**pratt institute art therapy: RE-ENCHANTING ART THERAPY** Lynn Kapitan, 2003-01-01 *Re-Enchanting Art Therapy* is written for art therapists, supervisors, students, and colleagues in related fields who seek to approach their work as a living, artistic practice but struggle to do so in the often toxic work environments where art therapy is most needed. Asking "What kills creative vitality?" research uncovered core images that art therapists associate with toxic work and the elements of re-enchantment. Author Lynn Kapitan relates, in stories and images of art therapists, how re-enchantment is a cycling process that requires an unambivalent relationship with creative power. Chapter One uses the myth of the dragon to tell stories of art therapists awakening creative energy in a constantly changing, postmodern world. Chapter Two explores transformation in the symbol of the begging bowl held out to accept whatever is placed within as the materials for creative renewal. Using the research method of "collaborative witness," Chapter Three offers transformative stories of several disenchanted art therapists who discover their disconnection from the primordial source of their creativity in the imagery of water. A community intervention in Chapter Four, the "Reflective Circle of Peers," presents issues and methods that art therapists use to transform their practices. In Chapter Five, Lynn Kapitan addresses fears and yearning in the toxic work environment, where such practices as playing with wolves and painting in the crossroads teach her the values of the threshold space and the fierce hearted embrace of her creativity. *Re-Enchanting*

Art Therapy challenges art therapists to transform the practice of art therapy with creative vitality.

**pratt institute art therapy: IDENTITY AND ART THERAPY** Maxine Borowsky Junge, 2014-04-01  
This book is an attempt to give art therapy identity the front and center position it deserves. Despite efforts toward clarity, there will nevertheless remain many contradictory notions, often paradoxically existing at the same time. This is the nature of identity and of art therapy's identity. "Art therapy" is neither a form of artist nor a form of therapist, but rather a whole new field - a separate and special profession with core values and attributes of its own that must lead to a special and separate identity. Chapter 1 is the "Introduction" to this book. In Chapter 2, "Images of Identity," the basic groundwork is laid describing definitions of personal and professional identity and discussion of the concept of "intersectionality." Chapter 3, "Living in the Real World," discusses some unique problems faced by art therapists as they strive to achieve personal and professional identity and credibility. Chapter 4, "Essays on Identity by Art Therapists," contains 22 essays by prominent art therapists who were invited to contribute their ideas. These essays can be considered different "readings" of what identity is in the art therapy field. Chapter 5, "Identity Initiative, Steps Toward a New Definition: An Action Plan," describes a two-year process, including all segments of the art therapy community, to achieve and promulgate a shared public professional identity. Chapter 6 underscores "Conclusions" to discover some baseline information about identity for students entering graduate art therapy programs. A brief questionnaire was given to three art therapy master's program directors to conduct this survey with their entering students in the fall 2012. An important and essential discussion of the nuances of identity by the art therapy community is a significant intention of the book. *Identity and Art Therapy* is primarily written for art therapists-both experienced and novice. It is for people who teach now and for those thinking about entering the field in the future.

**pratt institute art therapy: WORKING WITH IMAGES: THE ART OF ART THERAPISTS** Bruce L. Moon, 2002-01-01  
*Working With Images: The Art of Art Therapists* is an effort to give voice to the artist aspect of our identity as art therapists. This book is about how the artists work, how they

learned to do it, why they do it. This book will give you glimpses of the memories, and perhaps the scars, of the artists. Be honored. The artists in this book know that it is good to make art and they make good art. Through their work they demonstrate their faith in the product and the process. For some of them, art making is their anchor, in the turbulent world of helping professions. For some, images come in response to their clients. For all of them, making art deepens and enriches their lives. *Working With Images: The Art of Art Therapists* is a presentation of artworks and contextual essays by professional art therapists. This book is foreworded by Don Siedien and includes an introduction that addresses the structure, rationale and intent of this book. The introduction is followed by the artist-therapists' contributions. Each art therapist's selected artworks are presented on one full page in the text. Immediately following the art piece(s) is a brief biographical sketch, a photo of the art therapist and his or her artist's statement. From the very beginning of the art therapist profession in the United States there has been steady discussion of the relative importance of the 'artist' aspect of art therapists' professional identity. In the thirty years that the American Art Therapy Association has been in existence there have been few other topics that have generated as much interest and debate at the annual national conference. Over the past several years there has been growing interest in re-igniting our artistic passions and welcoming them back into our professional identity. This movement has been evidenced by a number of conference papers and workshops and professional journal articles focused on examining the integration of the artist and the therapist aspects of our work. *Working With Images: The Art of Art Therapists* presents art therapists as committed and serious, fine artists. This book will be a significant contribution to the literature, and identity, of the art therapy profession.

**pratt institute art therapy: Art School** Steven Henry Madoff, 2009-09-11 Leading international artists and art educators consider the challenges of art education in today's dramatically changed art world. The last explosive change in art education came nearly a century ago, when the German Bauhaus was formed. Today, dramatic changes in the art world—its increasing professionalization, the pervasive power of the art market, and fundamental shifts in art-making itself in our post-Duchampian era—combined with a revolution in information technology, raise fundamental questions about the education of today's artists. *Art School (Propositions for the 21st Century)* brings together more than thirty leading international artists and art educators to reconsider the practices of art education in academic, practical, ethical, and philosophical terms. The essays in the book range over continents, histories, traditions, experiments, and fantasies of education. Accompanying the essays are conversations with such prominent artist/educators as John Baldessari, Michael Craig-Martin, Hans Haacke, and Marina Abramovic, as well as questionnaire responses from a dozen important artists—among them Mike Kelley, Ann Hamilton, Guillermo Kuitca, and Shirin Neshat—about their own experiences as students. A fascinating analysis of the

architecture of major historical art schools throughout the world looks at the relationship of the principles of their designs to the principles of the pedagogy practiced within their halls. And throughout the volume, attention is paid to new initiatives and proposals about what an art school can and should be in the twenty-first century—and what it shouldn't be. No other book on the subject covers more of the questions concerning art education today or offers more insight into the pressures, challenges, risks, and opportunities for artists and art educators in the years ahead. Contributors Marina Abramovic, Dennis Adams, John Baldessari, Ute Meta Bauer, Daniel Birnbaum, Saskia Bos, Tania Bruguera, Luis Camnitzer, Michael Craig-Martin, Thierry de Duve, Clémentine Deliss, Charles Esche, Liam Gillick, Boris Groys, Hans Haacke, Ann Lauterbach, Ken Lum, Steven Henry Madoff, Brendan D. **pratt institute art therapy: *Art Therapy And Psychotherapy*** Victoria D. Coleman, Phoebe Farris-Dufrene, 2014-07-16 As the world changes rapidly, there exists a challenge to develop new conceptualizations, paradigms, definitions and strategies for surviving in an intensely competitive global community. In response to these changes, helping professionals must expand their knowledge of therapeutic approaches and re-evaluate their philosophies and objectives in order to interact effectively with diverse populations.; Enabling therapists and educators an opportunity to embrace two modalities at once, this text applies a combined approach to individual, family and group counselling situations. The authors contend that the use of artistic expression as an element of the counselling prescription transcends age, race, culture and gender in its effectiveness. Hence, art therapy, blended with and enhanced by traditional psychotherapy, lends itself naturally to the multifaceted clientele of the 21st century.; Presented first in this resource is a theoretical framework for art therapy and psychotherapy, and a thorough review of the existing literature. The authors then discuss integration of theory into practice through case studies complete with original client

artwork. The final chapters focus on other important issues, including ethical and legal considerations, multicultural concerns, career development, and further implications for the field.
