maths make noise manual: *The Math(s) Fix* Conrad Wolfram, 2020-06-10 Now with a new ChatGPT-era foreword (ebook exclusive) that explains how *The Math(s) Fix* addresses key issues not only for the future of maths, but for AI-age education in general. This book uniquely puts the ChatGPT shock into perspective by offering the reformer's roadmap for reaction to policymakers, employers, parents, teachers, and students. Why are we all taught maths for years of our lives? Does it really empower everyone? Or fail most and disenfranchise many? Is it crucial for the AI age or an obsolete rite of passage? *The Math(s) Fix: An Education Blueprint for the AI Age* is a groundbreaking book that exposes why maths education is in crisis worldwide and how the only fix is a fundamentally new mainstream subject. It argues that today's maths education is not working to elevate society with modern computation, data science and AI. Instead, students are subjugated to compete with what computers do best, and lose. This is the only book to explain why being "bad at maths" may be as much the subject's fault as the learner's: how a stuck educational ecosystem has students, parents, teachers, schools, employers and policymakers running in the wrong direction to catch up with real-world requirements. But it goes further too—for the first time setting out a completely alternative vision for a core computational school subject to fix the problem and seed more general reformation of education for the AI age.

Elizabeth Day By the age of twenty, Lucy Spraggan had already experienced more extraordinary things than many do across a lifetime. Growing up in a creative household, surrounded by artists, alcohol and raucous parties, by her late teens she had played pubs, clubs and festivals, fallen in love with an older woman on a US road trip, experimented with drink and drugs, and been in and out of police custody. When her X Factor audition went viral in 2012, Lucy became the bookies' favourite to win the show. She was the first contestant ever to write and perform her own original songs, refusing to be pigeonholed by stylists and producers. Viewers fell for her unmanufactured, anti-pop princess stance, and the tabloids loved her. Then, suddenly, mid-way through the live shows, Lucy dropped out. The public were told Lucy was unwell. Now, for the first time, Lucy is ready to tell her story, in her own words. *Process* is a book about the vicious impact of trauma across a lifetime; it is about Lucy's successes and mistakes, her journey towards sobriety, calm and something like peace. Most of all, *Process* is an extraordinary story about a gifted artist and an expose of the toxic underbelly of noughties celebrity culture and reality TV.
