math quotes for bulletin boards: The Reluctant Guardian John Ocean, 2025-09-30 Aria Thompson never asked to be a hero. One moment, she was a devoted schoolteacher in Chicago, sharing bedtime stories with her students; the next, she was ripped from her world and thrust into Eldoria—a realm where prophecy named her the Eternal Guardian. Gifted with the elemental powers of fire, water, earth, and air, she is hailed as the one destined to banish the Shadow Beasts. But Aria is no warrior. She longs for simplicity, for chalkboards and classrooms, not crowns and curses. Disguised as a wandering educator, she finds refuge in the humble village of Willowbrook, where her lessons spark hope in orphaned children and her hidden magic begins to heal a broken community. Yet shadows tighten their grip. A corrupt noble seeks to twist her power, the beasts grow bolder with every nightfall, and visions from a gifted child foretell betrayal and war. Aria must decide: will she continue to run from her destiny, or embrace her reluctant role to protect the family she has grown to love? Blending epic battles with heartfelt teaching moments, *The Reluctant Guardian: Secrets of the Enchanted Educator* is a tale of courage, love, and the quiet strength of a woman who learns that true guardianship is not chosen—it is lived.

math quotes for bulletin boards: Global Perspectives on Issues and Solutions in Urban Education Petra A. Robinson, Ayana Allen-Handy, Amber Bryant, Chance W. Lewis, 2019-03-01 In 2014, The Urban Education Collaborative at the University of North Carolina at Charlotte hosted its

first biennial International Conference on Urban Education (ICUE) in Montego Bay, Jamaica. In 2016, the second hosting of the conference took place in San Juan, Puerto Rico. With ICUE's inspiration, this book is a response to the growing need to highlight the multifaceted aspects of urban education particularly focusing on common issues and solutions in urban environments (e.g., family and community engagement, student academic achievement, teacher preparation and professional development, targeted instructional and disciplinary interventions, opportunity gaps, culturally-relevant and sustaining practices, etc.). Additionally, with this book, we seek to better understand the challenges facing urban educators and students and to offer progressive initiatives toward resolutions. This unique compilation of work is organized under four major themes all targeted at critically addressing concerns that may inhibit the success of urban learners and providing solutions that have implications for curriculum design, development, and delivery; teacher preparation and teaching diverse populations; career readiness and employment; and even more nuanced issues related to foster care, undocumented students and mental health, sustainable consumption, childhood marriage, food deserts, and marine life and urban communities.

works with the feminist implications of the theories and methodologies of posthumanism and new materialism – what we have also called elsewhere ‘PhEmaterialism’. The generative questions for this collection are: what if we locate education in doing and becoming rather than being? And, how does associating education with matter, multiplicity and relationality change how we think about agency, ontology and epistemology? This collection foregrounds cutting edge educational research that works to trouble the binaries between theory and methodology. It demonstrates new forms of feminist ethics and response-ability in research practices, and offers some coherence to this new area of research. This volume will provide a vital reference text for educational researchers and scholars interested in this burgeoning area of theoretically informed methodology and methodologically informed theory. The chapters in this book were originally published as articles in Taylor & Francis journals.
