

medical assisted therapy abingdon

medical assisted therapy abingdon is an essential healthcare service designed to support individuals struggling with addiction and mental health disorders. This form of therapy combines medication with counseling and behavioral therapies to provide a comprehensive approach to treatment. In Abingdon, medical assisted therapy has become increasingly recognized for its effectiveness in helping patients achieve long-term recovery and improved quality of life. This article explores the various aspects of medical assisted therapy in Abingdon, including the types of treatments available, the benefits, the process involved, and how to access these services. Understanding these elements can empower individuals and families to make informed decisions about their healthcare options. The following sections will delve deeper into the key components of medical assisted therapy abingdon, offering a detailed and informative overview.

- Understanding Medical Assisted Therapy
- Types of Medical Assisted Therapy Available in Abingdon
- Benefits of Medical Assisted Therapy
- The Treatment Process in Abingdon
- Accessing Medical Assisted Therapy Services

Understanding Medical Assisted Therapy

Medical assisted therapy (MAT) is a treatment approach that combines the use of FDA-approved medications with counseling and behavioral therapies to treat substance use disorders. This integrative method aims to normalize brain chemistry, block the euphoric effects of substances, relieve physiological cravings, and normalize body functions without the negative effects of the abused drug. In Abingdon, medical assisted therapy is tailored to meet the specific needs of each patient, ensuring a personalized path to recovery. This approach is particularly effective in treating opioid, alcohol, and tobacco addictions by addressing both the physical and psychological aspects of addiction.

Core Components of Medical Assisted Therapy

The core components of medical assisted therapy include medication management, counseling, and behavioral therapies. Medications commonly used in MAT work by either mimicking the effects of the addictive substance to prevent withdrawal symptoms or by blocking the effects to reduce cravings and prevent relapse. Counseling helps patients understand the root causes of their addiction and develop coping strategies. Behavioral therapies focus on modifying harmful behaviors and reinforcing positive habits, providing a holistic treatment framework.

Why MAT is Important in Addiction Treatment

MAT is crucial because addiction is a complex disease that affects the brain and behavior. Simply stopping substance use without treatment often leads to relapse. Medical assisted therapy addresses both the physical dependence and the psychological aspects of addiction, significantly increasing the chances of sustained recovery. It also reduces the risk of overdose and other health complications related to substance abuse, making it a vital component of comprehensive addiction care in Abingdon.

Types of Medical Assisted Therapy Available in Abingdon

Abingdon offers a variety of medical assisted therapy options, each designed to treat different types of substance use disorders effectively. The selection of therapy depends on the individual's specific addiction, medical history, and treatment goals. The commonly used medications and therapeutic approaches available in Abingdon facilities include:

Opioid Use Disorder Treatments

For opioid addiction, several medications are used in MAT programs in Abingdon:

- **Methadone:** A long-acting opioid agonist that reduces withdrawal symptoms and cravings.
- **Bupropion:** Also known as buprenorphine, it partially activates opioid receptors to relieve cravings without producing a high.
- **Naltrexone:** An opioid antagonist that blocks the euphoric effects of opioids, discouraging misuse.

Alcohol Use Disorder Treatments

Medical assisted therapy for alcohol dependency may include:

- **Disulfiram:** Causes unpleasant reactions when alcohol is consumed, acting as a deterrent.
- **Naltrexone:** Reduces cravings and the pleasurable effects of alcohol.
- **Acamprosate:** Helps restore the balance of neurotransmitters disrupted by chronic alcohol use.

Tobacco Use Disorder Treatments

For tobacco cessation, MAT in Abingdon may use:

- **Nicotine Replacement Therapy (NRT):** Includes patches, gum, and lozenges to reduce withdrawal symptoms.
- **Bupropion:** A non-nicotine medication that reduces cravings and withdrawal symptoms.
- **Varenicline:** Reduces cravings and decreases the pleasurable effects of smoking.

Benefits of Medical Assisted Therapy

Medical assisted therapy abingdon offers numerous benefits that make it a preferred treatment method for many individuals battling addiction. The combination of medication and therapy addresses both the physiological and psychological barriers to recovery, enhancing overall treatment outcomes.

Improved Treatment Retention and Success Rates

One of the primary benefits of MAT is its ability to improve patient retention in treatment programs. Patients receiving medication along with counseling are more likely to stay engaged and complete their treatment plans. This leads to higher success rates in achieving and maintaining sobriety compared to traditional treatments alone.

