pratt center for community development: *Making a Global Immigrant Neighborhood* Tarry Hum, 2014-06-13 Based on more than a decade of research, *Making a Global Immigrant Neighborhood* charts the evolution of Sunset Park--with a densely concentrated working-poor and racially diverse immigrant population--from the late 1960s to its current status as one of New York City's most vibrant neighborhoods. Tarry Hum shows how processes of globalization, such as shifts in low-wage labor markets and immigration patterns, shaped the neighborhood. She explains why Sunset Park's future now depends on Asian and Latino immigrant collaborations in advancing common interests in community building, civic engagement, entrepreneurialism, and sustainability planning. She shows, too, how residents' responses to urban development policies and projects and the capital represented by local institutions and banks foster community activism. Hum pays close attention to the complex social, political, and spatial dynamics that forge a community and create new models of leadership as well as coalitions. pratt center for community development: *Zoned Out!* Tom Angotti, Sylvia Morse, 2023-04-25 Gentrification and displacement of low-income communities of color are major issues in

New York City and the city's zoning policies are a major cause. Race matters but the city ignores it when shaping land use and housing policies. The city promises affordable housing that is not truly affordable. 'Zoned Out!' shows how this has played in Williamsburg, Harlem and Chinatown, neighborhoods facing massive displacement of people of color. It looks at ways the city can address inequalities, promote authentic community-based planning and develop housing in the public domain--

pratt center for community development: Contested City Gabrielle Bendiner-Viani, 2019-01-03 2020 Brendan Gill Prize finalist For forty years, as New York's Lower East Side went from disinvested to gentrified, residents lived with a wound at the heart of the neighborhood, a wasteland of vacant lots known as the Seward Park Urban Renewal Area (SPURA). Most of the buildings on the fourteen-square-block area were condemned in 1967, displacing thousands of low-income people of color with the promise that they would soon return to new housing—housing that never came. Over decades, efforts to keep out affordable housing sparked deep-rooted enmity and stalled development, making SPURA a dramatic study of failed urban renewal, as well as a microcosm epitomizing the greatest challenges faced by American cities since World War II. Artist and urban scholar Gabrielle Bendiner-Viani was invited to enter this tense community to support a new approach to planning, which she accepted using collaboration, community organizing, public history, and public art. Having engaged her students at The New School in a multi-year collaboration with community activists, the exhibitions and guided tours of her Layered SPURA project provided crucial new opportunities for dialogue about the past, present, and future of the neighborhood. Simultaneously revealing the incredible stories of community and activism at SPURA, and shedding light on the importance of collaborative creative public projects, *Contested City* bridges art, design, community activism, and urban history. This is a book for artists, planners, scholars, teachers, cultural institutions, and all those who seek to collaborate in new ways with communities.

The new military necessity for rapid flexible response requires quite

different physical resources from the massive fixed positions of the Cold War, with huge tracts of land and buildings looking for new uses. The transition from military to civilian life for these complex, contaminated, isolated, heritage laden and often contested sites in locations ranging from urban to remote is far from easy. There is very little systematic analysis of what follows base closures, leaving communities, governments, developers, and planners experimenting with untested land use configurations, partnership structures, and financing strategies. With twelve case studies drawn from different countries, many written by those involved, Sustainable Regeneration of Former Military Sites enables the diverse stakeholders in these projects to discover unique opportunities for reuse and learn from others' experiences of successful regeneration.
