Modern life has become such that we all are suffering from information overload. There is a constant bombarding of data most of which is unsolicited. This creates clutter in mind. Our mind is constantly processing information which it doesn't even need. Our lifestyles are such that we find ourselves in a constant decision-making dilemma. From choosing the shirt to wear for office to the things to have at lunch, we are constantly faced with the problem of making insignificant choices. These decisions may not look like much but they keep our mind engaged. All of us face the decision fatigue to a great extent and it has an effect on our decision-making faculties and the ability of our brain to function efficiently. There are no surprise people are always so desperate to take breaks even though they are not really facing a very heavy workload in their personal and professional lives. All these things are putting a lot of burden on our minds. The mind always remains under pressure of working constantly. It remains cluttered and becomes inefficient. There are so many decisions being taken in the background that it is always reeling under pressure. This also creates another problem and that is unconscious decision making. We are living a life of consequences. Someone does something and all our actions are simply reactions to that action. We are constantly in a state of compulsive reaction. We have given the keys of our lives to others. A famous celebrity does something and you also want to do the same, without even thinking about the futility of the action. Someone abuses you on the way to work and the whole day your brain remains engaged thinking about it. Such things are

reactions and not conscious actions. Meditation is the way to declutter the mind. It helps you in observing your life from a distance for a moment so that you can make conscious decisions. If you want to achieve a state of thoughtless awareness where every decision is simply not a reaction to the actions in the past, meditation is the way to do that. This of book has the best collection of bedtime stories perfect for every day guided meditation to stop anxiety and fall asleep fast with self-hypnosis

meditation stories for adults: *Bedtime Stories for Adults* Stacey Joyful, 2021-02-05 We never plan to stay up for hours into the night, yet sometimes it seems like sleep is an unachievable goal. The longer we are stuck awake in bed, the more frustrated we become. Everyone knows we need seven to eight hours of sleep every night, but when you are finding it hard to reach that number of hours, it can feel like a cruel joke. We get tempted to believe blatant falsehoods about sleep. Lies like I can get by on five hours of sleep are common among people who don't get enough sleep, and ideas like this are simply untrue. This fact should convince you to leave behind your life of not getting enough sleep: with scientists looked at the brains of people who got just six hours of sleep every night for a month, and compared it with people who didn't sleep at all for one night, they had the similar levels of cognitive decline. When you are used to having this much cognitive decline because you have it every day, you don't realize it the way you do when you lose your sleep all at once with an all-nighter, but the science shows that both are equally bad for your ability to think. But there's no reason to stress over losing sleep any longer, because *Bedtime Stories for Adults* has everything you need to fall asleep. Not only does it provide you with fully fleshed-out stories for adults, but it starts out giving you practical tips on how to control anxiety and improve your mindfulness. These stories blend family holiday traditions with the seasonal changes on the way to adulthood; they deal with the challenges of growing up and being part of a family. Every story needs conflict to keep our interest, but these stories give you a character to cheer on as they grapple with their problem while simultaneously relaxing your mind, body, and spirit. They were written by someone who has experience in crafting these kinds of stories: stories that lull us to sleep with an accessible style, pacing that won't break your neck, and characters we relate to so much that we lose ourselves in them. Do you remember the last time you lost yourself in a story - when you felt so involved in it that it took some time to get yourself back into the mindset required for real life after you were done? These stories were written just for the purpose of you experiencing that again. But

not only that - these stories are not story-focused, but sensory-focused. You won't be able to help yourself from following asleep reading them, because they each take their time to paint a full picture with every sense: taste, smell, touch, hearing, and sight. But maybe you still aren't convinced of the use of stories for bedtime. You might still think of stories as something you can use for entertainment exclusively, instead of for this. The only way you can do it is by taking the plunge. You have already lost too much sleep from not having the right tools for dealing with it. Don't let that happen any longer. Click the Buy Now button to change everything about your sleeping life for the better. You will notice such a drastic change that you will wonder how you were ever able to go through the day sleep-deprived.