Reduction in Withdrawal Symptoms and Cravings

Withdrawal symptoms and intense cravings are significant challenges in addiction recovery. MAT helps to alleviate these symptoms, making the recovery process more manageable and less painful. This reduces the risk of relapse, which is often triggered by the discomfort of withdrawal.

Decreased Risk of Overdose and Relapse

By stabilizing brain chemistry and blocking the euphoric effects of substances, medical assisted therapy significantly lowers the risk of overdose and relapse. This protective effect is critical for individuals transitioning from active addiction to long-term recovery.

Support for Co-occurring Mental Health Disorders

MAT programs in Abingdon often include treatment for co-occurring mental health conditions such as anxiety and depression, which are common among individuals with

substance use disorders. Addressing these issues concurrently improves overall recovery outcomes.

The Treatment Process in Abingdon

The treatment process for medical assisted therapy in Abingdon involves several carefully structured steps to ensure patient safety and maximize the effectiveness of care. Each stage is designed to support the patient physically, emotionally, and mentally throughout their recovery journey.

Initial Assessment and Diagnosis

The first step in the treatment process is a comprehensive assessment conducted by healthcare professionals. This evaluation includes physical exams, psychological assessments, and review of medical history. The goal is to determine the severity of addiction and identify any co-occurring disorders that may influence treatment planning.

Medication Selection and Monitoring

Based on the assessment, clinicians select the appropriate medication tailored to the patient's specific needs. Ongoing monitoring is essential to adjust dosages, manage side effects, and ensure the medication is effectively supporting recovery. Regular follow-ups help maintain treatment adherence and address any emerging challenges.

Counseling and Behavioral Therapy

Alongside medication, patients participate in individual and group counseling sessions. Behavioral therapies such as cognitive-behavioral therapy (CBT) and motivational interviewing are commonly used to help patients develop coping skills, change harmful behaviors, and build a supportive recovery network.

Aftercare and Support Services

Successful recovery often requires continued support after the initial treatment phase. Abingdon's MAT programs typically provide or connect patients with aftercare services, including support groups, relapse prevention planning, and ongoing counseling to help maintain sobriety long-term.

Accessing Medical Assisted Therapy Services

Access to medical assisted therapy in Abingdon is facilitated through various healthcare providers, including specialized addiction treatment centers, primary care physicians, and mental health clinics. Understanding how to obtain these services is critical for individuals

seeking help.

Finding a Qualified Provider

Locating a qualified MAT provider involves verifying credentials, treatment approaches, and the availability of comprehensive services. Many providers in Abingdon offer multidisciplinary care teams consisting of physicians, counselors, and social workers to address all aspects of addiction treatment.

Insurance and Cost Considerations

Many insurance plans cover medical assisted therapy, making it more affordable for patients. It is important to verify coverage details and inquire about payment options with the provider. Some facilities also offer sliding scale fees or financial assistance programs to accommodate different economic situations.

Steps to Begin Treatment

1. Contact a medical assisted therapy provider in Abingdon for an initial consultation.
2. Complete the assessment and diagnostic evaluation.
3. Work with the treatment team to develop a personalized care plan.
4. Begin medication and counseling sessions as prescribed.
5. Engage in ongoing monitoring and aftercare services.

By understanding the availability and process of medical assisted therapy abingdon, individuals can take proactive steps toward recovery with the support of professional care and community resources.

Frequently Asked Questions

What is medical assisted therapy in Abingdon?

Medical assisted therapy in Abingdon refers to treatment programs that combine medication with counseling and behavioral therapies to help individuals recover from substance use disorders.

What medications are commonly used in medical assisted therapy in Abingdon?

Common medications used include methadone, buprenorphine, and naltrexone, which help reduce withdrawal symptoms and cravings associated with opioid addiction.

Are there medical assisted therapy centers in Abingdon?

Yes, Abingdon has several medical assisted therapy centers that offer comprehensive treatment plans including medication management and counseling services.

How effective is medical assisted therapy for opioid addiction in Abingdon?

Medical assisted therapy has been shown to be highly effective in Abingdon, helping patients reduce opioid use, improve retention in treatment, and decrease the risk of relapse.

Can medical assisted therapy in Abingdon help with alcohol addiction?

