The remainder of the book analyses various important topics in air transport economics, including competition in airline markets, key rules, regulations and taxes that affect the return on capital in aviation, the way that airlines form relationships, and the economics of the market for oil and jet fuel, among others.

premium economy class singapore airlines: *Building Brands in Asia* Tim Andrews, Wilson Chew, 2017-05-18 In a global business environment characterized by volatility and change, the formation of enduring relationships with consumers is paramount, but also notoriously difficult. Developing a unique brand personality is increasingly recognized as a key method to achieving the goal of customer loyalty. Focusing on the creation, development and management of brands in the world's most dynamic, diverse and challenging business environment, *Building Brands in Asia* challenges the assumption that the continuing success of global brands in Asia is a given. The first part examines the challenge multinational corporations face in balancing brand consistency with local effectiveness. In the second part, attention shifts to Asian company brands, where the focus on branding has been relatively muted until now. Through a variety of sector and country contexts - from facilities management to football clubs, places to pop bands, home appliances to home weaving - we narrate simply and clearly the value, meaning, auditing, aligning, extending and architecture of brands from the likes of Haier, Ah Yee Taung, Axis Bank, OCS, Caltex, Manchester United and Thai Airways in markets as diverse as Japan, Laos, Korea and Singapore. Replete with anecdotes, interviews and case studies, Andrews and Chew provide an insightful, detailed and timely examination for all those interested in today's primary corporate preoccupation set in the world's most exciting marketplace.

premium economy class singapore airlines: *Comfort and Contemporary Culture* Andrew Hickey, 2023-11-08 To be comfortable stands as an aspiration of the times; to be comfortable defines what it means to live 'the good life'. We talk about such things as maintaining a comfortable home, a comfortable lifestyle and a comfortable retirement. We seek out comforts in the relationships we sustain, the leisure practices we enact and the possessions we accumulate. We look for promises of comfort in the words of a close friend and our next pair of shoes. Furnished in the home, optionally outfitted in cars, scrutinised in holiday brochures and brushed up against in the clothes we wear, comfort is there, marking distinctions and framing decisions about what it means to live well. But by consuming comfort in the ways that we do, we do ourselves harm and limit our only planet of its capacity to provide for the requirements of life. This is a world that grows ever more uncomfortable because of comfort and when linked to consumption and excess, indulgence and apathy, it occurs that comfort carries effects that have existential consequence. Utilising analyses of popular culture and ethnographic accounts of everyday life, *Comfort and Contemporary Culture* works through case study accounts of comfort's enactment to pose questions around what it means to live, now. *Comfort and Contemporary Culture* poses alternative renderings of the idea of comfort to return the concept to its earliest roots in notions of confortāre. The revisioning of what we take as comfort requires urgent attention, with the ecological, social and intrapersonal implications of comfort's current excesses demonstrative of this need. This book will be relevant reading for students and scholars of cultural studies and sociology, cultural anthropology, social geography and studies of community.

Taneja, 2016-04-22 *Designing Future-Oriented Airline Businesses* is the eighth Ashgate book by Nawal K. Taneja to address the ongoing challenges and opportunities facing all generations of airlines. previous books, the primary audience is senior-level practitioners of differing generations of airlines worldwide as well as related businesses.
