Can you imagine not knowing how to count money well? You'd never know if you got the right amount of change back. You wouldn't even know how much to give the cashier. You'd not be able to budget or to keep track of your total while shopping. Wouldn't that be terrible? Money skills are very important. Children begin learning about money so young to ensure they have a good grasp on handling money when they are adults. Here's how you can help your child to learn to count money. Children may not quite understand the concept of money in terms of cost and what constitutes a good value, but most kids like money because they know you need money to buy things you want. Teaching children to count money is one of the basic concepts that they will use during the course of their entire lives, but can be confusing at first. Make sure your child has a basic understanding of simple math before introducing easy ways to count money. Children begin to learn about money at a very early age. It begins in first grade. As young as age six and seven your child learns the coin names and values. By the end of second grade children are adding and subtracting dollar amounts. Children need all the help they can get learning how to count money. These skills are needed not only for school, but also for life. Teaching money is the perfect candidate for hands-on learning. Get out the real thing, use play money, or even make your own, but the more realistic the better. Learning about money, how to earn it, save it, and spend it is of great interest to children! So they are naturally very motivated to learn how to count it. Children also instinctively recognize money as a medium of exchange and a symbolic form of power. Gradually involving children in the everyday financial affairs of the home makes good sense and will help take the mystique out of those shiny coins Preschoolers can begin to count money as soon as they begin learning to count. They may not know coin values, but show them small sets of coins separated by denomination and let them count with you. The first thing a child needs to learn is to identify the coins. They need to know the coin names and values. A penny is called a penny. That is it's name. A penny is worth one cent. To teach your child the coin names and

values tell them what they are while showing them a penny, nickel, dime, quarter, and fifty cent piece. Kids learn from being shown and told. It may take telling and showing your child each coin several times. Work on one coin at a time, this prevents confusion. math quiz for kids: My Life Ben Carson, M.D., 2015-07-14 Ben Carson grew up in the inner cities of Boston and Detroit with his mother and brother. When his father deserted the family, Ben's mother worked several jobs to support her boys yet worked even harder to encourage them to get an education and follow their dreams. Ben's dreams nearly ended when his anger at being poor and the ridicule of a school mate caused him to snap; he lunged at the boy and cut him with a knife. That brush with attempted murder caused Carson to break down and ask God to turn him around. And turn him around he did. A poor student, Carson under the guidance of his mother and brother became the best student in his class, his school, and ultimately earned a scholarship to Yale. The next time he used a knife was as a neurosurgeon at Johns Hopkins Hospital where he pioneered surgery techniques that not only saved lives but miraculously gave countless children an amazing quality of life. My Life is the story of a young boy who could have remained trapped in poverty were it not for his mother's tough and sacrificial love, his own perseverance that he learned from her example, and his deep faith that called him to do great and mighty things. This book contains a new chapter about Dr. Carson's philosophies of serving one's country, becoming role models for people with disadvantaged backgrounds, using the talents God has given you, embracing what success really is, and believing, youths and adults alike, that with hard work and perseverance, you can do it. And on May 4, 2015, Dr. Ben Carson declared himself a candidate for the Presidency of the United States of America.