Yes, certain medications used in medical assisted therapy, such as naltrexone and acamprosate, can assist individuals in Abingdon with alcohol addiction.

How do I find a qualified medical assisted therapy provider in Abingdon?

You can find qualified providers by searching local health services, checking with your healthcare provider, or visiting online directories specializing in addiction treatment in Abingdon.

Is medical assisted therapy covered by insurance in Abingdon?

Many insurance plans, including Medicaid and Medicare, cover medical assisted therapy in Abingdon, but coverage varies, so it is important to check with your insurance provider.

What is the typical duration of medical assisted therapy programs in Abingdon?

The duration varies depending on individual needs, but programs in Abingdon typically last from several months to a year or longer for sustained recovery.

Are counseling services included in medical assisted

therapy in Abingdon?

Yes, counseling and behavioral therapies are integral parts of medical assisted therapy programs in Abingdon to address psychological aspects of addiction.

Can medical assisted therapy in Abingdon be combined with other support groups?

Absolutely, combining medical assisted therapy with support groups like Narcotics Anonymous or Alcoholics Anonymous in Abingdon can enhance recovery outcomes.

Additional Resources

1. *Medical Assisted Therapy: Principles and Practices in Abingdon*

This book offers a comprehensive overview of medical assisted therapy as practiced in Abingdon. It covers foundational principles, clinical methods, and patient management strategies. The text is ideal for healthcare professionals seeking to understand local protocols and treatment outcomes. Case studies from Abingdon clinics provide real-world insights into therapy applications.

2. *Advances in Medical Assisted Therapy: Innovations in Abingdon Healthcare*

Focusing on recent innovations, this book explores cutting-edge techniques in medical assisted therapy within the Abingdon region. It highlights new technologies, drug therapies, and multidisciplinary approaches that improve patient recovery. Readers will find detailed discussions on integrating novel treatments into existing healthcare systems. This resource is valuable for practitioners aiming to stay current with therapeutic advancements.

3. *The Role of Medical Assisted Therapy in Substance Abuse Treatment: Abingdon Perspectives*

This title delves into the critical role of medical assisted therapy in treating substance abuse disorders in Abingdon. It presents data-driven outcomes, patient testimonials, and community-based program evaluations. The book also analyzes challenges faced by therapists and strategies to overcome barriers to care. It serves as a guide for clinicians and policy makers involved in addiction treatment.

4. *Patient-Centered Care in Medical Assisted Therapy: Lessons from Abingdon Clinics*

Highlighting the importance of patient-centered approaches, this book discusses how Abingdon clinics implement personalized medical assisted therapy plans. It emphasizes communication techniques, cultural competency, and collaborative care models. The text includes practical advice for improving therapeutic relationships and enhancing patient engagement. Health professionals will benefit from its focus on empathy and individualized treatment.

5. *Integrative Approaches to Medical Assisted Therapy in Abingdon*

This book examines how integrative medicine complements traditional medical assisted therapy practices in Abingdon. It covers the use of holistic methods such as counseling, nutrition, and physical therapy alongside pharmaceutical treatments. Readers learn about multidisciplinary team coordination and comprehensive care strategies. The book is suited

for therapists interested in expanding their treatment modalities.

6. Medical Assisted Therapy and Mental Health: Insights from Abingdon Research

Focusing on the intersection of medical assisted therapy and mental health, this book presents research findings from Abingdon healthcare institutions. It explores the efficacy of therapy in managing co-occurring mental health disorders. The text discusses assessment tools, therapeutic interventions, and patient support systems. Mental health professionals will find valuable evidence-based guidance within its chapters.

7. Training and Certification in Medical Assisted Therapy: A Guide for Abingdon Practitioners

This practical guide outlines the training requirements and certification processes for medical assisted therapy providers in Abingdon. It provides information on educational programs, clinical competencies, and regulatory standards. The book assists aspiring therapists in navigating career pathways and professional development. It is a must-read for those entering the field or maintaining licensure.

8. Community Outreach and Medical Assisted Therapy: Abingdon Success Stories

Highlighting the impact of community outreach programs, this book shares success stories of medical assisted therapy initiatives across Abingdon. It showcases collaborations between healthcare providers, social services, and local organizations. The narrative underscores the importance of accessibility, stigma reduction, and patient empowerment. Community health workers and program coordinators will find inspiration and practical models here.

