premier financial alliance logo: The Dialectics of Globalization Jerry Harris, 2008-12-11
Combining bold theoretical analysis and careful empirical investigation Harris provides a critical framework to understand the political and economic underpinnings of globalization. In an unique historical approach the book examines how the revolution in information technologies and the

break-up of the Soviet Union intertwined to present new global opportunities to reorganize capitalism as a unified world system headed by an emerging transnational capitalist class. The book challenges the common view that nation states still define international relations, with the United States as hegemonic leader of the world system. Instead Harris offers a more complex analysis of world affairs that sees the current period as one of transition between nationally based industrial capitalism and a global system based on revolutionary methods of production and new class relationships. He argues this conflict appears in every country as national economies realigned to fit new patterns of world accumulation creating a host of political tensions within and between nations. This analysis is detailed in a distinctive interpretation of the US military/industrial complex, as well as the contemporary class struggles in Germany and the emerging powers of China, India and Brazil. The book concludes by investigating alternative trends which are currently challenging the inequalities of global capitalism, unfolding a fresh approach to the relationship between the state, market and civil society.

premier financial alliance logo: Australian Climate Policy and Diplomacy Ben L. Parr, 2019-12-11 Australian Climate Policy and Diplomacy provides a well overdue critique of existing, and high-profile, publications that convey the 'greenhouse mafia' hypothesis, which posits that Australia's weak policy response to climate change is the result of a menacing domestic fossil fuel lobby. Ben L. Parr argues that the shared government-industry discourse about protecting Australia's industrial competitiveness has had a more decisive influence in shaping and legitimising Australian climate policy than the direct lobbying tactics of the fossil fuel industry. Parr also reveals how the divergent foreign policy discourses and traditions of Australia's two major political parties - as internationalist versus alliance-focused - have enabled and constrained their climate diplomacy and domestic policies over time. To demonstrate his argument, he presents a discourse analysis woven into a chronological policy narrative, comprising more than 1000 primary texts (media releases, interviews, and speeches) generated by prime ministers and key fossil fuel lobbyists. Overall, this volume illustrates how domestic forces have and are influencing Australia's climate policy. In doing so, it also provides a framework that can be adapted to examine climate mitigation policies in other countries, notably Canada and the US. This book will be of interest to students and scholars of climate change, environmental policy and governance, and Australian climate change policy and politics more specifically, as well as policymakers and practitioners working in these fields.

premier financial alliance logo: Private Banking in Europe Lynn Bicker, 2013-02-01 Private banking is one of the highest growth and most profitable financial businesses in Europe. A

large proportion of the market remains untapped and the 1990s are likely to bring significant expansion in developing countries. Private Banking in Europe provides new insights into the private banking industry, its growth and future, and emerging opportunities for private bankers and their clients. It debates the importance of global and local service; the potential dichotomy between the wealthy and the successful, and considers the private banking industry. A comparison of key players and their chosen markets and strategies is complemented by an exploration of the growth of intermediaries and unexpected competitors. The work also includes a study of non-European influences. The book offers a valuable insight into private banking, through the eyes of the bankers themselves. The final chapter is devoted to private bankers' own view of their industry, their competition and future directions.

premier financial alliance logo: Settler Economies in World History , 2013-01-08 Settler colonialism was a major aspect of the imperial age that began in the sixteenth century and has encompassed the whole world unto the present. Modern settler societies have together constituted one of the major routes to economic development from their foundation in resource abundance and labour scarcity. This book is a major and wide-ranging comparative historical enquiry into the experiences of the settler world. The roles of indigenous dispossession, large-scale immigrant labour, land abundance, trade, capital, and the settler institutions, are central to this economic formation and its history. The chapters examine those economies that emerged as genuine colonial hybrids out of their differing neo-European backgrounds, with distinctive post-independence structures and an institutional persistence into the present as independent states. Contributors include Stanley Engerman, Susan Carter, Henry Willebald, Luis Bertola, Claude Lützelshwab, Frank Tough, Kathleen Dimmer, Tony Ward, Drew Keeling, Carl Mosk, David Meredith, Martin Shanahan, John K Wilson, Bernard Attard, Grietjie Verhoef, Tim Rooth, Francine McKenzie, Jorge Alvarez, Jim McAloon, as well as the editors.

Neither of these definitions is adequate because the City is both greater and less than either finance alone or a physical location. The author demonstrates that it is only by taking a detailed look at the City over the last 100 years that it can be understood.
