'Trumpism', there has been much speculation about the role played by new media in an apparent return of illiberal politics and primordial identities. Dhital argues these developments could best be understood by not taking identity for granted as a static and exclusive form of affiliation. She also emphasises how the technical and material are interwoven into human thought and action rather than acting upon them externally. She accordingly focuses on the technopolitical means by which groups have been ventriloquised during critical periods in Indian political history, across various media – from newspapers and magazines to radio broadcasts, speeches and online platforms. Chapters cover prison writing produced during the emergency of 1975-77, regulation of public speech during the 2014 general election, and the Citizenship Amendment Act protests of 2019-20. Through these case studies, Dhital works towards an alternative, more reflexive, basis for popular representation, one that does not sacralise 'the people' and assume power in their name.

independence day speech text: Modi and the Reinvention of Indian Foreign Policy Ian Hall,

2019-09-25 Narendra Modi's energetic personal diplomacy and promise to make India a 'leading power' surprised many analysts. Most had predicted that his government would concentrate on domestic issues, on the growth and development demanded by Indian voters, and that he lacked necessary experience in international relations. Instead, Modi's first term saw a concerted attempt to reinvent Indian foreign policy by replacing inherited understandings of its place in the world with one drawn largely from Hindu nationalist ideology. Following Modi's re-election in 2019, this book explores the drivers of this reinvention, arguing it arose from a combination of elite conviction and electoral calculation, and the impact it has had on India's international relations.

independence day speech text: The Conflicted Superpower Andrew Kennedy, 2018-05-22

For decades, leadership in technological innovation has sustained U.S. power worldwide. Today,

however, processes that undergird innovation increasingly transcend national borders. Cross-border flows of brainpower have reached unprecedented heights, while multinationals invest more and more in high-tech facilities abroad. In this new world, U.S. technological leadership increasingly involves collaboration with other countries. China and India have emerged as particularly prominent partners, most notably as suppliers of intellectual talent to the United States. In *The Conflicted Superpower*, Andrew Kennedy explores how the world's most powerful country approaches its growing collaboration with these two rising powers. Whereas China and India have embraced global innovation, policy in the United States is conflicted. Kennedy explains why, through in-depth case studies of U.S. policies toward skilled immigration, foreign students, and offshoring. These make clear that U.S. policy is more erratic than strategic, the outcome of domestic battles between competing interests. Pressing for openness is the "high-tech community"—the technology firms and research universities that embody U.S. technological leadership. Yet these pro-globalization forces can face resistance from a range of other interests, including labor and anti-immigration groups, and the nature of this resistance powerfully shapes just how open national policy is. Kennedy concludes by asking whether U.S. policies are accelerating or slowing American decline, and considering the prospects for U.S. policy making in years to come.

independence day speech text: *Civilization-States of China and India* Ravi Dutt Bajpai, 2024-01-30 Ravi Dutt Bajpai examines some of the pivotal episodes in the modern history of China and India to argue that their behaviours reflect the self-identity of a civilization-state. The book starts from the progression of China and India into putatively modern polities during the colonial period, as the two indigenous societies imagined their national identities and nationalist aspirations primarily by contrasting their civilizational attributes with the Western colonial occupiers. As newly independent nation-states, both believed that their international status flowed from their civilizational glories. Therefore, despite their material and institutional fragility, China and India decided to pursue complete autonomy to manage their domestic and foreign affairs. Indian Prime Minister Nehru's policy of non-alignment, envisioning an alternate world order beyond the great power competition, was inspired by Indian civilizational ethos. The book also examines the Sino-Indian war of 1962 from a civilization-state perspective and argues that Tibet represented a conflict of civilizational influence. Chapters also explore some of the more recent developments, such as the Indian nuclear test of 1998, China's ambitious Belt and Road (BRI) infrastructure project aimed at reviving the ancient Silk Road, and India's campaign to regain its civilizational status of Vishwa Guru, as the continued manifestations of the two civilization-states endeavouring to regain their past glories in the contemporary world.

independence day speech text: *Identity and Global Politics* P. Goff, 2004-03-17 This collected volume draws together essays written by International Relations scholars from a variety of regional, methodological and theoretical perspectives to confront the challenges of identity-centered analysis. In particular, the contributors seek to elucidate the general meaning and methodological implications of the commonly state yet largely unexamined, assertion that identities are relational, fluid, constructed, and multiple.

independence day speech text: *Making Identity Count* Ted Hopf, Bentley B. Allan, 2016-04-06 Constructivism, despite being one of the three main streams of IR theory, along with realism and liberalism, is rarely, if ever, tested in large-n quantitative work. Constructivists almost unanimously eschew quantitative approaches, assuming that variables of interest to constructivists, defy quantification. Quantitative scholars mostly ignore constructivist variables as too fuzzy and vague. And the rare instances in which quantitative scholars have operationalized identity as a variable, they have unfortunately realized all the constructivists' worst fears about reducing national identity to a single measure, such as language, religion, or ethnicity, thereby violating one of the foundational assumptions of constructivism: intersubjectivity. *Making Identity Count* presents a new

method for the recovery of national identity, applies the method in 9 country cases, and draws conclusions from the empirical evidence for hegemonic transitions and a variety of quantitative theories of identity. Ted Hopf and Bentley B. Allan make the constructivist variable of national identity a valid measure that can be used by large-n International Relations scholars in a variety of ways. They lay out what is wrong with how identity has been conceptualized, operationalized and measured in quantitative IR so far and specify a methodological approach that allows scholars to recover the predominant national identities of states in a more valid and systematic fashion. The book includes national identity reports on China, the US, UK, Germany, France, Brazil, Japan, and India to both test the authors' method and demonstrate the promise of the approach. Hopf and Allan use these data to test a constructivist hypothesis about the future of Western neoliberal democratic hegemony. Finally, the book concludes with an assessment of the method, including areas of possible improvement, as well as a description of what an intersubjective national identity data base of great powers from 1810-2010 could mean for IR scholarship.
