How Prayer Supports Ethical Decision-Making

Ethical dilemmas are common in business, where decisions can impact employees, clients, and communities. Through prayer, entrepreneurs reflect on their values and seek alignment between their business practices and spiritual principles.

Aligning Business Goals with Moral Values

Creating a Prayerful Work Environment

Some business owners encourage a prayerful atmosphere by inviting team members to participate in group prayers or moments of reflection. This can foster unity, shared values, and collective motivation within the workplace.

prayer for a business owner: Christian Prayers for Friends Marvin R. McKim, 2010-07 'Christian Prayers for Friends' is a Guidebook that examples a Prayer before our Heavenly Father with verbal communication expressed in an individual's own words. To kneel before Him in humility with a submissive heart talking like you would talk to a friend. Our Heavenly Father is not impressed with stiff formal prayers. He wants you to talk openly to Him from your heart. The key is to believe in your heart what you say with your mouth. Many find it difficult to formulate the words to express a particular need or a thanksgiving of praise unto our Heavenly Father. Marvin R. McKim is blessed as he is able to formulate words to articulate a particular prayer or a thanksgiving. Marvin's prayers are now shared with others in this Guidebook for Personal Prayers. Marvin hopes a newfound encouragement for conversational prayer openness is exemplified to those who read this Guidebook.

prayer for a business owner: An Investigation Into Christian SME Owner-Managers' Conceptualisations of Practice Andrea Werner, 2008 This study investigates how Christianity impacts on the way owner-managers of small to medium-sized enterprises (SMEs) conceptualise their worlds of business practice. The context for the research is the more general issue of how civil society and its institutions influence economic activity and how they might provide a counterbalance to the potentially negative impacts of 'unrestrained' self-interested economic behaviour. The study is based on qualitative interviews with SME owner-managers in Germany and the U.K. who regard

themselves as practising Christians. Using a socio-psychological approach, the data analysis yielded a range of linguistic and conceptual resources that are peculiar to Christian discourse and that have the potential to influence business activity in rather distinctive ways. This book outlines the effects that these Christian resources can have on these owner-managers and how they may be linked to specific business practices. Attention is drawn to the fact that Christian conceptual resources can be interpreted and exploited in different ways, which leads to differences in how Christian owner-managers apply their faith to their business. Furthermore, the study maps out the - often interacting - influence of other discursive contexts and resources. The specific influence of the SME context will be discussed and some differences with regards to the two national contexts in which the research was conducted will be highlighted. The book also addresses how the socio-psychological approach that was chosen for this study may be used for investigations into the impact of other civil society contexts.
