meditation music of brahma kumaris: *The Brahma Kumaris as a 'Reflexive Tradition'* John Walliss, 2017-11-22 This title was first published in 2002. Drawing on primary research on the Brahma Kumaris World Spiritual University, a millenarian New Religious Movement of Indian origin, this book examines the status of tradition in the contemporary world through a critical engagement with the recent social theory of Anthony Giddens on the emergence of a post-traditional society. Wallis examines both the ways in which forms of tradition not only persist but also flourish in the contemporary world and also the manner in which such traditions are drawn on and (re)created by individuals in their ongoing construction of self-identity. Illuminating some of the difficulties encountered when social theory is applied to 'the real world', this book also offers a way of theorising about the status of contemporary religiosity that does not refer directly to the notion of secularisation.

Parent Child Relationships are tricky to understand, and gradual changes in your relationship with your child can go unnoticed. Children's behaviour and attitudes can make parents feel remote and unheard, at a loss to understand their child's performance at school, their child's lack of attention, self-care or respect for others. Desperate to provide the best life chance's for their child, parents are often advised to focus on the child, but the harder the parent tries to help, the harder the child pushes back. As their child grows, a happy family life becomes a more distant memory. Rebellious teenage years may be traditional, but a bad relationship with your teenager is not inevitable. You can be happy and comfortable being a natural parent, seeing your children from a different perspective, capable and confident in meeting challenges. Schools Aware Campaign Alan Wilson's second book *How to be a Parent Champion and add magic to your family* is the lynchpin of the approach he's

bringing to schools, helping them to let parents know there is a way to contribute to improving their child's outlook, that they don't have to rely entirely on the resources of the school to manage behaviour and attitudes to learning and attainment. That perhaps, it isn't necessary for behaviour to attract the attention of specialists before you can improve the attention and behaviour of your child. If you're a parent, teacher or governor and think your school would welcome an approach to explain how we can work together to promote strong parent child relationships as a method for behavioural change, increased engagement and attainment, please contact Alan at parentchildrelationships@gmail.com and he'll prioritise accordingly! meditation music of brahma kumaris: The Mysteries of Reality Gayle Kimball, 2021-03-26 Courageous scientists challenge the dominant paradigm of reality. Why are they so brave and what does their research reveal? What is reality? Is there more than we know from our five senses? Vanguard scientists believe there is more than we see so they formulate a non-materialist paradigm that expands human potential, to include mind and matter interaction. Since going against the dominant worldview provokes opposition, this book explores the personal backgrounds of the scientists to find out why they are so courageous. We learn that there is another dimension that allows for enhanced abilities. I own very little besides what I carry with me as I roam the streets. Just stuff bundled in 9-10 suitcases parked with friends across the world. For me, being homeless is part of a bigger plan. After being hit by a car several years ago not long after retiring, I had an epiphany. I realised that I had been on my own spiritual journey since my first visit to India in 1990. Since then, I have travelled to 155 countries, sometimes as a tourist, sometimes on business, sometimes for my charity. I have made friends all over the world. But, I still had unanswered questions. So, I decided to sell everything, pack up my life and travel the world with a difference. This time I would journey not as a tourist but as a traveller wanting to learn from every wise person who crossed my path, and every challenging situation I found myself in. I would document my learning from the people I interviewed across the world. And so was born my new book, *In Search of Spiritual Intelligence*.

meditation music of brahma kumaris: Freedom From Anxiety and Needless Suffering

Colin Drake, 2014-10-14 This book has two aims, the first as a stand-alone guide to, and practices for, Awakening. Once this has taken place then anxiety and unnecessary mental suffering disappear, for these are caused by misidentifying oneself as a separate object in a world of separate objects. This causes us to see each other, and the world, through a murky filter of self-interest, self-concern, self-promotion etc. On Awakening one discovers that there truly is no separate self and so this filter is removed allowing us to see the world 'as it is' with no self-concern for the future or past. The second aim is to provide the reader with information on my spiritual journey. This will show the influences that have moulded my understanding so that the reader can understand the basis of my 'pointers to awakening' which constitute my books on the subject. One other thing that makes this book unique is that it is the first that contains all of the various practices that I have developed, and use(d), over the last eighteen years.