9. Ethical Considerations in Medical Assisted Therapy: Perspectives from Abingdon Practitioners

This book addresses the ethical challenges faced by medical assisted therapy professionals in Abingdon. Topics include patient confidentiality, informed consent, and managing dual relationships. It provides frameworks for ethical decision-making and professional conduct. The book is essential reading for clinicians committed to upholding integrity and patient rights in their practice.

medical assisted therapy abingdon: The Oxford Handbook of Opioids and Opioid Use Disorder Kelly E. Dunn, 2024 The Oxford Handbook of Opioids and Opioid Use Disorder synthesizes research across the spectrum and establishes a foundational knowledge regarding historical and current epidemiological trends, neurobiological and genetic contributors to opioid effects and opioid use disorder (OUD), and core elements of opioid use such as withdrawal and craving. It also provides specific information and guidance regarding opioid treatment paradigms. This handbook will serve as a comprehensive guide for practitioners, policymakers, students, and researchers who

wish to achieve a better understanding of the complex world of opioid and OUD practice and science.

medical assisted therapy abingdon: *Tails from the Classroom* Dr Russell Grigg, Helen Lewis, 2021-01-14 Written by Helen Lewis and Russell Grigg, *Tails from the Classroom: Learning and teaching through animal-assisted interventions (AAIs)* is a fascinating exploration of the use of AAIs in educational settings and how they can inspire and support learners' all-round development. There is growing interest in the idea of bringing animals into the classroom, but it is only recently that researchers have gathered clear data to show the impact of AAIs on the behavioural, emotional, physical and cognitive development of children and young people. *Tails from the Classroom* brings together this research in a highly accessible way, illustrated with real-life case studies from a range of classroom contexts. It also includes lots of practical guidance on how to set up, manage and evaluate a project, ensuring that the welfare of all participants, including the animals, is a priority. Helen and Russell discuss how AAIs can contribute towards learning in different subject areas and across the curriculum, sharing a wide range of examples to illustrate possible starting points for teachers in a range of subject and thematic contexts - even in less obvious areas such as the arts, literature, and religious and moral codes. They also provide a historical overview of human-animal interactions, highlighting how animals have played a central part in humans' social, spiritual and cultural development. This then underpins the authors' exploration into animals' potential role in enhancing particular dimensions of children's social, emotional, intellectual and physical development and well-being. This groundbreaking book is not just for animal-loving educators, however. It is for anyone who is serious about inspiring learners of all ages and prepared to explore new ways of doing so. Suitable for educators working with learners of all ages.

medical assisted therapy abingdon: *Our Voices* Bindi Bennett, Sue Green, 2019-02-13 The second edition of *Our Voices* is a ground-breaking collection of writings from Aboriginal social work educators who have collaborated to develop a toolkit of appropriate behaviours, interactions, networks, and intervention. The text explores a range of current and emerging social work practice issues such as cultural supervision, working with communities, understanding trauma, collaboration and relationship building, and the ubiquity of whiteness in Australian social work. It covers these issues with new and innovative approaches and provides valuable insights into how social work practice can be developed, taught and practiced in ways that more effectively engage Indigenous communities.

medical assisted therapy abingdon: *Medications for Opioid Use Disorder Save Lives* National Academies of Sciences, Engineering, and Medicine, Health and Medicine Division, Board on Health Sciences Policy, Committee on Medication-Assisted Treatment for Opioid Use Disorder, 2019-05-16 The opioid crisis in the United States has come about because of excessive use of these drugs for both legal and illicit purposes and unprecedented levels of consequent opioid use disorder

(OUD). More than 2 million people in the United States are estimated to have OUD, which is caused by prolonged use of prescription opioids, heroin, or other illicit opioids. OUD is a life-threatening condition associated with a 20-fold greater risk of early death due to overdose, infectious diseases, trauma, and suicide. Mortality related to OUD continues to escalate as this public health crisis gathers momentum across the country, with opioid overdoses killing more than 47,000 people in 2017 in the United States. Efforts to date have made no real headway in stemming this crisis, in large part because tools that already exist—like evidence-based medications—are not being deployed to maximum impact. To support the dissemination of accurate patient-focused information about treatments for addiction, and to help provide scientific solutions to the current opioid crisis, this report studies the evidence base on medication assisted treatment (MAT) for OUD. It examines available evidence on the range of parameters and circumstances in which MAT can be effectively delivered and identifies additional research needed.

