The chapters enable comparison of the cultural effects on the different structures, styles, and contents of public speaking in societies from West to East. That is, of WHAT leaders say, HOW they say it (e.g., degree of openness, directness, usage of metaphors and slogans, xenophobic and racial expressions), under WHICH specific circumstances (e.g., National Days addresses, national or local assemblies' debates, during election campaigns appeals, press conferences' briefings, and in international meetings' speeches), and for

WHAT specific audiences (e.g., supporters and voters, media representatives, or the global community).

political persuasive speech topics: The Politics of Common Sense Deva R. Woodly, 2015
The way that movements communicate with the general public matters for their chances of lasting success. Deva Woodly argues that the potential for movement-led political change is significantly rooted in mainstream democratic discourse and specifically in the political acceptance of new issues by news media, the general public, and elected officials. This is true to some extent for any group wishing to alter status quo distributions of rights and/or resources, but is especially important for grassroots challengers who do not already have a place of legitimated influence in the polity. By examining the talk of two contemporary movements, the living wage and marriage equality, during the critical decade after their emergence between 1994-2004, Woodly shows that while the living wage movement experienced over 120 policy victories and the marriage equality movement suffered many policy defeats, the overall impact that marriage equality had on changing American politics was much greater than that of the living wage because of its deliberate effort to change mainstream political discourse, and thus, the public understanding of the politics surrounding the issue.
