meditation retreat spirit rock: Thailand's International Meditation Centers Brooke Schedneck, 2015-05-15 This book explores contemporary practices within the new institution of international meditation centers in Thailand. It discusses the development of the lay vipassana meditation movement in Thailand and relates Thai Buddhism to contemporary processes of commodification and globalisation. Through an examination of how meditation centers are promoted internationally, the author considers how Thai Buddhism is translated for and embodied within international tourists who participate in meditation retreats in Thailand. Shedding new light on the decontextualization of religious practices, and raising new questions concerning tourism and religion, this book focuses on the nature of cultural exchange, spiritual tourism, and religious choice in modernity. With an aim of reframing questions of religious modernity, each chapter offers a new perspective on the phenomenon of spiritual seeking in Thailand. Offering an analysis of why meditation practices appeal to non-Buddhists, this book contends that religions do not travel as whole entities but instead that partial elements resonate with different cultures, and are appropriated over time.

This story of motherhood as a path to awakening is, says yoga and meditation teacher Anne Cushman, “an homage to the long threads that run through all human lives, stitching up what’s shredded in our hearts.” The Mama Sutra spans an eighteen-year journey through motherhood as a spiritual practice, chronicling Cushman’s first pregnancy, her daughter's tragic stillbirth, the joyful birth of her son, the “home retreat” of early motherhood, the challenges of parenthood, the diagnosis and gifts of her son’s developmental differences, the meltdown of her nuclear family and its reconfiguration into a new and joyful form, and more. This is a powerful story of the rawness and beauty of life.

Lal, 2006-08-21 Written by leading scholars and including a foreword by the Dalai Lama, this book explores the interface between Buddhist studies and the uses of Buddhist principles and practices in psychotherapy and consciousness studies. The contributors present a compelling collection of articles that illustrate the potential of Buddhist informed social sciences in contemporary society, including new insights into the nature of human consciousness. The book examines the origins and expressions of Buddhist thought and how it is now being utilized by psychologists and social scientists, and also discusses the basic tenets of Buddhism and contemporary Buddhist-based empirical research in the psychological sciences. Further emphasis is placed on current trends in the areas of clinical and cognitive psychology, and on the Mahayana Buddhist understanding of consciousness with reference to certain developments in consciousness studies and physics. A welcome addition to the current literature, the works in this remarkable volume ably demonstrate how Buddhist principles can be used to develop a deeper understanding of the human condition and behaviours that lead to a balanced and fulfilling life.
