medicine for nightmares bookstore: All This Healing is Killing Me: A Memoir Gabrielle Pelicci, Ph.D. , 2023-02-27 At age 20, Gabrielle Pelicci returned from her modeling career in NYC to her hometown of Scranton, PA where her mother suddenly passed away. At her mother's funeral, Gabrielle had a spiritual experience that left her reeling and set her on a heroine's journey to learn about both the scientific and mystical explanations of human consciousness. Gabrielle studied a dozen healing practices, from alternative medicine to yoga, including travel immersions in Europe, Asia and Africa. Over the next 10 years, her complex PTSD symptoms persisted. Little by little, Gabrielle's childhood experiences of domestic violence, and her parents' mental illnesses and addictions are revealed. At age 30, still grieving the loss of her mother and disgusted with the fact that she can't overcome her anxiety and depression, Gabrielle attempted to take her own life. Luckily, she survived and continued on her journey of healing and trauma recovery, earning a Ph.D. and becoming a professor of Holistic Medicine, with a dissertation on Women Healers. In this deeply personal and vulnerable account, Gabrielle reveals how childhood trauma impacts our physical and mental health - as well as our adult relationships. She explores how you are only as sick as your secrets and telling your story is the medicine that can save your life. All This Healing is Killing Me is a brave narrative that reckons with the hold of the past over the present, the mind over the body and celebrates one woman's ability to write herself a happy ending.

medicine for nightmares bookstore: Psychology James S. Nairne, 2002-07 The new edition of James Nairne's highly respected text offers all the content, pedagogy, and visual appeal that professors and students have come to expect from a successful introductory psychology text. The third edition offers a comprehensive look at how psychology works in our everyday lives. This practical, motivating text presents the standard subjects covered in an introductory course, but connects them in a way that adds meaning and consistency to students' study of psychology. How does he do this? By introducing students to the adaptive mind-a theme based on the fact that our thoughts and actions stem from our need to adapt to our surroundings. This unique framework supports practical applications and helps students understand how we use psychology to deal with everyday challenges. Nairne emphasizes the ways particular behaviors, thought processes, and emotions help us solve problems-from memorizing a telephone number to ducking under cover as a building begins to shake to producing a quick physical response in the face of traffic hazards. Beneath the innovative approach, you'll find ample coverage of all the traditional topics around which you build your course.

medicine for nightmares bookstore: The Devouring Dragon Craig Simons, 2025-06-25 China's rise is assaulting the natural world at an alarming rate. In a few short years, China has become the planet's largest market for endangered wildlife, its top importer of tropical trees, and its biggest emitter of greenhouse gases. Its rapid economic growth has driven up the world's very metabolism: in Brazil, farmers clear large swaths of the Amazon to plant soybeans; Indian poachers

hunt tigers and elephants to feed Chinese demand; in the United States, clouds of mercury and ozone drift earthward after trans-Pacific jet-stream journeys. Craig Simons' *The Devouring Dragon* looks at how an ascending China has rapidly surpassed the U.S. and Europe as the planet's worst-polluting superpower. It argues that China's most important 21st-century legacy will be determined not by jobs, corporate profits, or political alliances, but by how quickly its growth degrades the global environment and whether it can stem the damage. Combining in-depth reporting with wide-ranging interviews and scientific research, *The Devouring Dragon* shines a spotlight on how China has put our planet's forests, wildlife, oceans, and climate in jeopardy, multiplying the risks for everyone in our burgeoning, increasingly busy world.
