math placement test free online: A Guide to Detracking Math Courses Angela Torres, Ho Nguyen, Laura Wentworth Streeter, Elizabeth Hull Barnes, Laura Wentworth, 2023-04-26 Create a pathway to equity by detracking mathematics The tracked mathematics system has been operating in US schools for decades. However, research demonstrates negative effects on subgroups of students by keeping them in a single math track, thereby denying them access to rigorous coursework needed for college and career readiness. The journey to change this involves confronting some long-standing beliefs and structures in education. When supported with the right structures, instructional shifts, coalition building, and educator training and support, the detracking of mathematics courses can be a primary pathway to equity. The ultimate goal is to increase more students' access to and achievement in higher levels of mathematics learning—especially for students who are historically marginalized. Based on the stories and lessons learned from the San Francisco Unified School District educators who have talked the talk and walked the walk, this book provides a model for all those involved in taking on detracking efforts from policymakers and school administrators, to math coaches and teachers. By sharing stories of real-world examples, lessons learned, and prompts to provoke discussion about your own context, the book walks you through: Designing and gaining support for a policy of detracked math courses Implementing the policy through practical shifts in scheduling, curriculum, professional development, and coaching Supporting and improving the policy through continuous research, monitoring, and maintenance. This book offers the big ideas that help you in your own unique journey to advance equity in your school or district's mathematics education and also provides practical information to help students in a detracked system thrive.

math placement test free online: Game On Susan F. Paterno, 2021-06-15 Director of the Chapman journalism program—and mother of four recent college grads—Susan F. Paterno leads you through the admissions process to help you and your family make the best decision possible. How is it possible that Harvard is more affordable for most American families than their local state university? Or that up to half of eligible students receive no financial aid? Or that public universities are rejecting homegrown middle- and working-class applicants and instead enrolling wealthy out-of-state students? College admission has escalated into a high-stakes game of emotional and financial survival. How is the deck stacked against you? And what can you do about it? Susan F. Paterno, a veteran academic and journalist, answers these questions and more in Game On. You’ll learn how to narrow your focus, analyze who gets in and why, and look for the right financial fit before considering anything else, including geography, reputation, and, especially, ranking. Among the tools and insights in *Game On*: · Why forty years of failed free-market policies have led to skyrocketing tuition and historic levels of student debt · Why applying to college has become a bewildering maze and how to find your way to a successful result · Why college costs are more terrifying than you think · How to read beyond the rack rate to negotiate the best financial package with the least debt · Why merit is a myth, but merit aid is essential · The difference between family debt and student debt and how to split it A playbook for the Hunger Games of higher education, *Game On* explains the anxiety, uncertainty, and chaos in college admission, explodes the myth of meritocracy, exposes the academy’s connection to America’s widening gap between rich and poor, and provides strategies to beat—and reform—a broken system.