medical assisted therapy abingdon: Play for Health Across the Lifespan Julia Whitaker, Alison Tonkin, 2021-05-17 Play for Health Across the Lifespan uses case studies to explore the impact of play and creativity on health and wellbeing throughout the lifecycle. While play at the start of life influences future development, the authors show play also has a role in improving prospects for health and wellbeing in adulthood and later life. A relational approach to health and wellbeing emphasizes the dynamic, mutually influential relationship between individual development and the changing contexts of our lives. Our personal play history is one feature of this dynamic process, and this book explores how the experience of play throughout the life course sculpts and resculpts the shape of our lives: our physical health, our mental wellbeing, and our relationship to the people and the world around us. Storytelling has been used since the beginning of time to communicate important life lessons in an engaging way. Taking inspiration from Shakespeare's 'Seven Ages of Man', the book uses a case-story approach to differentiate the stages of development and to present evidence for how play and playful experiences impact on health and wellbeing from birth to the end of life in the context of temporal and situational change. Each chapter in Play for Health Across the Lifespan introduces relevant evidence-based research on play and health, before presenting several narrative 'case stories', which illustrate the application of play theory and the neuroscience of play as they relate to each life stage. With contributions from specialists in health and education, community organizations and the creative and performing arts, this book will appeal to academics, students, and practitioners who are interested in exploring the role of play in addressing contemporary challenges to our physical, mental, and social health.

medical assisted therapy abingdon: Vocational & Technical Schools - East Peterson's, 2009-12-10 More than 2,200 vocational schools east of the Mississippi River--Cover.

medical assisted therapy abingdon: Basic Medical-surgical Nursing Mildred A. Mason, 1984

medical assisted therapy abingdon: Physiology and Medicine of Hyperbaric Oxygen Therapy Tom S. Neuman, Stephen R. Thom, 2008-06-05 Written by internationally recognized leaders in hyperbaric oxygen therapy (HBOT) research and practice, this exciting new book provides evidence-based, practical, useful information for anyone involved in HBOT. It outlines the physiologic principles that constitute the basis for understanding the clinical implications for treatment and describes recent advances and current research, along with new approaches to therapy. This book is an essential tool for anyone who cares for patients with difficult-to-heal wounds, wounds from radiation therapy, carbon monoxide poisoning, and more. Provides comprehensive coverage of pathophysiology and clinically relevant information so you can master the specialty. Covers the relevance of HBOT in caring for diverse populations including critical care patients, infants and pediatric patients, and divers. Features a section on the technical aspects of HBOT to provide insight into the technology and physics regarding HBO chambers. Presents evidence to support the effectiveness of HBOT as well as the possible side effects. Describes situations where HBOT would be effective through indication-specific chapters on chronic wounds, radiation and crush injuries, decompression sickness, and more.

medical assisted therapy abingdon: Issues in Dermatology and Cosmetic Medicine: 2011

Edition , 2012-01-09 *Issues in Dermatology and Cosmetic Medicine: 2011 Edition* is a ScholarlyEditions™ eBook that delivers timely, authoritative, and comprehensive information about Dermatology and Cosmetic Medicine. medical assisted therapy abingdon: *Oxford Textbook of Global Public Health* Roger Detels, Quarraisha Abdool Karim, Fran Baum, Liming Li, Alastair H Leyland, 2021-10-29 The Oxford Textbook of Global Public Health is the ultimate resource on the subject of public health and epidemiology. It offers a global and comprehensive perspective on wide-ranging public health needs and priorities in modern health care. Thoroughly revised and updated for the seventh edition, the book is split into three main topics. 'The Scope of Public Health' covers the development of the discipline, determinants of health and disease, and policies, law, and ethics. The second volume focuses on The Methods of Public Health, including the science of epidemiology, social science techniques, and environmental techniques. Finally, The Practice of Public Health is fully explored, with sections on specific public health problems, ways of prevention and control, the varying needs of different populations, and the functions of public health services and professionals. Three new editors have joined for this edition, Liming Li (China), Fran Baum (Australia), and Alastair H Leyland (UK), complimenting Quarraisha Abdool Karim (South Africa) and Roger Detels (USA), for a truly global perspective on public health. Featuring over 225 contributors from countries all over the world ensures that the book covers public health from all aspects, with vastly different health systems and priorities. Featuring new chapters on gender identity and gender-based violence, environmental health and climate change, genomics and epidemiology, and emerging and re-emerging infectious diseases, the seventh edition of the Oxford Textbook of Global Public Health remains the most comprehensive text on the subject and is a vital resource for public health practitioners and trainees, clinical epidemiologists, and students in the field.

medical assisted therapy abingdon: Social Work with Refugees, Asylum Seekers and Migrants Rachel Larkin, Lauren Wroe, Reima Ana Maglajlic, 2019-08-21 Social work is an international profession and is increasingly having to respond to the needs of displaced people and those impacted by immigration control systems. This book will be a vital resource for service providers, students and academics, specifically those who provide services to people whose lives are impacted by borders.

medical assisted therapy abingdon: Opioid-Use Disorders in Pregnancy Tricia E. Wright, 2018-05-10 Gain guidance and support when treating the high-risk population of women confronting (or battling) opioid-use disorders during pregnancy.

medical assisted therapy abingdon: Introduction to Coaching Psychology Siobhain O'Riordan, Stephen Palmer, 2021-04-28 This collection featuring chapters by leading international practitioners will offer an introduction to coaching psychology for those new to it, including students, trainees, psychologists, and coaches. *Introduction to Coaching Psychology* covers key topics, including the background and development of coaching psychology, the coach-coachee relationship, coaching psychology approaches and models, and themes such as assessment, contracting, and the setup in coaching psychology practice. Applications in coaching psychology are considered, including a look at particular coaching psychology specialisms and interventions, as well as discussions about working in organisations, working with young people, and life and personal coaching. Professional practice issues, such as boundaries and best practice, and coaching and diversity, are also explored.

Furthermore, a review of coaching psychology research is presented. The book also offers a rich collection of case studies to illustrate the practice of coaching psychology in a real-world setting and concludes with a consideration of the future of the field. This timely and accessible book will be essential reading for anyone new to the field, as well as coaches, psychologists, and counsellors interested in the theory, research, and practice of coaching psychology.

medical assisted therapy abingdon: *Treatment of Advanced Heart Disease* Kenneth L. Baughman, William A. Baumgartner, 2006-03-02 *Treatment of Advanced Heart Disease* is an expansive and up-to-date guide to the diagnosis and treatment of heart failure in children and adults. Written by leading specialists, this source guides the clinician through the possible causes of heart disease and emphasizes potentially reversible etiologies, in addition to reviewing currently available

medical assisted therapy abingdon: Occupational Therapy for Stroke Rehabilitation Simon B. N. Thompson, Maryanne Morgan, 2013-12-20 This book is both an introductory text to the rehabilitation of stroke for student therapists and a reference text for qualified therapists. The layout of the book reflects these needs with Chapters 1-4 assuming a minimal level of understanding of the material. These chapters provide an introduction to the condition of stroke itself, the problem therapists face in assessing and treating stroke patients and therapeutic approaches in occupational therapy. Prognosis of stroke is also discussed which is an issue taken up in later chapters concerned with expert systems. The use of microcomputers in occupational therapy is discussed throughout the book with particular reference to their direct role during therapy. Chapters 5-7 assume a higher level of understanding from the reader although students will find the material useful as an insight into the work of the modern-day therapist. Chapter 5 addresses the work carried out in the area of biofeedback; Chapter 6 introduces the concept and uses of databases, and Chapter 7 discusses the versatility of microcomputers, especially in the provision of expert systems for the prognosis of stroke.

medical assisted therapy abingdon: **Cancer Personalized Treatment** Nima Rezaei, 2025-10-07 The rapid flow of studies in the field of cancer and immunology during the last decades has increased our understanding of the interactions between the immune system and cancerous cells. In particular, it has been well-known that such interactions result in the induction of epigenetic changes in cancerous cells and the selection of less immunogenic clones as well as alterations in immune responses. Understanding the crosstalk between nascent transformed cells and cells of the immune system has led to the development of combinatorial immunotherapeutic strategies to combat cancer. The Handbook of Cancer and Immunology offers a comprehensive and up-to-date review of cancer immunology and immunotherapy, emphasizing key findings and clinically relevant data. This reference work is an essential resource for researchers, students, academics, and clinicians committed to advancing knowledge, diagnostics, and treatments in this vital field.

medical assisted therapy abingdon: National Library of Medicine Current Catalog National Library of Medicine (U.S.), 1991
